

LAND*info*
WORLDWIDE MAPPING LLC

GLOBAL GEODATA CATALOG

Founded in 1993, **LAND INFO Worldwide Mapping, LLC (Land Info)** maintains one of the world's largest commercial archives of digital and paper topographic map and nautical chart data. Complemented by a variety of high-resolution and medium-resolution satellite imagery products, our total focus on data enables us to deliver high-quality solutions with rapid turn-around at competitive prices. Our suite of digital geodata solutions available on a worldwide basis includes:

- Digital topographic map data including DRGs (Digital Raster Graphics – scanned and georeferenced topos), DEMs (Digital Elevation Models) and vector layers
- High-resolution aerial photography and satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium GEO-Information Services Pléiades 50cm and DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm
- Medium-resolution satellite imagery including SPOT Image 1.5m - 20m, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m
- Image processing services such as orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment) cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location, accuracy assessment and DEM/contour generation from stereo pairs
- Vector feature extraction (buildings, roads, hydrology) and classification services (land-use, land-cover, vegetation and impervious surface mapping)

The markets we serve include mapping and geographic information systems (GIS), academia, national security and defense, visualization/simulation, aviation, wireless communications and other utilities, mining, oil & gas, conservation, hydrology, civil and environmental engineering, conservation, humanitarian assistance, land surveying, development, fleet management, mass media and motion pictures, among others.

Land Info is a GeoEye Authorized Reseller, DigitalGlobe Distribution Partner, Astrium GEO-Information Services SPOT Image Partner, RapidEye Direct Distributor, Authorized Intermap Data Distributor, USGS Business Partner and Esri Business Partner.

This catalog contains a country-by-country listing of the best available geodata. For additional information or to place an order please contact us:

Afghanistan

Land Info offers a variety of digital topographic map data and satellite imagery products of Afghanistan including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Afghanistan via 1,653 Russian military 1:50,000 topographic maps
Full coverage of Afghanistan via 447 Russian military 1:100,000 topographic maps
Full coverage of Afghanistan via 130 Russian military 1:200,000 topographic maps
99% coverage of Afghanistan via 64 US NGA 1:250,000 JOG topographic maps
Full coverage of Afghanistan via 7 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Afghanistan via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Charikar, Afghanistan – 1 Russian military 1:10,000 topographic City Plan map
Herat, Afghanistan – 1 Russian military 1:10,000 topographic City Plan map
Jalalabad, Afghanistan – 1 Russian military 1:10,000 topographic City Plan map
Kabul, Afghanistan – 4 Russian military 1:10,000 topographic City Plan maps
Kandahar, Afghanistan – 1 Russian military 1:10,000 topographic City Plan map
Mazar-i-Sharif, Afghanistan – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Afghanistan—low-cost, rapid delivery:

Afghanistan VMAP-0 – US NGA 1:1,000,000 vector mapping
Afghanistan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Afghanistan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Afghanistan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Afghanistan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Afghanistan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Afghanistan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Afghanistan (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Albania

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Albania including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Albania via 103 national 1:50,000 topographic maps
Full coverage of Albania via 36 national 1:100,000 topographic maps
Full coverage of Albania via 12 national 1:200,000 topographic maps
Full coverage of Albania via 110 Russian military 1:50,000 topographic maps
Full coverage of Albania via 36 Russian military 1:100,000 topographic maps
Full coverage of Albania via 12 Russian military 1:200,000 topographic maps
Full coverage of Albania via 7 US NGA 1:250,000 JOG topographic maps
Partial coverage of Albania via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Albania via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Durres, Albania – 1 Russian military 1:10,000 topographic City Plan map
Tirane, Albania – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Albania—low-cost, rapid delivery:

Albania VMAP-0 – US NGA 1:1,000,000 vector mapping
Albania SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Albania SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Albania GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Albania GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Albania
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Albania

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Albania (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Algeria

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Algeria including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Algeria via 192 Russian military 1:100,000 topographic maps
Full coverage of Algeria via 372 Russian military 1:200,000 topographic maps
Partial coverage of Algeria via 76 US NGA 1:250,000 JOG topographic maps
Full coverage of Algeria via 17 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Algeria via 7 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bone (Annaba), Algeria – 1 Russian military 1:10,000 topographic City Plan map
Constantine (Qacentina), Algeria – 1 Russian military 1:10,000 topographic City Plan map
Oran (Wahran) and Mers al Kebir, Algeria – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Algeria—low-cost, rapid delivery:

Algeria VMAP-0 – US NGA 1:1,000,000 vector mapping
Algeria SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Algeria SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Algeria GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Algeria GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Algeria
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Algeria

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Algeria (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Andorra

Land Info offers a variety of digital topographic map data and satellite imagery products of Andorra including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Andorra via 1 Russian military 1:200,000 topographic map

Full coverage of Andorra via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Andorra—low-cost, rapid delivery:

Andorra VMAP-0 – US NGA 1:1,000,000 vector mapping

Andorra SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Andorra SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Andorra GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Andorra GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Andorra

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Andorra

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Angola

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Angola including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Angola via 470 Angola national 1:100,000 topographic maps
Full coverage of Angola via 202 Russian military 1:200,000 topographic maps
Near full coverage of Angola via 72 US NGA 1:250,000 JOG topographic maps
Partial coverage of Angola via 6 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Angola via 6 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Luanda, Angola – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Angola–low-cost, rapid delivery:

Angola VMAP-0 – US NGA 1:1,000,000 vector mapping
Angola SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Angola SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Angola GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Angola GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Angola
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Angola

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Angola (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Antigua

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Antigua including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Antigua via 1 1:50,000 national topographic map
Full coverage of Antigua via 1 1:100,000 national topographic map
Full coverage of Antigua via 2 US NGA 1:250,000 JOG topographic maps
Full coverage of Antigua via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Antigua via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Antigua—low-cost, rapid delivery:

Antigua VMAP-0 – US NGA 1:1,000,000 vector mapping
Antigua SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Antigua SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Antigua GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Antigua GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Antigua
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Antigua

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Antigua (continued)

Argentina

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Argentina including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Argentina via 1,834 1:100,000 national topographic maps

Full coverage of Argentina via 243 1:250,000 national topographic maps

Partial coverage of Argentina via 10 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Argentina via 9 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bahia Blanca, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Berisso, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Buenos Aires, Argentina – 6 Russian military 1:25,000 topographic City Plan maps

Cordoba, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Ensenada, Argentina – 1 Russian military 1:25,000 topographic City Plan map

La Plata, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Mar del Plata, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Mendoza, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Rosario, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Santa Fe, Argentina – 1 Russian military 1:25,000 topographic City Plan map

Tucuman (San Miguel de Tucuman), Argentina – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Argentina—low-cost, rapid delivery:

Argentina VMAP-0 – US NGA 1:1,000,000 vector mapping

Argentina SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Argentina SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Argentina GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Argentina GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Argentina

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Argentina

Argentina (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Armenia

Land Info offers a variety of digital topographic map data and satellite imagery products of Armenia including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Armenia via 107 Russian military 1:50,000 topographic maps
Full coverage of Armenia via 40 Russian military 1:100,000 topographic maps
Full coverage of Armenia via 11 Russian military 1:200,000 topographic maps
Partial coverage of Armenia via 3 US NGA 1:250,000 JOG topographic maps
Full coverage of Armenia via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Armenia via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kirovokan, Armenia – 2 Russian military 1:10,000 topographic City Plan maps
Kumayri (Gyumri, Leninakan) , Armenia – 1 Russian military 1:10,000 topographic City Plan map
Stepanakert, Armenia – 1 Russian military 1:10,000 topographic City Plan map
Yerevan, Armenia – 1 Russian military 1:25,000 topographic City Plan maps

Off-shelf global data of Armenia—low-cost, rapid delivery:

Armenia VMAP-0 – US NGA 1:1,000,000 vector mapping
Armenia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Armenia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Armenia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Armenia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Armenia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Armenia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Armenia (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Aruba including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Aruba via 4 national 1:25,000 topographic maps
Full coverage of Aruba via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Aruba via 2 US 1:500,000 TPC aeronautical topographic maps
Partial coverage of Aruba via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Aruba—low-cost, rapid delivery:

Aruba VMAP-0 – US NGA 1:1,000,000 vector mapping
Aruba SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Aruba SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Aruba GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Aruba GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Aruba
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Aruba

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Aruba (continued)

Australia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Australia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Australia via 165 national 1:250,000 topographic maps

Partial coverage of Australia via 11 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Adelaide, Australia – 1 Russian military 1:25,000 topographic City Plan map

Canberra, Australia – 1 Russian military 1:25,000 topographic City Plan map

Perth, Australia – 2 Russian military 1:25,000 topographic City Plan maps

Sydney, Australia – 4 Russian military 1:25,000 topographic City Plan maps

Off-shelf global data of Australia—low-cost, rapid delivery:

Australia VMAP-0 – US NGA 1:1,000,000 vector mapping

Australia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Australia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Australia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Australia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Australia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Australia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Australia (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Austria

Land Info offers a variety of digital topographic map data and satellite imagery products of Austria including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Austria via 302 Russian military 1:50,000 topographic maps
Full coverage of Austria via 91 Russian military 1:100,000 topographic maps
Full coverage of Austria via 32 Russian military 1:200,000 topographic maps
Full coverage of Austria via 14 US NGA 1:250,000 JOG topographic maps
Full coverage of Austria via 2 US 1:500,000 TPC aeronautical topographic maps
Partial coverage of Austria via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Baden, Austria – 1 Russian military 1:10,000 topographic City Plan map
Bregenz, Austria – 1 Russian military 1:10,000 topographic City Plan map
Graz, Austria – 2 Russian military 1:10,000 topographic City Plan maps
Innsbruck, Austria – 1 Russian military 1:10,000 topographic City Plan map
Klagenfurt, Austria – 2 Russian military 1:10,000 topographic City Plan maps
Kufstein, Austria – 1 Russian military 1:10,000 topographic City Plan map
Linz, Austria – 1 Russian military 1:10,000 topographic City Plan map
Medling, Austria – 1 Russian military 1:10,000 topographic City Plan map
Salzburg, Austria and Freilassing, Germany – 1 Russian military 1:10,000 topographic City Plan map
Sankt Polten, Austria – 1 Russian military 1:10,000 topographic City Plan map
Steyr, Austria – 1 Russian military 1:10,000 topographic City Plan map
Vienna (Wien), Austria – 6 Russian military 1:10,000 topographic City Plan maps
Wels, Austria – 6 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Austria—low-cost, rapid delivery:

Austria VMAP-0 – US NGA 1:1,000,000 vector mapping
Austria SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Austria SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Austria GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Austria GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Austria
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Austria

Austria (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Azerbaijan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Azerbaijan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Azerbaijan via 306 Russian military 1:50,000 topographic maps
Full coverage of Azerbaijan via 91 Russian military 1:100,000 topographic maps
Full coverage of Azerbaijan via 29 Russian military 1:200,000 topographic maps
Partial coverage of Azerbaijan via 13 US NGA 1:250,000 JOG topographic maps
Full coverage of Azerbaijan via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Azerbaijan via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Apsheronk, Azerbaijan – 1 Russian military 1:10,000 topographic City Plan map
Baku, Azerbaijan – 6 Russian military 1:10,000 topographic City Plan maps
Kirovobad (Ganca), Azerbaijan – 2 Russian military 1:10,000 topographic City Plan maps
Lenkoran, Azerbaijan – 1 Russian military 1:10,000 topographic City Plan map
Mingechaur, Azerbaijan – 1 Russian military 1:10,000 topographic City Plan map
Nakhichevan, Azerbaijan – 1 Russian military 1:10,000 topographic City Plan map
Salyani, Azerbaijan – 1 Russian military 1:10,000 topographic City Plan map
Sumgait, Azerbaijan – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Azerbaijan—low-cost, rapid delivery:

Azerbaijan VMAP-0 – US NGA 1:1,000,000 vector mapping
Azerbaijan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Azerbaijan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Azerbaijan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Azerbaijan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Azerbaijan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Azerbaijan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation,

Azerbaijan (continued)

natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Bahrain

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Bahrain including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Bahrain via 4 Russian military 1:100,000 topographic maps

Full coverage of Bahrain via 2 Russian military 1:200,000 topographic maps

Full coverage of Bahrain via 2 US NGA 1:250,000 JOG topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Manama (Al-Manamah), Muharraq (Al-Muharraq), Bahrain – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Bahrain–low-cost, rapid delivery:

Bahrain VMAP-0 – US NGA 1:1,000,000 vector mapping

Bahrain SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Bahrain SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Bahrain GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Bahrain GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bahrain

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bahrain

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Bahrain (continued)

Bangladesh

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Bangladesh including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

- Full coverage of Bangladesh via 269 national 1:50,000 topographic maps
- Full coverage of Bangladesh via 36 Russian military 1:200,000 topographic maps
- Full coverage of Bangladesh via 28 national 1:250,000 topographic maps
- Partial coverage of Bangladesh via 12 US NGA 1:250,000 topographic maps
- Partial coverage of Bangladesh via 1,566 national 1:10,000 topographic maps
- Full coverage of Bangladesh via 4 US 1:500,000 TPC aeronautical topographic maps
- Full coverage of Bangladesh via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

- Chittagong, Bangladesh – 1 Russian military 1:25,000 topographic City Plan map
- Dhakka (Dacca), Bangladesh – 4 Russian military 1:10,000 topographic City Plan maps
- Khulna, Bangladesh – 1 Russian military 1:10,000 topographic City Plan map
- Dhaka, Bangladesh - 96 national 1:5,000 topographic maps

Off-shelf global data of Bangladesh—low-cost, rapid delivery:

- Bangladesh VMAP-0 – US NGA 1:1,000,000 vector mapping
- Bangladesh SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
- Bangladesh SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
- Bangladesh GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
- Bangladesh GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

- High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bangladesh
- Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bangladesh

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Bangladesh (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Barbados

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Barbados including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Barbados via 1 national 1:50,000 topographic map
Full coverage of Barbados via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Barbados via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Barbados via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Barbados—low-cost, rapid delivery:

Barbados VMAP-0 – US NGA 1:1,000,000 vector mapping
Barbados SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Barbados SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Barbados GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Barbados GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Barbados
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Barbados

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Barbuda

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Barbuda including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Barbuda via 9 national 1:25,000 topographic maps
Full coverage of Barbuda via 2 national 1:50,000 topographic maps
Full coverage of Barbuda via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Barbuda via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Barbuda via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Barbuda—low-cost, rapid delivery:

Barbuda VMAP-0 – US NGA 1:1,000,000 vector mapping
Barbuda SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Belarus

Land Info offers a variety of digital topographic map data and satellite imagery products of Belarus including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Belarus via 699 Russian military 1:50,000 topographic maps

Full coverage of Belarus via 184 Russian military 1:100,000 topographic maps

Full coverage of Belarus via 51 Russian military 1:200,000 topographic maps

96% coverage Belarus of via 24 US NGA 1:250,000 JOG topographic maps

Full coverage of Belarus via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Baranovichi, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Beloozersk, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Bobruysk, Belarus – 4 Russian military 1:10,000 topographic City Plan maps

Borisov (Barysau) , Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Brest (Minsk) , Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Gomel (Homjel') , Belarus – 6 Russian military 1:10,000 topographic City Plan maps

Grodno, Belarus – 6 Russian military 1:10,000 topographic City Plan maps

Kalinkivichi, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Korbin, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Lepel, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Lida, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Luninets, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Minsk, Belarus – 6 Russian military 1:10,000 topographic City Plan maps

Mogilev, Belarus – 4 Russian military 1:10,000 topographic City Plan maps

Mosty, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Mozyr, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Novogrudok, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Novolukoml, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Novopolotsk, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Orsha, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Osipovich, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Pinsk, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Polotsk, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Postavy, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Pruzhany, Belarus – 1 Russian military 1:10,000 topographic City Plan map

Rechitsa, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Slonim, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Slutsk, Belarus – 4 Russian military 1:10,000 topographic City Plan maps

Belarus (continued)

Soligorsk, Belarus – 4 Russian military 1:10,000 topographic City Plan maps
Vitebsk, Belarus – 4 Russian military 1:10,000 topographic City Plan maps
Volkovysk, Belarus – 2 Russian military 1:10,000 topographic City Plan maps
Zhlobin, Belarus – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Belarus–low-cost, rapid delivery:

Belarus VMAP-0 – US NGA 1:1,000,000 vector mapping
Belarus SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Belarus SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Belarus GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Belarus GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Belarus
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Belarus

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Belgium

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Belgium including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Belgium via 127 Russian military 1:50,000 topographic maps

Full coverage of Belgium via 37 Russian military 1:100,000 topographic maps

Full coverage of Belgium via 14 Russian military 1:200,000 topographic maps

Partial coverage of Belgium via 1 US 1:500,000 TPC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Brussels (Bruxelles), Belgium – 1 Russian military 1:25,000 topographic City Plan map

Brussels (Bruxelles), Belgium – 4 Russian military 1:10,000 topographic City Plan maps

Charleroi, Belgium – 2 Russian military 1:10,000 topographic City Plan maps

Gent, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Leuven, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Liege, Belgium – 4 Russian military 1:10,000 topographic City Plan maps

Mons, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Mouscron, Belgium – 2 Russian military 1:10,000 topographic City Plan maps

Namur, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Oostende, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Tournai, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Verviers, Belgium – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Belgium—low-cost, rapid delivery:

Belgium VMAP-0 – US NGA 1:1,000,000 vector mapping

Belgium SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Belgium SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Belgium GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Belgium GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Belgium

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Belgium

Belgium (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Belize

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Belize including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Belize via 44 national 1:50,000 topographic maps

Full coverage of Belize via 6 US 1:250,000 topographic maps

Partial coverage of Belize via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage Belize of via 6 US NGA 1:250,000 JOG topographic maps

Partial coverage of Belize via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Belize—low-cost, rapid delivery:

Belize VMAP-0 – US NGA 1:1,000,000 vector mapping

Belize SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Belize SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Belize GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Belize GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, Digital-Globe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Belize

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Belize

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Benin

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Benin including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Benin via 27 Russian military 1:200,000 topographic maps

93% coverage of Benin via 13 US 1:250,000 topographic maps

Full coverage of Benin via 4 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Benin via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Benin—low-cost, rapid delivery:

Benin VMAP-0 – US NGA 1:1,000,000 vector mapping

Benin SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Benin SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Benin GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Benin GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Benin

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Benin

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Benin (continued)

Bermuda

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Bermuda including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Bermuda via 1 national 1:31,600 topographic map
Full coverage Bermuda of via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Bermuda via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Bermuda via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Hamilton, Saint George, Bermuda – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Bermuda—low-cost, rapid delivery:

Bermuda VMAP-0 – US NGA 1:1,000,000 vector mapping
Bermuda SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Bermuda SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Bermuda GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Bermuda GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bermuda
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bermuda

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Bermuda (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Bhutan

Land Info offers a variety of digital topographic map data and satellite imagery products of Bhutan including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Bhutan via 35 Russian military 1:100,000 topographic maps
Full coverage of Bhutan via 13 Russian military 1:200,000 topographic maps
Partial coverage Bhutan of via 2 US NGA 1:250,000 JOG topographic maps
Full coverage of Bhutan via 3 1:500,000 US TPC aeronautical topographic maps
Full coverage of Bhutan via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Bhutan—low-cost, rapid delivery:

Bhutan VMAP-0 – US NGA 1:1,000,000 vector mapping
Bhutan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Bhutan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Bhutan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Bhutan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bhutan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bhutan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Bhutan (continued)

Bolivia

Land Info offers a variety of digital topographic map data and satellite imagery products of Bolivia including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Bolivia via 1,791 national 1:50,000 topographic maps
67% coverage of Bolivia via 283 US NGA 1:100,000 TLM topographic maps
(The combination of the above two scales comprises complete country coverage)
Full coverage of Bolivia via 60 US NGA 1:250,000 JOG topographic maps
Full coverage of Bolivia via 11 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Bolivia via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Cochabamba, Bolivia – 1 US NGA 1:15,000 topographic City Graphic map
La Paz, Bolivia – 3 of 4 US NGA 1:15,000 topographic City Graphic maps
La Paz, Bolivia – 1 Russian military 1:10,000 topographic City Plan map
Santa Cruz, Bolivia – 1 US NGA 1:20,000 topographic City Graphic map

Off-shelf global data of Bolivia—low-cost, rapid delivery:

Bolivia VMAP-0 – US NGA 1:1,000,000 vector mapping
Bolivia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Bolivia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Bolivia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Bolivia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bolivia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bolivia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Bolivia (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Bosnia & Herzegovina

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Bosnia & Herzegovina including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Bosnia & Herzegovina via 181 Russian military 1:50,000 topographic maps
Full coverage of Bosnia & Herzegovina via 102 US NGA 1:50,000 TLM topographic maps
Full coverage of Bosnia & Herzegovina via 55 Russian military 1:100,000 topographic maps
Full coverage of Bosnia & Herzegovina via 18 Russian military 1:200,000 topographic maps
Full coverage of Bosnia & Herzegovina via 10 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Bosnia & Herzegovina via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Bosnia & Herzegovina via 4 Russian military 1:500,000 topographic maps
Full coverage of Bosnia & Herzegovina via 2 US NGA 1:1,000,000 ONC topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Banja Luka, Bosnia & Herzegovina – 1 US NGA 1:15,000 topographic City Graphic map
Bijeljina, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Bileca, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Brcko, Bosnia & Herzegovina – 1 US NGA 1:15,000 topographic City Graphic map
Cerska, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Foca, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Gorazde, Bosnia & Herzegovina – 1 US NGA 1:15,000 topographic City Graphic map
Han-Pijesak, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Konjic, Bosnia & Herzegovina – 1 US NGA 1:15,000 topographic City Graphic map
Orasje, Bosnia & Herzegovina – 1 US NGA 1:5,000 topographic City Graphic map
Pale, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Rogatica, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Sarajevo, Bosnia & Herzegovina – 2 US NGA 1:12,500 topographic City Graphic map
Sarajevo, Bosnia & Herzegovina – 1 Russian military 1:10,000 topographic City Plan map
Sokolac, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Srebrenica, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map
Trebinje, Bosnia & Herzegovina – 1 US NGA 1:15,000 topographic City Graphic map
Vlasenica, Bosnia & Herzegovina – 1 US NGA 1:10,000 topographic City Graphic map

Off-shelf global data of Bosnia & Herzegovina—low-cost, rapid delivery:

Bosnia & Herzegovina VMAP-0 – US NGA 1:1,000,000 vector mapping
Bosnia & Herzegovina SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Bosnia & Herzegovina SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Bosnia & Herzegovina (continued)

Bosnia & Herzegovina GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Bosnia & Herzegovina GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bosnia & Herzegovina

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bosnia & Herzegovina

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

British Indian Ocean Territory

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of British Indian Ocean Territory including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of British Indian Ocean Territory via 5 Russian military 1:200,000 topographic maps
Full coverage of British Indian Ocean Territory via 2 US NGA 1:250,000 JOG topographic maps
Full coverage of British Indian Ocean Territory via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of British Indian Ocean Territory via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of British Indian Ocean Territory—low-cost, rapid delivery:

British Indian Ocean Territory VMAP-0 – US NGA 1:1,000,000 vector mapping
British Indian Ocean Territory SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
British Indian Ocean Territory SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
British Indian Ocean Territory GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
British Indian Ocean Territory GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of British Indian Ocean Territory
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of British Indian Ocean Territory

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

British Indian Ocean Territory (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

British Virgin Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of British Virgin Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of British Virgin Islands via 6 national 1:25,000 topographic maps
Full coverage of British Virgin Islands via 2 Russian military 1:200,000 topographic maps
Full coverage of British Virgin Islands via 2 US NGA 1:250,000 JOG topographic maps
Full coverage of British Virgin Islands via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of British Virgin Islands via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of British Virgin Islands—low-cost, rapid delivery:

British Virgin Islands VMAP-0 – US NGA 1:1,000,000 vector mapping
British Virgin Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
British Virgin Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
British Virgin Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
British Virgin Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of British Virgin Islands
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of British Virgin Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

British Virgin Islands (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Brunei

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Brunei including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Brunei via 19 national 1:50,000 topographic maps

Off-shelf global data of Brunei—low-cost, rapid delivery:

Brunei VMAP-0 – US NGA 1:1,000,000 vector mapping

Brunei SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Brunei SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Brunei GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Brunei GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Brunei

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Brunei

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Bulgaria

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Bulgaria including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Bulgaria via 361 Russian military 1:50,000 topographic maps
Full coverage of Bulgaria via 109 Russian military 1:100,000 topographic maps
Full coverage of Bulgaria via 36 Russian military 1:200,000 topographic maps
92% coverage of Bulgaria via 11 US NGA 1:250,000 JOG topographic maps
Full coverage of Bulgaria via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Blagoevgrad, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Burgas, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Gabrovo, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Khaskovo, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Kurdzhali, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Lovech, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Nikopol, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Petrich, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Plovdiv, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Ruse, Bulgaria – 2 Russian military 1:10,000 topographic City Plan maps
Shumen, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Silistra, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Sliven, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Sofia, Bulgaria – 4 Russian military 1:10,000 topographic City Plan maps
Stara Zagora, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Svilengrad, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Svishtov, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Turnovo, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Tutrakan, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Veliko Turnovo, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Vidin, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Vratsa, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Yambol, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map
Blagoevgrad, Bulgaria – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Bulgaria—low-cost, rapid delivery:

Bulgaria VMAP-0 – US NGA 1:1,000,000 vector mapping

Bulgaria (continued)

Bulgaria SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Bulgaria SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Bulgaria GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Bulgaria GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Bulgaria

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Bulgaria

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Burkina Faso

Land Info offers a variety of digital topographic map data and satellite imagery products of Burkina Faso including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Burkina Faso via 54 Russian military 1:200,000 topographic maps

96% coverage of Burkina Faso via 27 US NGA 1:250,000 JOG topographic maps

Full coverage of Burkina Faso via 5 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Burkina Faso via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ouagadougou - 1:10,000 scale national topographic city plan map

Ouagadougou, Burkina Faso – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Burkina Faso—low-cost, rapid delivery:

Burkina Faso VMAP-0 – US NGA 1:1,000,000 vector mapping

Burkina Faso SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Burkina Faso SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Burkina Faso GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Burkina Faso GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Burkina Faso

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Burkina Faso

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Burkina Faso (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Burma (Myanmar)

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Burma (Myanmar) including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Burma (Myanmar) via 317 Russian military 1:100,000 topographic maps

Full coverage of Burma (Myanmar) via 128 Russian military 1:200,000 topographic maps

88% coverage of Burma (Myanmar) via 60 US NGA 1:250,000 JOG topographic maps

Full coverage of Burma (Myanmar) via 10 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Burma (Myanmar) via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Mandalay, Burma (Myanmar) – 2 Russian military 1:10,000 topographic City Plan maps

Moulmein, Burma (Myanmar) – 1 Russian military 1:10,000 topographic City Plan map

Yangon (Rangoon), Burma (Myanmar) – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Burma (Myanmar)–low-cost, rapid delivery:

Burma (Myanmar) VMAP-0 – US NGA 1:1,000,000 vector mapping

Burma (Myanmar) SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Burma (Myanmar) SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Burma (Myanmar) GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Burma (Myanmar) GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Burma (Myanmar)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Burma (Myanmar)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Burma (Myanmar) (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Burundi

Land Info offers a variety of digital topographic map data and satellite imagery products of Burundi including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Burundi via 42 US NGA 1:50,000 TLM topographic maps

Full coverage of Burundi via 6 US NGA 1:250,000 JOG topographic maps

Full coverage of Burundi via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bujumbura, Burundi – 1 US military 1:12,500 topographic City Graphic map

Bujumbura, Burundi – 1 US NGA 1:12,500 topographic City Graphic map

Off-shelf global data of Burundi—low-cost, rapid delivery:

Burundi VMAP-0 – US NGA 1:1,000,000 vector mapping

Burundi SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Burundi SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Burundi GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Burundi GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Burundi

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Burundi

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Burundi (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Cambodia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cambodia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cambodia via 297 US NGA 1:50,000 TLM topographic maps
Full coverage of Cambodia via 127 Russian military 1:100,000 topographic maps
Full coverage of Cambodia via 38 Russian military 1:200,000 topographic maps
Full coverage of Cambodia via 19 US NGA 1:250,000 JOG topographic maps
Full coverage of Cambodia via 4 US 1:500,000 TPC aeronautical topographic maps
Partial coverage of Cambodia via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Phnom Penh, Cambodia – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Cambodia—low-cost, rapid delivery:

Cambodia VMAP-0 – US NGA 1:1,000,000 vector mapping
Cambodia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Cambodia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Cambodia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Cambodia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cambodia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cambodia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Cambodia (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Cameroon

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cameroon including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cameroon via 78 Russian military 1:200,000 topographic maps

Full coverage of Cameroon via 45 US NGA 1:250,000 JOG topographic maps

Partial coverage of Cameroon via 5 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Cameroon via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bamenda - 1:10,000 scale national topographic city plan map, publ. 2006

Douala - 1:10,000 scale national topographic city plan map, publ. 2000/2002

Ebolowa - 1:10,000 scale national topographic city plan map, publ. 1990

Maroua - 1:10,000 scale national topographic city plan map, publ. 1987

Yaounde - 1:10,000 scale national topographic city plan map, publ. 2008

Off-shelf global data of Cameroon—low-cost, rapid delivery:

Cameroon VMAP-0 – US NGA 1:1,000,000 vector mapping

Cameroon SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Cameroon SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Cameroon GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Cameroon GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cameroon

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cameroon

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Cameroon (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Canada

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Canada including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Canada via 13,150 national 1:50,000 topographic maps
Full coverage of Canada via 1,493 Russian military 1:200,000 topographic maps
Full coverage of Canada via 980 national 1:250,000 topographic maps
Partial coverage of Canada via 14 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Canada via 45 national 1:1,000,000 topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Calgary, Canada – 1 Russian military 1:25,000 topographic City Plan map
Edmonton, Canada – 1 Russian military 1:25,000 topographic City Plan map
Halifax, Dartmouth, Canada – 1 Russian military 1:25,000 topographic City Plan map
Hamilton, Canada – 1 Russian military 1:25,000 topographic City Plan map
Happy Valley-Goose Bay, Canada – 1 Russian military 1:25,000 topographic City Plan map
London, Canada – 1 Russian military 1:25,000 topographic City Plan map
Montreal, Canada – 2 Russian military 1:25,000 topographic City Plan maps
Ottawa, Canada – 2 Russian military 1:25,000 topographic City Plan maps
Quebec, Canada – 1 Russian military 1:25,000 topographic City Plan map
Regina, Canada – 4 Russian military 1:10,000 topographic City Plan maps
Saint John, Canada – 1 Russian military 1:25,000 topographic City Plan map
Saint John's, Canada – 1 Russian military 1:25,000 topographic City Plan map
Saskatoon, Canada – 1 Russian military 1:25,000 topographic City Plan map
Three Rivers (Trois-Rivieres), Cap-de-la-Madeleine, Canada – 2 Russian military 1:10,000 topographic City Plan maps
Toronto, Canada – 2 Russian military 1:25,000 topographic City Plan maps
Vancouver, Canada – 2 Russian military 1:25,000 topographic City Plan maps
Victoria, Canada – 4 Russian military 1:25,000 topographic City Plan maps
Winnipeg, Canada – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Canada—low-cost, rapid delivery:

Canada VMAP-0 – US NGA 1:1,000,000 vector mapping
Canada SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Canada SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Canada GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Canada GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Canada (continued)

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Canada

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Canada

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Cayman Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cayman Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cayman Islands via 4 national 1:25,000 topographic maps
Full coverage of Cayman Islands via 1 national 1:50,000 topographic map
Full coverage of Cayman Islands via 2 US 1:250,000 JOG topographic maps
Full coverage of Cayman Islands via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Cayman via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Cayman Islands—low-cost, rapid delivery:

Cayman Islands VMAP-0 – US NGA 1:1,000,000 vector mapping
Cayman Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Cayman Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Cayman Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Cayman Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cayman Islands
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cayman Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Cayman Islands (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Central African Republic

Land Info offers a variety of digital topographic map data and satellite imagery products of Central African Republic including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Central African Republic via 106 Russian military 1:200,000 topographic maps

75% coverage of Central African Republic via 40 US NGA 1:250,000 JOG topographic maps

Partial coverage of Central African Republic via 4 1:500,000 US TPC aeronautical topographic maps

Full coverage of Central African Republic via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bangui , Central African Republic – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Central African Republic—low-cost, rapid delivery:

Central African Republic VMAP-0 – US NGA 1:1,000,000 vector mapping

Central African Republic SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Central African Republic SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Central African Republic GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Central African Republic GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Central African Republic

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Central African Republic

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Central African Republic (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Chad

Land Info offers a variety of digital topographic map data and satellite imagery products of Chad including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Chad via 195 Russian military 1:200,000 topographic maps
60% coverage of Chad via 52 US NGA 1:250,000 JOG topographic maps
Full coverage of Chad via 10 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Chad via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

N'Djamena, Chad – 2 Russian military 1:10,000 topographic City Plan maps
N'djamena - 1:10,000 scale national topographic City Plan, 2 maps

Off-shelf global data of Chad—low-cost, rapid delivery:

Chad VMAP-0 – US NGA 1:1,000,000 vector mapping
Chad SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Chad SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Chad GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Chad GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Chad
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Chad

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Chad (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Chile

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Chile including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Chile via 1,243 national 1:50,000 topographic maps
Near-full coverage of Chile via 143 Russian military 1:200,000 topographic maps
Near-full coverage of Chile via 66 national 1:250,000 topographic maps
Partial coverage of Chile via 21 US NGA 1:250,000 JOG topographic maps
Partial coverage of Chile via 7 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Chile via 8 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Antofagasta, Chile – 1 Russian military 1:25,000 topographic City Plan map
Concepcion, Talcahuano, Chile – 1 Russian military 1:25,000 topographic City Plan map
Santiago, Chile – 2 Russian military 1:25,000 topographic City Plan maps
Valparaiso, Vina del Mar, Chile – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Chile—low-cost, rapid delivery:

Chile VMAP-0 – US NGA 1:1,000,000 vector mapping
Chile SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Chile SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Chile GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Chile GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Chile
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Chile

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Chile (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

China

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of China including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of China via 5,240 Russian military 1:100,000 topographic maps
Full coverage of China via 1,600 Russian military 1:200,000 topographic maps
Partial (ca. 40%) coverage of China via 297 US NGA 1:250,000 topographic maps
Near-full coverage of China via 55 US 1:500,000 TPC aeronautical topographic maps
Full coverage of China via 20 US 1:1,000,000 ONC aeronautical topographic maps
Full coverage of China via 8 US 1:2,000,000 JNC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Russian military 1:10,000 and 1:25,000 topographic City Plan maps of the following cities:

Acheng, China – 1 Russian military 1:10,000 topographic City Plan map
Aksu, China – 1 Russian military 1:10,000 topographic City Plan map
Altay (Altai), China – 1 Russian military 1:10,000 topographic City Plan map
Anda, China – 1 Russian military 1:10,000 topographic City Plan map
Ang'angxi (Anantsi), China – 2 Russian military 1:10,000 topographic City Plan maps
Anqing (Anching), China – 1 Russian military 1:10,000 topographic City Plan map
Anshan, China – 1 Russian military 1:25,000 topographic City Plan map
Anshan, China – 4 Russian military 1:10,000 topographic City Plan maps
Anxi, China – 1 Russian military 1:10,000 topographic City Plan map
Anyang, China – 1 Russian military 1:10,000 topographic City Plan map
Aomen (Macau) (PORT), China – 1 Russian military 1:10,000 topographic City Plan map
Baicheng, China – 1 Russian military 1:10,000 topographic City Plan map
Baoding, China – 2 Russian military 1:10,000 topographic City Plan maps
Baoding, China – 2 Russian military 1:10,000 topographic City Plan maps
Baoji, China – 2 Russian military 1:10,000 topographic City Plan maps
Baoqing, China – 1 Russian military 1:10,000 topographic City Plan map
Baotou, China – 2 Russian military 1:25,000 topographic City Plan maps
Baotou (Paotou), China – 2 Russian military 1:10,000 topographic City Plan maps
Bayan-Gol, China – 1 Russian military 1:10,000 topographic City Plan map
Bei'an, China – 1 Russian military 1:10,000 topographic City Plan map
Beijing (Peking), China – 2 Russian military 1:25,000 topographic City Plan maps
Bengbu, China – 1 Russian military 1:10,000 topographic City Plan map
Benxi (Penhsi), China – 1 Russian military 1:25,000 topographic City Plan map
Boli, China – 1 Russian military 1:10,000 topographic City Plan map

China (continued)

Butha Qi (Zhalantun), China – 1 Russian military 1:10,000 topographic City Plan map
Cangzhou, China – 1 Russian military 1:10,000 topographic City Plan map
Changchun, China – 1 Russian military 1:10,000 topographic City Plan map
Changde, China – 1 Russian military 1:10,000 topographic City Plan map
Changsha, China – 4 Russian military 1:10,000 topographic City Plan maps
Changshu, China – 1 Russian military 1:10,000 topographic City Plan map
Changzhi, China – 2 Russian military 1:10,000 topographic City Plan maps
Changzhou, China – 1 Russian military 1:10,000 topographic City Plan map
Chao'an, China – 1 Russian military 1:10,000 topographic City Plan map
Chengde (Chengtah), China – 1 Russian military 1:10,000 topographic City Plan map
Chengdu (Chengtu), China – 4 Russian military 1:10,000 topographic City Plan maps
Chifeng, China – 1 Russian military 1:10,000 topographic City Plan map
Chifeng (Ulanhod), China – 1 Russian military 1:10,000 topographic City Plan map
Chongqing (Chungking), China – 1 Russian military 1:25,000 topographic City Plan map
Dali, China – 1 Russian military 1:10,000 topographic City Plan map
Dalian (Dairen), China – 4 Russian military 1:10,000 topographic City Plan maps
Dandong, Sinuiju (North Korea), China – 4 Russian military 1:10,000 topographic City Plan maps
Daq, China – 2 Russian military 1:10,000 topographic City Plan maps
Dashiqiao, China – 1 Russian military 1:10,000 topographic City Plan map
Datong (Tatung), China – 2 Russian military 1:10,000 topographic City Plan maps
Dengkou, China – 1 Russian military 1:10,000 topographic City Plan map
Dongning, China – 1 Russian military 1:10,000 topographic City Plan map
Dunhua, China – 1 Russian military 1:10,000 topographic City Plan map
Duolun, China – 1 Russian military 1:10,000 topographic City Plan map
Dushanzi, China – 1 Russian military 1:10,000 topographic City Plan map
Emin, China – 1 Russian military 1:10,000 topographic City Plan map
Erenhot, China – 1 Russian military 1:10,000 topographic City Plan map
Fengfeng, Pengcheng, Linshui, China – 1 Russian military 1:10,000 topographic City Plan map
Foshan, China – 1 Russian military 1:10,000 topographic City Plan map
Fujin, China – 2 Russian military 1:10,000 topographic City Plan maps
Fukang, China – 1 Russian military 1:10,000 topographic City Plan map
Fushun, China – 3 Russian military 1:10,000 topographic City Plan maps
Fusin, China – 1 Russian military 1:10,000 topographic City Plan map
Fuxin (Fusin), China – 1 Russian military 1:25,000 topographic City Plan map
Fuyu, Qian Gorlos, China – 1 Russian military 1:25,000 topographic City Plan map
Fuzhou (Fochow), China – 1 Russian military 1:10,000 topographic City Plan map
Ganzhou (Kanchow), China – 1 Russian military 1:25,000 topographic City Plan map
Gongchangling, China – 1 Russian military 1:10,000 topographic City Plan map
Guangzhou (Kwangchow), China – 2 Russian military 1:10,000 topographic City Plan maps
Guilin (Kweilin), China – 3 Russian military 1:10,000 topographic City Plan map
Guiyang (Kweiyang), China – 2 Russian military 1:10,000 topographic City Plan maps
Haicheng, China – 1 Russian military 1:10,000 topographic City Plan map
Haikou (Hoihow), Qiungshan, China – 1 Russian military 1:10,000 topographic City Plan map
Hailar, China – 2 Russian military 1:10,000 topographic City Plan maps
Hailun, China – 1 Russian military 1:10,000 topographic City Plan map
Hami, China – 1 Russian military 1:25,000 topographic City Plan map

China (continued)

Handan (Hantan), China – 1 Russian military 1:10,000 topographic City Plan map
Hangzhou (Hangchow), China – 4 Russian military 1:10,000 topographic City Plan maps
Harbin, China – 1 Russian military 4:10,000 topographic City Plan maps
Hefei (Hofei), China – 1 Russian military 4:10,000 topographic City Plan maps
Hegang, China – 1 Russian military 4:10,000 topographic City Plan maps
Heli, China – 1 Russian military 1:10,000 topographic City Plan map
Hengyang, China – 1 Russian military 1:10,000 topographic City Plan map
Hohhot (Huhehot), China – 2 Russian military 1:10,000 topographic City Plan maps
Horqin Youyi Qianqi (Ulan Hot), China – 1 Russian military 1:10,000 topographic City Plan map
Hotan, China – 1 Russian military 1:10,000 topographic City Plan map

China (continued)

Zhenjiang, China – 1 Russian military 1:10,000 topographic City Plan map
Zhuzhou (Chuchow), China – 2 Russian military 1:10,000 topographic City Plan maps
Zibo (Zhangdian), China – 1 Russian military 1:10,000 topographic City Plan map
Zigong, China – 1 Russian military 1:10,000 topographic City Plan map
Zunyi, China – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of China –low-cost, rapid delivery:

China VMAP-0 – US NGA 1:1,000,000 vector mapping
China SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
China SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
China GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
China GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of China
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of China

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Christmas Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Christmas Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Off-shelf global data of Christmas Island –low-cost, rapid delivery:

Christmas Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Colombia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Colombia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Colombia via 2,304 national 1:50,000 topographic maps

Partial coverage of Colombia via 569 national 1:100,000 topographic maps

88% coverage of Colombia via 79 US NGA 1:250,000 JOG topographic maps

Near-full coverage of Colombia via 12 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Colombia via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Barranquilla, Colombia – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Colombia—low-cost, rapid delivery:

Colombia VMAP-0 – US NGA 1:1,000,000 vector mapping

Colombia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Colombia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Colombia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Colombia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Colombia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Colombia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Colombia (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Comoros Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Comoros Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Comoros Islands via 3 French 1:50,000 topographic maps (Anjouan, Grande Comore, Moheli)
Full coverage of Comoros Islands via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Comoros Islands via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Comoros Islands—low-cost, rapid delivery:

Comoros Islands VMAP-0 – US NGA 1:1,000,000 vector mapping
Comoros Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Comoros Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Comoros Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Comoros Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Comoros Islands
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Comoros Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Congo, Republic of the

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Congo including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Congo via 8 Russian military 1:200,000 topographic maps

94% coverage of Congo via 34 US NGA 1:250,000 JOG topographic maps

Partial coverage of Congo via 2 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Congo via 3 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Congo—low-cost, rapid delivery:

Congo VMAP-0 – US NGA 1:1,000,000 vector mapping

Congo SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Congo SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Congo GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Congo GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Congo

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Congo

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Congo, Dem. Rep. (Zaire)

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Congo, Dem. Rep. (Zaire) including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Congo, Dem. Rep. via 65 Russian military 1:200,000 topographic maps

83% coverage of Congo, Dem. Rep. via 138 US NGA 1:250,000 JOG topographic maps

Partial coverage of Congo, Dem. Rep. via 7 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Congo, Dem. Rep. via 8 US 1:1,000,000 ONC aeronautical topographic maps

Note: 138 250k + 36 200k + 8 500k maps comprise complete country coverage.

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kinshasa – 1 national 1:20,000 topographic map

Kinshasa – 2 Russian military 1:25,000 topographic City Plan maps

Lubumbashi – 1 Russian military 1:25,000 topographic City Plan map

Lubumbashi – 6 US military 1:10,000 – 1:12,500 topographic City Graphic maps

Lubumbashi - 1:25,000 scale national topographic City Plan map

Bukavu – 1 US military 1:12,500 topographic City Graphic map

Goma – 1 US military 1:12,500 topographic City Graphic map

Kalemie – 1 US military 1:12,500 topographic City Graphic map

Kisangani – 1 US military 1:12,500 topographic City Graphic map

Likasi – 1 US military 1:12,500 topographic City Graphic map

Luluab – 1 US military 1:12,500 topographic City Graphic map

Matadi – 1 US military 1:12,500 topographic City Graphic map

Off-shelf global data of Congo, Dem. Rep. (Zaire)–low-cost, rapid delivery:

Congo, Dem. Rep. (Zaire) VMAP-0 – US NGA 1:1,000,000 vector mapping

Congo, Dem. Rep. (Zaire) SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Congo, Dem. Rep. (Zaire) SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Congo, Dem. Rep. (Zaire) GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Congo, Dem. Rep. (Zaire) GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Congo, Dem. Rep. (Zaire)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Congo, Dem. Rep. (Zaire)

Congo, Dem. Rep. (Zaire) (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Cook Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cook Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cook Islands via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Cook Islands—low-cost, rapid delivery:

Cook Islands VMAP-0 – US NGA 1:1,000,000 vector mapping

Cook Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Cook Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Cook Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Cook Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cook Islands

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cook Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Costa Rica

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Costa Rica including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Costa Rica via 79 national 1:10,000 topographic maps
Full coverage of Costa Rica via 133 national 1:50,000 topographic maps
Full coverage of Costa Rica via 9 national 1:200,000 topographic maps
Full coverage of Costa Rica via 8 US NGA 1:250,000 JOG topographic maps
Full coverage of Costa Rica via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Costa Rica via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

San Jose, Costa Rica – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Costa Rica—low-cost, rapid delivery:

Costa Rica VMAP-0 – US NGA 1:1,000,000 vector mapping
Costa Rica SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Costa Rica SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Costa Rica GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Costa Rica GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Costa Rica
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Costa Rica

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Costa Rica (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Cote d' Ivoire

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cote d' Ivoire including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cote d' Ivoire via 60 Russian military 1:200,000 topographic maps
Full coverage of Cote d' Ivoire via 33 national 1:200,000 topographic maps
Full coverage of Cote d' Ivoire via 29 US NGA 1:250,000 JOG topographic maps
65% coverage of Cote d' Ivoire via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Cote d' Ivoire via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bouake (Bwake) – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Cote d' Ivoire—low-cost, rapid delivery:

Cote d' Ivoire VMAP-0 – US NGA 1:1,000,000 vector mapping
Cote d' Ivoire SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Cote d' Ivoire SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Cote d' Ivoire GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Cote d' Ivoire GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cote d' Ivoire
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cote d' Ivoire

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Cote d' Ivoire (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Croatia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Croatia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Croatia via 241 Russian military 1:50,000 topographic maps
Full coverage of Croatia via 80 Russian military 1:100,000 topographic maps
Full coverage of Croatia via 30 Russian military 1:200,000 topographic maps
93% coverage of Croatia via 13 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Croatia via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Croatia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Dubrovnik, Croatia – 1 US NGA 1: 12,500 topographic City Graphic map
Osijek, Croatia – 1 US NGA 1: 20,000 topographic City Graphic map
Rijeka, Croatia – 1 Russian military 1:10,000 topographic City Plan map
Rijeka, Croatia – 1 US NGA 1: 12,500 topographic City Graphic map
Slavonski Brod, Croatia – 1 US NGA 1: 12,500 topographic City Graphic map
Split, Croatia – 1 US NGA 1: 12,500 topographic City Graphic map
Split, Croatia – 1 Russian military 1:10,000 topographic City Plan map
Zagreb, Croatia – 1 US NGA 1: 25,000 topographic City Graphic map
Zagreb, Croatia – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Croatia—low-cost, rapid delivery:

Croatia VMAP-0 – US NGA 1:1,000,000 vector mapping
Croatia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Croatia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Croatia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Croatia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Croatia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Croatia

Croatia (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cuba including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cuba via 122 Russian military 1:100,000 topographic maps

Full coverage of Cuba via 35 Russian military 1:200,000 topographic maps

Full coverage of Cuba via 16 US NGA 1:250,000 JOG topographic maps

Full coverage of Cuba via 3 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Cuba via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Cuba—low-cost, rapid delivery:

Cuba VMAP-0 – US NGA 1:1,000,000 vector mapping

Cuba SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Cuba SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Cuba GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Cuba GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cuba

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cuba

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Cuba (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Cyprus

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Cyprus including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Cyprus via 43 Russian military 1:50,000 topographic maps
Full coverage of Cyprus via 4 national 1:100,000 topographic maps
Full coverage of Cyprus via 8 Russian military 1:200,000 topographic maps
Full coverage of Cyprus via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Cyprus via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Famagusta, Cyprus – 1 Russian military 1:10,000 topographic City Plan map
Limassol (Lemesos), Cyprus – 1 Russian military 1:25,000 topographic City Plan map
Famagusta, Cyprus – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Cyprus—low-cost, rapid delivery:

Cyprus VMAP-0 – US NGA 1:1,000,000 vector mapping
Cyprus SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Cyprus SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Cyprus GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Cyprus GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Cyprus
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Cyprus

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Cyprus (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Czech Republic

Land Info offers a variety of digital topographic map data and satellite imagery products of Czech Republic including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Czech Republic via 787 national 1:25,000 topographic maps
Full coverage of Czech Republic via 287 Russian military 1:50,000 topographic maps
Full coverage of Czech Republic via 217 national 1:50,000 topographic maps
Full coverage of Czech Republic via 83 Russian military 1:100,000 topographic maps
Full coverage of Czech Republic via 64 national 1:100,000 topographic maps
Full coverage of Czech Republic via 19 national 1:200,000 topographic maps
Full coverage of Czech Republic via 30 Russian military 1:200,000 topographic maps
Full coverage of Czech Republic via 12 US NGA 1:250,000 JOG topographic maps
40% coverage of Czech Republic via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Brno, Czech Republic – 4 Russian military 1:10,000 topographic City Plan maps
Ceske Budejovice, Czech Republic – 4 Russian military 1:10,000 topographic City Plan maps
Chomutov, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Decin, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Frydek-Mistek, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Havirov, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Hradec Kralove, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Jihlava, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Karlovy Vary, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Kladno, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Liberec, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Milowitz & Lysa-nad-Labem, Czech Republic – 2 Russian military 1:10,000 topographic City Plan maps
Mlada Boleslav, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Olomouc, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Opava, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Ostrava, Czech Republic – 4 Russian military 1:10,000 topographic City Plan maps
Pardubice, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Plzn, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Prague (Praha), Czech Republic – 9 Russian military 1:10,000 topographic City Plan maps
Prerov, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Pribram, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Prostejov, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map

Czech Republic (continued)

Tabor, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Teplice, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Uhersky Brod, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Usti nad Labem, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map
Zlin, Czech Republic – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Czech Republic–low-cost, rapid delivery:

Czech Republic VMAP-0 – US NGA 1:1,000,000 vector mapping
Czech Republic SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Czech Republic SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Czech Republic GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Czech Republic GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Czech Republic
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Czech Republic

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Denmark

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Denmark including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Denmark via 240 Russian military 1:50,000 topographic maps
Full coverage of Denmark via 76 Russian military 1:100,000 topographic maps
Full coverage of Denmark via 24 Russian military 1:200,000 topographic maps
Partial coverage of Denmark via 1 US 1:500,000 TPC aeronautical topographic map
50% coverage of Denmark via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Aalborg, Denmark – 2 Russian military 1:10,000 topographic City Plan maps
Aarhus, Denmark – 2 Russian military 1:10,000 topographic City Plan maps
Copenhagen (Kobenhavn), Denmark – 2 Russian military 1:10,000 topographic City Plan maps
Esbjerg, Denmark – 1 Russian military 1:10,000 topographic City Plan map
Frederikshavn, Denmark – 1 Russian military 1:10,000 topographic City Plan map
Odense, Denmark – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Denmark—low-cost, rapid delivery:

Denmark VMAP-0 – US NGA 1:1,000,000 vector mapping
Denmark SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Denmark SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Denmark GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Denmark GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Denmark
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Denmark

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Denmark (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Djibouti including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Djibouti via 22 Russian military 1:100,000 topographic maps
Full coverage of Djibouti via 9 Russian military 1:200,000 topographic maps
30% coverage of Djibouti via 1 US 1:1,250,000 JOG topographic map
Partial coverage of Djibouti via 2 US 1:500,000 TPC aeronautical topographic maps
80% coverage of Djibouti via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Djibouti, Djibouti – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Djibouti—low-cost, rapid delivery:

Djibouti VMAP-0 – US NGA 1:1,000,000 vector mapping
Djibouti SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Djibouti SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Djibouti GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Djibouti GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Djibouti
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Djibouti

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Djibouti (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

East Timor (Timor Leste)

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of East Timor (Timor Leste) including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of East Timor (Timor Leste) via 140 national 1:25,000 topographic maps

Full coverage of East Timor (Timor Leste) via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of East Timor (Timor Leste)–low-cost, rapid delivery:

East Timor (Timor Leste) VMAP-0 – US NGA 1:1,000,000 vector mapping

East Timor (Timor Leste) SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

East Timor (Timor Leste) SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

East Timor (Timor Leste) GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

East Timor (Timor Leste) GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of East Timor (Timor Leste)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of East Timor (Timor Leste)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Ecuador

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Ecuador including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Ecuador via 564 national 1:50,000 topographic maps
Partial coverage of Ecuador via 32 national 1:100,000 topographic maps
95% coverage of Ecuador via 21 US NGA 1:250,000 JOG topographic maps
Full coverage of Ecuador via 5 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Ecuador via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Ecuador—low-cost, rapid delivery:

Ecuador VMAP-0 – US NGA 1:1,000,000 vector mapping
Ecuador SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Ecuador SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Ecuador GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Ecuador GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Ecuador
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Ecuador

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Ecuador (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Egypt

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Egypt including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Egypt via 438 national 1:50,000 topographic maps
Near-full coverage of Egypt via 616 Russian military 1:100,000 topographic maps
Full coverage of Egypt via 175 Russian military 1:200,000 topographic maps
50% coverage of Egypt via 45 US NGA 1:250,000 JOG topographic maps
Partial coverage of Egypt via 4 US 1:500,000 TPC aeronautical topographic maps
50% coverage of Egypt via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Alexandria, Egypt – 6 Russian military 1:10,000 topographic City Plan maps
Aswan, Egypt – 1 Russian military 1:10,000 topographic City Plan map
Beni Suef, Egypt – 1 Russian military 1:10,000 topographic City Plan map
Cairo, Egypt – 4 Russian military 1:10,000 topographic City Plan maps
Cairo, Egypt – 4 Russian military 1:10,000 topographic City Plan maps
Damanhur, Egypt – 1 Russian military 1:10,000 topographic City Plan map
El Faiyum, Egypt – 1 Russian military 1:10,000 topographic City Plan map
El Mahalla el Kubra, Egypt – 1 Russian military 1:10,000 topographic City Plan map
El Mansura, Egypt – 1 Russian military 1:10,000 topographic City Plan map
Ismailia, Egypt – 2 Russian military 1:10,000 topographic City Plan maps
Port Said, Egypt – 1 Russian military 1:10,000 topographic City Plan map
Suez, Egypt – 2 Russian military 1:10,000 topographic City Plan maps
Tanta, Egypt – 1 Russian military 1:10,000 topographic City Plan map
Zagazig, Egypt – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Egypt—low-cost, rapid delivery:

Egypt VMAP-0 – US NGA 1:1,000,000 vector mapping
Egypt SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Egypt SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Egypt GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Egypt GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Egypt

Egypt (continued)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Egypt

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

El Salvador

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of El Salvador including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of El Salvador via 3 national 1:10,000 topographic maps
Full coverage of El Salvador via 55 US NGA 1:50,000 topographic maps
Full coverage of El Salvador via 6 national 1:100,000 topographic maps
Full coverage of El Salvador via 4 US NGA 1:250,000 JOG topographic maps
Full coverage of El Salvador via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of El Salvador via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

La Libertad, El Salvador – 1 US NGA 1: 10,000 topographic City Graphic map
San Salvador, El Salvador – 4 US NGA 1: 15,000 topographic City Graphic maps
San Salvador, El Salvador – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of El Salvador—low-cost, rapid delivery:

El Salvador VMAP-0 – US NGA 1:1,000,000 vector mapping
El Salvador SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
El Salvador SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
El Salvador GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
El Salvador GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of El Salvador
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of El Salvador

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

El Salvador (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Equatorial Guinea

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Equatorial Guinea including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of mainland Equatorial Guinea via 1 national 1:400,000 topographic map
Full coverage of Bioko via 4 national 1:50,000 topographic maps
Full coverage of Annobon via 1 national 1:10,000 topographic map
Full coverage of Equatorial Guinea via 6 US NGA 1:250,000 JOG topographic maps
Partial coverage of Equatorial Guinea via 2 US NGA 1:250,000 JOG topographic maps
Full coverage of Equatorial Guinea via 1 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Equatorial Guinea—low-cost, rapid delivery:

Equatorial Guinea VMAP-0 – US NGA 1:1,000,000 vector mapping
Equatorial Guinea SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Equatorial Guinea SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Equatorial Guinea GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Equatorial Guinea GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Equatorial Guinea
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Equatorial Guinea

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Equatorial Guinea (continued)

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Eritrea including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Eritrea via 100 Russian military 1:100,000 topographic maps

Full coverage of Eritrea via 35 Russian military 1:200,000 topographic maps

85% coverage of Eritrea via 13 US NGA 1:250,000 JOG topographic maps

Partial coverage of Eritrea via 2 US 1:500,000 TPC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Asmara (Asmera), Eritrea – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Eritrea—low-cost, rapid delivery:

Eritrea VMAP-0 – US NGA 1:1,000,000 vector mapping

Eritrea SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Eritrea SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Eritrea GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Eritrea GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Eritrea

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Eritrea

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Eritrea (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Estonia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Estonia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Estonia via 264 Russian military 1:50,000 topographic maps

Full coverage of Estonia via 25 Russian military 1:200,000 topographic maps

Full coverage of Estonia via 11 US NGA 1:250,000 JOG topographic maps

Full coverage of Estonia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kingisep, Estonia – 2 Russian military 1:10,000 topographic City Plan map

Narva, Estonia – 4 Russian military 1:10,000 topographic City Plan map

Parnu, Estonia – 2 Russian military 1:10,000 topographic City Plan map

Tallinn, Estonia – 6 Russian military 1:10,000 topographic City Plan map

Tallinn, Estonia – 9 Russian military 1:10,000 topographic City Plan map

Tapa, Estonia – 1 Russian military 1:10,000 topographic City Plan map

Tartu, Estonia – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Estonia–low-cost, rapid delivery:

Estonia VMAP-0 – US NGA 1:1,000,000 vector mapping

Estonia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Estonia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Estonia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Estonia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Estonia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Estonia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Estonia (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Ethiopia

Land Info offers a variety of digital topographic map data and satellite imagery products of Ethiopia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Significant coverage of Ethiopia via 965 national 1:50,000 topographic maps
Full coverage of Ethiopia via 627 Russian military 1:100,000 topographic maps
Full coverage of Ethiopia via 174 Russian military 1:200,000 topographic maps
95% coverage of Ethiopia via 75 national 1:250,000 topographic maps
70% coverage of Ethiopia via 58 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Ethiopia via 8 US 1:500,000 TPC aeronautical topographic maps
95% coverage of Ethiopia via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Addis Ababa, Ethiopia – 2 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Ethiopia—low-cost, rapid delivery:

Ethiopia VMAP-0 – US NGA 1:1,000,000 vector mapping
Ethiopia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Ethiopia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Ethiopia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Ethiopia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Ethiopia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Ethiopia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Ethiopia (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Falkland Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Falkland Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original privvformat.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Falkland Islands via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Falkland Islands—low-cost, rapid delivery:

Falkland Islands VMAP-0 – US NGA 1:1,000,000 vector mapping

Falkland Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Falkland Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Falkland Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Falkland Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Falkland Islands

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Falkland Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Faroe Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Faroe Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Off-shelf global data of Faroe Islands—low-cost, rapid delivery:

Faroe Islands VMAP-0 – US NGA 1:1,000,000 vector mapping

Faroe Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Faroe Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Faroe Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Faroe Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Faroe Islands

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Faroe Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Fiji including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

50% coverage of Fiji via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Fiji via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Fiji—low-cost, rapid delivery:

Fiji VMAP-0 – US NGA 1:1,000,000 vector mapping

Fiji SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Fiji SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Fiji GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Fiji GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Fiji

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Fiji

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Finland

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Finland including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Finland via 934 Russian military 1:50,000 topographic maps
Full coverage of Finland via 253 Russian military 1:100,000 topographic maps
Full coverage of Finland via 113 Russian military 1:200,000 topographic maps
33% coverage of Finland via 18 US 1:250,000 JOG topographic maps
Full coverage of Finland via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Espoo, Finland – 1 Russian military 1:10,000 topographic City Plan map
Hameenlinna, Finland – 1 Russian military 1:10,000 topographic City Plan map
Hango (Hanko), Finland – 1 Russian military 1:15,000 topographic City Plan map
Helsinki, Finland – 6 Russian military 1:10,000 topographic City Plan maps
Jakobstad, Finland – 1 Russian military 1:10,000 topographic City Plan map
Joensuu, Finland – 1 Russian military 1:10,000 topographic City Plan map
Jyvaskyla, Finland – 1 Russian military 1:10,000 topographic City Plan map
Kemi, Finland – 2 Russian military 1:10,000 topographic City Plan maps
Kotka, Finland – 1 Russian military 1:10,000 topographic City Plan map
Kuopio, Finland – 1 Russian military 1:10,000 topographic City Plan map
Lahti, Finland – 1 Russian military 1:10,000 topographic City Plan map
Lappeenranta, Finland – 2 Russian military 1:10,000 topographic City Plan maps
Oulu, Finland – 1 Russian military 1:10,000 topographic City Plan map
Pori, Finland – 1 Russian military 1:10,000 topographic City Plan map
Raahe, Finland – 1 Russian military 1:10,000 topographic City Plan map
Rauma, Finland – 1 Russian military 1:10,000 topographic City Plan map
Rovaniemi, Finland – 1 Russian military 1:10,000 topographic City Plan map
Tampere, Finland – 2 Russian military 1:10,000 topographic City Plan maps
Tornio, Finland – 1 Russian military 1:10,000 topographic City Plan map
Turku, Finland – 2 Russian military 1:10,000 topographic City Plan maps
Vaasa, Finland – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Finland—low-cost, rapid delivery:

Finland VMAP-0 – US NGA 1:1,000,000 vector mapping
Finland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Finland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Finland (continued)

Finland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Finland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Finland

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Finland

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

France

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of France including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of France via 1719 Russian military 1:50,000 topographic maps
Full coverage of France via 466 Russian military 1:100,000 topographic maps
Full coverage of France via 133 Russian military 1:200,000 topographic maps
Partial coverage of France via 3 US 1:500,000 TPC aeronautical topographic maps
80% coverage of France via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Amiens, France – 1 Russian military 1:10,000 topographic City Plan map
Angers, France – 2 Russian military 1:10,000 topographic City Plan maps
Angouleme, France – 1 Russian military 1:10,000 topographic City Plan map
Antibes, France – 1 Russian military 1:10,000 topographic City Plan map
Arras, France – 1 Russian military 1:10,000 topographic City Plan map
Avignon, France – 1 Russian military 1:10,000 topographic City Plan map
Belfort, France – 1 Russian military 1:10,000 topographic City Plan map
Besancon, France – 1 Russian military 1:10,000 topographic City Plan map
Bordeaux, France – 4 Russian military 1:10,000 topographic City Plan maps
Boulogne-sur-Mer, France – 1 Russian military 1:10,000 topographic City Plan map
Bourges, France – 1 Russian military 1:10,000 topographic City Plan map
Brest, France – 1 Russian military 1:10,000 topographic City Plan map
Caen, France – 1 Russian military 1:10,000 topographic City Plan map
Calais, France – 1 Russian military 1:10,000 topographic City Plan map
Cannes, France – 1 Russian military 1:10,000 topographic City Plan map
Chalons-sur-Marne, France – 1 Russian military 1:10,000 topographic City Plan map
Chambery, France – 1 Russian military 1:10,000 topographic City Plan map
Chateauroux, France – 1 Russian military 1:10,000 topographic City Plan map
Cherbourg, France – 1 Russian military 1:10,000 topographic City Plan map
Clermont-Ferrand, France – 1 Russian military 1:10,000 topographic City Plan map
Colmar, France – 1 Russian military 1:10,000 topographic City Plan map
Dijon, France – 2 Russian military 1:10,000 topographic City Plan maps
Douai, France – 1 Russian military 1:10,000 topographic City Plan map
Dunkerque (Dunkirk), France – 2 Russian military 1:10,000 topographic City Plan maps
Grenoble, France – 1 Russian military 1:10,000 topographic City Plan map
La Rochelle, France – 2 Russian military 1:10,000 topographic City Plan maps

France (continued)

Le Havre (Havre), France – 2 Russian military 1:10,000 topographic City Plan maps
Le Mans, France – 1 Russian military 1:10,000 topographic City Plan map
Lille, France – 4 Russian military 1:10,000 topographic City Plan maps
Limoges, France – 2 Russian military 1:10,000 topographic City Plan maps
Lorient, France – 1 Russian military 1:10,000 topographic City Plan map
Lyon, Villeurbanne, France – 4 Russian military 1:10,000 topographic City Plan maps
Marseilles, France – 4 Russian military 1:10,000 topographic City Plan maps
Maubeuge, France – 1 Russian military 1:10,000 topographic City Plan map

French Guiana

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of French Guiana including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of French Guiana via 32 national 1:50,000 topographic maps

Near-full coverage of French Guiana via 3 US 1:500,000 TPC aeronautical topographic maps

Full coverage of French Guiana via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of French Guiana—low-cost, rapid delivery:

French Guiana VMAP-0 – US NGA 1:1,000,000 vector mapping

French Guiana SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

French Guiana SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

French Guiana GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

French Guiana GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of French Guiana

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of French Guiana

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

French Polynesia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of French Polynesia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of French Polynesia via 7 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of French Polynesia—low-cost, rapid delivery:

French Polynesia VMAP-0 – US NGA 1:1,000,000 vector mapping

French Polynesia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

French Polynesia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

French Polynesia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

French Polynesia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of French Polynesia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of French Polynesia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Gabon

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Gabon including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Gabon via 8 national 1:50,000 topographic maps
Partial coverage of Gabon via 2 Russian military 1:200,000 topographic maps
Near-full coverage of Gabon via 25 national 1:200,000 topographic maps
99% coverage of Gabon via 25 US NGA 1:250,000 JOG topographic maps
Partial coverage of Gabon via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Gabon via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Lambarene - 1:10,000 scale national topographic City Plan map, publ. 1984
Libreville et ses Environs - 1:20,000 scale national topographic City Plan map, publ. 1981

Off-shelf global data of Gabon—low-cost, rapid delivery:

Gabon VMAP-0 – US NGA 1:1,000,000 vector mapping
Gabon SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Gabon SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Gabon GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Gabon GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Gabon
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Gabon

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Gabon (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Gambia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Gambia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Gambia via 20 national 1:50,000 topographic maps
Full coverage of Gambia via 12 Russian military 1:200,000 topographic maps
Full coverage of Gambia via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Gambia via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Gambia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Banjul, Gambia – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Gambia—low-cost, rapid delivery:

Gambia VMAP-0 – US NGA 1:1,000,000 vector mapping
Gambia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Gambia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Gambia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Gambia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Gambia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Gambia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Gambia (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Gaza Strip

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Gaza Strip including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Gaza Strip via 1 national 1:50,000 topographic map
50% coverage of Gaza Strip via 2 Russian military 1:100,000 topographic maps
Full coverage of Gaza Strip via 2 Russian military 1:200,000 topographic maps
Full coverage of Gaza Strip via 2 US NGA 1:250,000 JOG topographic maps
50% coverage of Gaza Strip via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Gaza Strip—low-cost, rapid delivery:

Gaza Strip VMAP-0 – US NGA 1:1,000,000 vector mapping
Gaza Strip SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Gaza Strip SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Gaza Strip GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Gaza Strip GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Gaza Strip
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Gaza Strip

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Gaza Strip (continued)

Georgia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Georgia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Georgia via 235 Russian military 1:50,000 topographic maps
Full coverage of Georgia via 69 Russian military 1:100,000 topographic maps
Full coverage of Georgia via 24 Russian military 1:200,000 topographic maps
75% coverage of Georgia via 8 US NGA 1:250,000 JOG topographic maps
Full coverage of Georgia via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Georgia via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Akhalkalaki – 1 Russian military 1:10,000 topographic City Plan map
Batumi – 1 Russian military 1:10,000 topographic City Plan map
Borzhomi – 2 Russian military 1:10,000 topographic City Plan maps
Gori – 1 Russian military 1:10,000 topographic City Plan map
Khashuri – 1 Russian military 1:10,000 topographic City Plan map
Kutaisi – 1 Russian military 1:10,000 topographic City Plan map
Poti – 2 Russian military 1:10,000 topographic City Plan maps
Rustavi – 2 Russian military 1:10,000 topographic City Plan maps
Samtredia – 2 Russian military 1:10,000 topographic City Plan maps
Sukhumi – 1 Russian military 1:10,000 topographic City Plan map
Tbilisi – 2 Russian military 1:25,000 topographic City Plan maps
Tbilisi – 6 Russian military 1:10,000 topographic City Plan maps
Zestafoni – 1 Russian military 1:10,000 topographic City Plan map
Zugdidi – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Georgia—low-cost, rapid delivery:

Georgia VMAP-0 – US NGA 1:1,000,000 vector mapping
Georgia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Georgia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Georgia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Georgia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Georgia

Georgia (continued)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Georgia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Germany

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Germany including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Germany via 780 national 1:50,000 topographic maps
Full coverage of Germany via 1100 Russian military 1:50,000 topographic maps
Full coverage of Germany via 333 Russian military 1:100,000 topographic maps
Full coverage of Germany via 96 Russian military 1:200,000 topographic maps
Partial coverage of Germany via 8 US 1:250,000 JOG aeronautical topographic maps
Partial coverage of Germany via 3 US 1:500,000 TPC aeronautical topographic maps
Partial coverage of Germany via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Aachen– 1 Russian military 1:10,000 topographic City Plan map
Aschaffenburg– 1 Russian military 1:10,000 topographic City Plan map
Augsburg– 2 Russian military 1:10,000 topographic City Plan maps
Bad Kreuznach– 1 Russian military 1:10,000 topographic City Plan map
Baden-Baden– 1 Russian military 1:10,000 topographic City Plan map
Bamberg– 1 Russian military 1:10,000 topographic City Plan map
Bautzen– 1 Russian military 1:10,000 topographic City Plan map
Bayreuth– 1 Russian military 1:10,000 topographic City Plan map
Bergich Gladbach, Bensberg– 1 Russian military 1:10,000 topographic City Plan map
Berlin, Potsdam, West Berlin– 4 Russian military 1:25,000 topographic City Plan maps
Bielefeld, Brackwede– 2 Russian military 1:10,000 topographic City Plan maps
Bitburg– 1 Russian military 1:10,000 topographic City Plan map
Bitterfeld– 1 Russian military 1:10,000 topographic City Plan map
Bochum– 2 Russian military 1:10,000 topographic City Plan maps
Bonn– 4 Russian military 1:10,000 topographic City Plan maps
Bottrop– 1 Russian military 1:10,000 topographic City Plan map
Brandenburg– 2 Russian military 1:10,000 topographic City Plan maps
Braunschweig– 2 Russian military 1:10,000 topographic City Plan maps
Bremen, Delmenhorst– 2 Russian military 1:10,000 topographic City Plan maps
Bremerhaven– 2 Russian military 1:10,000 topographic City Plan maps
Celle– 1 Russian military 1:10,000 topographic City Plan map
Chemnitz– 2 Russian military 1:10,000 topographic City Plan maps
Coburg– 1 Russian military 1:10,000 topographic City Plan map
Cologne (Koln) – 4 Russian military 1:10,000 topographic City Plan maps
Cottbus– 1 Russian military 1:10,000 topographic City Plan map

Germany (continued)

Cuxhaven– 1 Russian military 1:10,000 topographic City Plan map
Darmstadt– 2 Russian military 1:10,000 topographic City Plan maps
Dessau– 2 Russian military 1:10,000 topographic City Plan maps
Dortmund– 4 Russian military 1:10,000 topographic City Plan maps
Dresden– 2 Russian military 1:10,000 topographic City Plan maps
Duisburg– 2 Russian military 1:10,000 topographic City Plan maps
Dusseldorf, Neuss– 4 Russian military 1:10,000 topographic City Plan maps
Eberswalde-Finow– 1 Russian military 1:10,000 topographic City Plan map
Eisenach– 1 Russian military 1:10,000 topographic City Plan map
Emden– 1 Russian military 1:10,000 topographic City Plan map
Erfurt– 1 Russian military 1:10,000 topographic City Plan map
Erlangen– 1 Russian military 1:10,000 topographic City Plan map
Essen– 2 Russian military 1:10,000 topographic City Plan maps
Flensburg– 1 Russian military 1:10,000 topographic City Plan map
Frankfurt am Main (Frankfort on the Maine), Offenbach– 4 Russian military 1:10,000 topographic City Plan maps
Frankfurt an der Oder (Frankfort on the Oder)– 1 Russian military 1:10,000 topographic City Plan map
Freiburg
Friedrichshafen– 1 Russian military 1:10,000 topographic City Plan map
Fulda– 1 Russian military 1:10,000 topographic City Plan map
Furstenwalde– 2 Russian military 1:10,000 topographic City Plan maps
Gelsenkirchen, Wanne Eickel, Wattenscheid– 2 Russian military 1:10,000 topographic City Plan maps
Gera– 2 Russian military 1:10,000 topographic City Plan maps
Giessen– 1 Russian military 1:10,000 topographic City Plan map
Gladbeck– 1 Russian military 1:10,000 topographic City Plan map
Gorlitz– 1 Russian military 1:10,000 topographic City Plan map
Gotha– 1 Russian military 1:10,000 topographic City Plan map
Gottingen– 2 Russian military 1:10,000 topographic City Plan maps
Greifswald– 1 Russian military 1:10,000 topographic City Plan map
Gutersloh– 1 Russian military 1:10,000 topographic City Plan map
Hagen, Wetter, Herdecke– 2 Russian military 1:10,000 topographic City Plan maps
Halberstadt– 1 Russian military 1:10,000 topographic City Plan map
Halle– 2 Russian military 1:10,000 topographic City Plan maps
Hamburg– 2 Russian military 1:10,000 topographic City Plan maps
Hamm– 1 Russian military 1:15,000 topographic City Plan map
Hanau– 1 Russian military 1:10,000 topographic City Plan map
Hannover– 2 Russian military 1:10,000 topographic City Plan maps
Harburg– 1 Russian military 1:10,000 topographic City Plan map
Heidelberg– 1 Russian military 1:10,000 topographic City Plan map
Heilbronn– 1 Russian military 1:10,000 topographic City Plan map
Hildesheim– 1 Russian military 1:10,000 topographic City Plan map
Ingolstadt– 1 Russian military 1:10,000 topographic City Plan map
Jena– 1 Russian military 1:10,000 topographic City Plan map
Kaiserslautern– 2 Russian military 1:10,000 topographic City Plan maps
Karlsruhe– 4 Russian military 1:10,000 topographic City Plan maps
Kassel– 4 Russian military 1:10,000 topographic City Plan maps
Kiel– 2 Russian military 1:10,000 topographic City Plan maps

Germany (continued)

Koblenz– 1 Russian military 1:10,000 topographic City Plan map
Krefeld– 2 Russian military 1:10,000 topographic City Plan maps
Landsberg– 1 Russian military 1:10,000 topographic City Plan map
Landshut– 1 Russian military 1:10,000 topographic City Plan map
Leipzig– 4 Russian military 1:10,000 topographic City Plan maps
Leverkusen, Opladen– 2 Russian military 1:10,000 topographic City Plan map
Lubeck– 4 Russian military 1:10,000 topographic City Plan maps
Luneburg– 1 Russian military 1:10,000 topographic City Plan map
Lutherstadt-Wittenberg– 1 Russian military 1:10,000 topographic City Plan map
Magdeburg– 1 Russian military 1:25,000 topographic City Plan map
Mainz– 2 Russian military 1:10,000 topographic City Plan maps
Mannheim, Ludwigshafen– 4 Russian military 1:10,000 topographic City Plan maps
Marburg– 1 Russian military 1:15,000 topographic City Plan map
Merseburg– 1 Russian military 1:10,000 topographic City Plan map
Minden– 1 Russian military 1:10,000 topographic City Plan map
Monchengladbach, Rheydt– 2 Russian military 1:10,000 topographic City Plan maps
Munich (Munchen) – 2 Russian military 1:10,000 topographic City Plan maps
Munster– 2 Russian military 1:10,000 topographic City Plan maps
Neubrandenburg– 1 Russian military 1:10,000 topographic City Plan map
Neumunster– 1 Russian military 1:10,000 topographic City Plan map
Nuremberg (Nurnberg), Furth– 4 Russian military 1:10,000 topographic City Plan maps
Oberhausen, Mulheim– 2 Russian military 1:10,000 topographic City Plan maps
Oldenburg– 2 Russian military 1:10,000 topographic City Plan maps
Oranienburg– 1 Russian military 1:10,000 topographic City Plan map
Osnabruck– 1 Russian military 1:10,000 topographic City Plan map
Paderborn– 1 Russian military 1:10,000 topographic City Plan map
Pforzheim– 1 Russian military 1:10,000 topographic City Plan map
Pirmasens– 1 Russian military 1:10,000 topographic City Plan map
Plauen– 1 Russian military 1:10,000 topographic City Plan map
Recklinghausen– 1 Russian military 1:10,000 topographic City Plan map
Regensburg– 1 Russian military 1:10,000 topographic City Plan map
Remscheid– 1 Russian military 1:10,000 topographic City Plan map
Rendsburg– 1 Russian military 1:10,000 topographic City Plan map
Reutlingen– 1 Russian military 1:10,000 topographic City Plan map
Rheine– 1 Russian military 1:10,000 topographic City Plan map
Rosenhei– 1 Russian military 1:10,000 topographic City Plan map m
Rostock– 4 Russian military 1:10,000 topographic City Plan maps
Saarbrucken– 1 Russian military 1:10,000 topographic City Plan map
Schleswig– 1 Russian military 1:10,000 topographic City Plan map
Schweinfurt– 1 Russian military 1:10,000 topographic City Plan map
Schwerin– 2 Russian military 1:10,000 topographic City Plan maps
Siegen– 1 Russian military 1:10,000 topographic City Plan map
Solingen, Haan– 2 Russian military 1:10,000 topographic City Plan maps
Speyer– 1 Russian military 1:10,000 topographic City Plan map
Stendal– 1 Russian military 1:10,000 topographic City Plan map

Germany (continued)

Stralsund– 2 Russian military 1:10,000 topographic City Plan maps
Stuttgart– 6 Russian military 1:10,000 topographic City Plan maps
Suhl– 1 Russian military 1:10,000 topographic City Plan map
Thomas-Muentzer-Stadt-Muehlhausen – 1 Russian military 1:10,000 topographic City Plan map
Trier (Treves) – 1 Russian military 1:10,000 topographic City Plan map
Tubingen– 1 Russian military 1:10,000 topographic City Plan map
Ulm– 1 Russian military 1:10,000 topographic City Plan map
Unna– 1 Russian military 1:10,000 topographic City Plan map
Velbert– 1 Russian military 1:10,000 topographic City Plan map
Weimar– 1 Russian military 1:10,000 topographic City Plan map
Weissenfels– 1 Russian military 1:10,000 topographic City Plan map
Wesel– 1 Russian military 1:15,000 topographic City Plan map
Wiesbaden– 2 Russian military 1:10,000 topographic City Plan maps
Wilhelmshaven– 2 Russian military 1:10,000 topographic City Plan maps
Wismar– 2 Russian military 1:10,000 topographic City Plan maps
Witten– 1 Russian military 1:10,000 topographic City Plan map
Wolfburg– 2 Russian military 1:10,000 topographic City Plan maps
Wolmirstedt– 1 Russian military 1:10,000 topographic City Plan map
Worms– 1 Russian military 1:15,000 topographic City Plan map
Wuppertal– 2 Russian military 1:10,000 topographic City Plan maps
Wurzburg– 1 Russian military 1:10,000 topographic City Plan map
Zella-Mehlis– 1 Russian military 1:10,000 topographic City Plan map
Zwickau, Werdau, Wilkau-Hasslau– 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Germany–low-cost, rapid delivery:

Germany VMAP-0 – US NGA 1:1,000,000 vector mapping
Germany SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Germany SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Germany GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Germany GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Germany
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Germany

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Germany (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Ghana

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Ghana including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Ghana via 25 national 1:50,000 topographic maps
Full coverage of Ghana via 45 Russian military 1:200,000 topographic maps
Full coverage of Ghana via 25 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Ghana via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Ghana via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Accra– 4 Russian military 1:10,000 topographic City Plan maps
Accra - 1:10,000 scale national topographic City Plan, 4 maps
Cape Coast - 1:10,000 scale national topographic City Plan map, publ. 1975
Kumasi - 1:10,000 scale national topographic City Plan, 2 maps
Kumasi– 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Ghana–low-cost, rapid delivery:

Ghana VMAP-0 – US NGA 1:1,000,000 vector mapping
Ghana SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Ghana SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Ghana GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Ghana GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Ghana
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Ghana

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Ghana (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Gibraltar

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Gibraltar including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jpg2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Gibraltar via 1 US 1:250,000 JOG topographic map

Full coverage of Gibraltar via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Gibraltar via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Gibraltar, La Linea (Spain)– 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Gibraltar–low-cost, rapid delivery:

Gibraltar VMAP-0 – US NGA 1:1,000,000 vector mapping

Gibraltar SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Gibraltar SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Gibraltar GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Gibraltar GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Gibraltar

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Gibraltar

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Gibraltar (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Gloriosi Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Gloriosi Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Gloriosi Island via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Gloriosi Island via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Gloriosi Island—low-cost, rapid delivery:

Gloriosi Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Gloriosi Island SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Gloriosi Island SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Gloriosi Island GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Gloriosi Island GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Gloriosi Island

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Gloriosi Island

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Greece

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Greece including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Greece via 623 Russian military 1:50,000 topographic maps
Full coverage of Greece via 194 Russian military 1:100,000 topographic maps
Full coverage of Greece via 70 Russian military 1:200,000 topographic maps
98% coverage of Greece via 28 US 1:250,000 JOG topographic maps
Near-full coverage of Greece via 4 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Greece via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Athens (Athinai), Piraeus(Piraevs)– 2 Russian military 1:25,000 topographic City Plan maps
Iraklion– 1 Russian military 1:10,000 topographic City Plan map
Larissa (Larisa)– 1 Russian military 1:10,000 topographic City Plan map
Patras (Patrai)– 1 Russian military 1:10,000 topographic City Plan map
Salonika (Thessaloniki)– 2 Russian military 1:10,000 topographic City Plan maps
Volos– 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Greece–low-cost, rapid delivery:

Greece VMAP-0 – US NGA 1:1,000,000 vector mapping
Greece SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Greece SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Greece GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Greece GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Greece
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Greece

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Greece (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Greenland

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Greenland including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Greenland via 262 Russian military 1:200,000 topographic maps

Partial coverage of Greenland via 69 US NGA 1:250,000 JOG topographic maps

Partial coverage of Greenland via 69 national 1:250,000 topographic maps

Partial coverage of Greenland via 3 US 1:500,000 TPC aeronautical topographic maps

80% of Greenland via 4 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Greenland—low-cost, rapid delivery:

Greenland VMAP-0 – US NGA 1:1,000,000 vector mapping

Greenland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Greenland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Greenland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Greenland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Greenland

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Greenland

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Grenada

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Grenada including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Grenada via 4 national 1:25,000 topographic maps

Full coverage of Grenada via 3 US NGA 1:250,000 JOG topographic maps

Full coverage of Grenada via 2 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Grenada via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Grenada—low-cost, rapid delivery:

Grenada VMAP-0 – US NGA 1:1,000,000 vector mapping

Grenada SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Grenada SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Grenada GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Grenada GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Grenada

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Grenada

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Guadeloupe

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Guadeloupe including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Guadeloupe via 6 national 1:25,000 topographic maps

Full coverage of Guadeloupe via 4 US NGA 1:250,000 JOG topographic maps

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Guatemala

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Guatemala including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

Full coverage of Guatemala via 259 national 1:50,000 topographic maps
Full coverage of Guatemala via 12 US NGA 1:250,000 JOG topographic maps
Full coverage of Guatemala via 3 US 1:500,000 TPC aeronautical topographic maps
50% coverage of Guatemala via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 5m - 10m resolution):

Guatemala City– 2 Russian military 1:10,000 topographic City Plan maps
Guatemala City – 4 US NGA 1: 15,000 topographic City Graphic maps
Puerto Barrios/Puerto Santo T. – 1 US NGA 1: 12,500 topographic City Graphic maps

Off-shelf global data of Guatemala–low-cost, rapid delivery:

Guatemala VMAP-0 – US NGA 1:1,000,000 vector mapping
Guatemala SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Guatemala SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Guatemala GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Guatemala GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Guatemala
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Guatemala

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Guatemala (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Guinea

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Guinea including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Guinea via 52 Russian military 1:200,000 topographic maps

Full coverage of Guinea via 25 US NGA 1:250,000 JOG topographic maps

Full coverage of Guinea via 6 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Guinea via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Conakry– 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Guinea–low-cost, rapid delivery:

Guinea VMAP-0 – US NGA 1:1,000,000 vector mapping

Guinea SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Guinea SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Guinea GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Guinea GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Guinea

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Guinea

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Guinea (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Guinea-Bissau

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Guinea-Bissau including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Guinea-Bissau via 15 Russian military 1:200,000 topographic maps
Full coverage of Guinea-Bissau via 2 US NGA 1:250,000 JOG topographic maps
Full coverage of Guinea-Bissau via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Guinea-Bissau via 6 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Guinea-Bissau—low-cost, rapid delivery:

Guinea-Bissau VMAP-0 – US NGA 1:1,000,000 vector mapping
Guinea-Bissau SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Guinea-Bissau SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Guinea-Bissau GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Guinea-Bissau GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Guinea-Bissau
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Guinea-Bissau

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Guyana

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Guyana including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

20% coverage of Guyana via 4 US NGA 1:250,000 JOG topographic maps

Full coverage of Guyana via 4 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Guyana via 3 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Guyana—low-cost, rapid delivery:

Guyana VMAP-0 – US NGA 1:1,000,000 vector mapping

Guyana SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Guyana SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Guyana GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Guyana GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Guyana

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Guyana

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Haiti

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Haiti including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Haiti via 92 US NGA 1:50,000 TLM topographic maps
Full coverage of Haiti via 13 Russian military 1:200,000 topographic maps
Full coverage of Haiti via 5 US NGA 1:250,000 JOG topographic maps
Full coverage of Haiti via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Haiti via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Port-au-Prince– 1 Russian military 1:10,000 topographic City Plan maps
Aquain – 1 US NGA 1: 10,000 topographic City Graphic map
Cap Haitien – 1 US NGA 1: 12,500 topographic City Graphic map
Cayes – 1 US NGA 1: 5,000 topographic City Graphic map
Fort Liberte – 1 US NGA 1: 12,500 topographic City Graphic map
Gonaives – 1 US NGA 1: 12,500 topographic City Graphic map
Hinche – 1 US NGA 1: 10,000 topographic City Graphic map
Jacmel – 1 US NGA 1: 12,500 topographic City Graphic map
Jeremie – 1 US NGA 1: 10,000 topographic City Graphic map
Petit Goave – 1 US NGA 1: 12,500 topographic City Graphic map
Port de Paix – 1 US NGA 1: 12,500 topographic City Graphic map
Port-au-Prince – 4 US NGA 1: 12,500 topographic City Graphic maps
Saint Marc – 1 US NGA 1: 12,500 topographic City Graphic map

Off-shelf global data of Haiti–low-cost, rapid delivery:

Haiti VMAP-0 – US NGA 1:1,000,000 vector mapping
Haiti SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Haiti SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Haiti GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Haiti GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Haiti
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Haiti

Haiti (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Heard Island & McDonald Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Heard Island & McDonald Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Off-shelf global data of Heard Island & McDonald Island—low-cost, rapid delivery:

Heard Island & McDonald Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Heard Island & McDonald Island SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Heard Island & McDonald Island SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Heard Island & McDonald Island GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Heard Island & McDonald Island GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm,

DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Heard Island & McDonald Island

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Heard Island & McDonald Island

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Honduras

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Honduras including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Honduras via 279 national 1:50,000 topographic maps
Full coverage of Honduras via 14 US NGA 1:250,000 JOG topographic maps
Full coverage of Honduras via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Honduras via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Comamayagua – 1 US NGA 1: 15,000 topographic City Graphic map
Puerto Cortes – 1 US NGA 1: 12,500 topographic City Graphic map
Tegucigalpa – 1 US NGA 1: 12,500 topographic City Graphic map
Tegucigalpa– 1 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Honduras—low-cost, rapid delivery:

Honduras VMAP-0 – US NGA 1:1,000,000 vector mapping
Honduras SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Honduras SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Honduras GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Honduras GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Honduras
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Honduras

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Honduras (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Hong Kong

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Hong Kong including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Hong Kong via 16 national 1:20,000 topographic maps
Full coverage of Hong Kong via 2 national 1:50,000 topographic maps
Full coverage of Hong Kong via 4 Russian military 1:100,000 topographic maps
Full coverage of Hong Kong via 2 Russian military 1:200,000 topographic maps
Full coverage of Hong Kong via 2 US 1:250,000 JOG topographic maps
Full coverage of Hong Kong via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Hong Kong via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Xianggang (Siangan/Hong Kong), China – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Hong Kong–low-cost, rapid delivery:

Hong Kong VMAP-0 – US NGA 1:1,000,000 vector mapping
Hong Kong SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Hong Kong SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Hong Kong GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Hong Kong GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Hong Kong
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Hong Kong

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Hong Kong (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Hungary

Land Info offers a variety of digital topographic map data and satellite imagery products of Hungary including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Hungary via 1,154 national 1:25,000 topographic maps
Full coverage of Hungary via 350 national 1:50,000 topographic maps
Full coverage of Hungary via 320 Russian military 1:50,000 topographic maps
Full coverage of Hungary via 92 national 1:100,000 topographic maps
Full coverage of Hungary via 93 Russian military 1:100,000 topographic maps
Full coverage of Hungary via 23 national 1:200,000 topographic maps
Full coverage of Hungary via 28 Russian military 1:200,000 topographic maps
Near-full coverage of Hungary via 11 US NGA 1:250,000 JOG topographic maps
45% coverage of Hungary via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Hungary via 3 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Budapest– 6 Russian military 1:10,000 topographic City Plan maps
Debrecen– 1 Russian military 1:10,000 topographic City Plan map
Gyor– 1 Russian military 1:25,000 topographic City Plan map
Kaposvar– 1 Russian military 1:10,000 topographic City Plan map
Komarno (Slovakia), Komarom (Hungary) – 1 Russian military 1:10,000 topographic City Plan map
Pecs– 1 Russian military 1:10,000 topographic City Plan map
Szeged– 1 Russian military 1:10,000 topographic City Plan map
Szolnok– 1 Russian military 1:10,000 topographic City Plan map
Szombathely– 1 Russian military 1:10,000 topographic City Plan map
Zalaegerszeg– 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Hungary–low-cost, rapid delivery:

Hungary VMAP-0 – US NGA 1:1,000,000 vector mapping
Hungary SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Hungary SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Hungary GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Hungary GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Hungary

Hungary (continued)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Hungary

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Iceland

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Iceland including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Iceland via 50 Russian military 1:200,000 topographic maps

Full coverage of Iceland via 14 US 1:250,000 JOG topographic maps

Full coverage of Iceland via 1 US 1:500,000 TPC aeronautical topographic map

90% coverage of Iceland via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Reykjavik– 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Iceland–low-cost, rapid delivery:

Iceland VMAP-0 – US NGA 1:1,000,000 vector mapping

Iceland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Iceland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Iceland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Iceland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Iceland

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Iceland

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Iceland (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

India

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of India including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of India via 196 national 1:25,000 topographic maps
Partial coverage of India via 2,497 national 1:50,000 topographic maps
Partial coverage of India via 487 Russian military 1:100,000 topographic maps
Full coverage of India via 542 Russian military 1:200,000 topographic maps
Full coverage of India via 359 national 1:250,000 topographic maps
Full coverage of India via 276 US AMS 1:250,000 topographic maps
60% coverage of India via 142 US NGA 1:250,000 JOG topographic maps
Near-full coverage of India via 28 US 1:500,000 TPC aeronautical topographic maps
Full coverage of India via 9 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Agra– 2 Russian military 1:10,000 topographic City Plan maps
Ahmadabad– 2 Russian military 1:10,000 topographic City Plan maps
Ajmer– 1 Russian military 1:10,000 topographic City Plan map
Aligarh– 1 Russian military 1:10,000 topographic City Plan map
Allahabad – 1 Russian military 1:25,000 topographic City Plan map
Amritsar – 1 Russian military 1:10,000 topographic City Plan map
Bangalore – 1 Russian military 1:25,000 topographic City Plan map
Bareilly – 2 Russian military 1:10,000 topographic City Plan maps
Baroda (Vadodara)– 1 Russian military 1:10,000 topographic City Plan map
Bombay (Mumbai)– 1 Russian military 1: 25,000 topographic City Plan map
Calcutta – 6 Russian military 1:10,000 topographic City Plan maps
Cochin – 1 Russian military 1: 25,000 topographic City Plan map
Hyderabad – 1 Russian military 1:25,000 topographic City Plan map
Jaipur – 2 Russian military 1:10,000 topographic City Plan maps
Jamshedpur – 2 Russian military 1:10,000 topographic City Plan maps
Kanpur (Cawnpore) – 2 Russian military 1:10,000 topographic City Plan maps
Lucknow – 1 Russian military 1: 25,000 topographic City Plan map
Madras – 4 Russian military 1:10,000 topographic City Plan maps
Madurai – 1 Russian military 1:10,000 topographic City Plan map
Nagpur – 2 Russian military 1:10,000 topographic City Plan maps
New Delhi – 2 Russian military 1: 25,000 topographic City Plan maps
Patna – 1 Russian military 1: 25,000 topographic City Plan map

India (continued)

Poona (Pune)– 1 Russian military 1: 25,000 topographic City Plan map
Surat – 2 Russian military 1:10,000 topographic City Plan maps
Tiruchchirappalli – 1 Russian military 1: 25,000 topographic City Plan map
Varanasi – 1 Russian military 1: 25,000 topographic City Plan map
Vijayawada – 1 Russian military 1:10,000 topographic City Plan map
Vishakhapatnam – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of India–low-cost, rapid delivery:

India VMAP-0 – US NGA 1:1,000,000 vector mapping
India SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
India SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
India GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
India GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of India
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of India

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Indonesia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Indonesia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Indonesia via 1,446 national 1:25,000 topographic maps
Partial coverage of Indonesia via 1,350 national 1:50,000 topographic maps
Partial coverage of Indonesia via 129 Russian military 1:200,000 topographic maps
Near-full coverage of Indonesia via 189 national 1:250,000 topographic maps
Partial coverage of Indonesia via 47 US NGA 1:250,000 JOG topographic maps
Partial coverage of Indonesia via 4 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Indonesia via 34 national 1:1,000,000 topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bandoeng (Bandung) – 1 Russian military 1:10,000 topographic City Plan map
Jakarta – 1 Russian military 1:25,000 topographic City Plan map
Jakarta – 9 Indonesia national 1:25,000 topographic maps
Malang – 1 Russian military 1:25,000 topographic City Plan map
Padang – 1 Russian military 1:10,000 topographic City Plan map
Surabaya – 1 Russian military 1:25,000 topographic City Plan map
Yogyakarta (Jogyakarta) – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Indonesia—low-cost, rapid delivery:

Indonesia VMAP-0 – US NGA 1:1,000,000 vector mapping
Indonesia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Indonesia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Indonesia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Indonesia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Indonesia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Indonesia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation,

Indonesia (continued)

natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Iran

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Iran including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Iran via 7,252 national 1:25,000 topographic maps
Partial coverage of Iran via 1,002 Russian military 1:50,000 topographic maps
Full coverage of Iran via 1,058 Russian military 1:100,000 topographic maps
Full coverage of Iran via 288 Russian military 1:200,000 topographic maps
Full coverage of Iran via 112 National 1:250,000 topographic maps
Near-full coverage of Iran via 131 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Iran via 11 US 1:500,000 TPC aeronautical topographic maps
Near-full coverage of Iran via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Abadan – 2 Russian military 1:10,000 topographic City Plan maps
Ahvaz (Ahwas) – 2 Russian military 1:10,000 topographic City Plan maps
Arak – 2 Russian military 1:10,000 topographic City Plan maps
Ardabil– 1 Russian military 1:10,000 topographic City Plan map
Babol– 1 Russian military 1:10,000 topographic City Plan map
Bakhtaran– 1 Russian military 1:10,000 topographic City Plan map
Bandar-e Anzali (Pakhlevi) – 1 Russian military 1:10,000 topographic City Plan map
Dezful (Dizful), Andimeshk– 2 Russian military 1:10,000 topographic City Plan maps
Esfahan (Isfahan) – 2 Russian military 1:10,000 topographic City Plan maps
Gorgan– 1 Russian military 1:10,000 topographic City Plan map
Hamadan– 1 Russian military 1:10,000 topographic City Plan map
Karaj– 1 Russian military 1:10,000 topographic City Plan map
Kerman– 2 Russian military 1:10,000 topographic City Plan maps
Mashhad (Meshed) – 2 Russian military 1:10,000 topographic City Plan maps
Orumiyeh (Urmia) – 1 Russian military 1:10,000 topographic City Plan map
Qazvin (Kazvin) – 1 Russian military 1:10,000 topographic City Plan map
Qom – 2 Russian military 1:10,000 topographic City Plan maps
Rasht (Resht) – 1 Russian military 1:10,000 topographic City Plan map
Rey– 1 Russian military 1:25,000 topographic City Plan map
Sari – 1 Russian military 1:10,000 topographic City Plan map
Semnan – 1 Russian military 1:10,000 topographic City Plan map
Shahrud – 1 Russian military 1:10,000 topographic City Plan map
Shiraz – 1 Russian military 1:25,000 topographic City Plan map
Tabriz – 2 Russian military 1:10,000 topographic City Plan maps

Iran (continued)

Tehran – 2 Russian military 1:10,000 topographic City Plan maps
Tehran – 12 national 1:25,000 topographic maps
Yazd (Yezd) – 1 Russian military 1:10,000 topographic City Plan map
Zanjan (Zenjan) – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Iran–low-cost, rapid delivery:

Iran VMAP-0 – US NGA 1:1,000,000 vector mapping
Iran SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Iran SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Iran GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Iran GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Iran
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Iran

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Iraq including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Iraq via 102 Russian military 1:50,000 topographic maps
Full coverage of Iraq via 308 Russian military 1:100,000 topographic maps
Full coverage of Iraq via 88 Russian military 1:200,000 topographic maps
Full coverage of Iraq via 43 US NGA 1:250,000 JOG topographic maps
15% coverage of Iraq via 2 US 1:500,000 TPC aeronautical topographic maps
60% coverage of Iraq via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ad-Diwaniyah – 1 Russian military 1:10,000 topographic City Plan map
As-Sulaymaniyah – 1 Russian military 1:10,000 topographic City Plan map
Irbil – 1 Russian military 1:10,000 topographic City Plan map
Al-Amarah – 1 Russian military 1:10,000 topographic City Plan map
Al-Kut – 1 Russian military 1:10,000 topographic City Plan map
An-Najaf, Al-Kufah – 1 Russian military 1:10,000 topographic City Plan map
Baghdad – 1 US NGA 1: 40,000 topographic City Graphic map (no contours)
Baghdad – 2 Russian military 1:25,000 topographic City Plan maps
Basra (Al Basrah) – 1 US NGA 1: 30,000 topographic City Graphic map (no contours)
Basra (Al Basrah)– 2 Russian military 1:25,000 topographic City Plan maps
Hilla (Al-Hillah) – 1 Russian military 1:10,000 topographic City Plan map
Kerbela (Karbala) – 1 Russian military 1:10,000 topographic City Plan map
Kirkuk (Karkuk) – 1 US NGA 1: 15,000 topographic City Graphic map (no contours)
Kirkuk – 1 Russian military 1:10,000 topographic City Plan map
Mosul (Al-Mawsil) – 2 Russian military 1:10,000 topographic City Plan maps
Mosul (Al-Mawsil) – 1 US NGA 1: 40,000 topographic City Graphic map (no contours)
Tikrit – 1 US NGA 1: 14,500 topographic City Graphic map (no contours)

Off-shelf global data of Iraq–low-cost, rapid delivery:

Iraq VMAP-0 – US NGA 1:1,000,000 vector mapping
Iraq SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Iraq SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Iraq GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Iraq GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Iraq (continued)

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Iraq

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Iraq

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Ireland

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Ireland including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Ireland via 85 Russian military 1:100,000 topographic maps

Full coverage of Ireland via 27 Russian military 1:200,000 topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Dublin (Baile Atha Cliath) – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Ireland–low-cost, rapid delivery:

Ireland VMAP-0 – US NGA 1:1,000,000 vector mapping

Ireland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Ireland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Ireland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Ireland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Ireland

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Ireland

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Ireland (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Israel/West Bank/Gaza

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Israel/West Bank/Gaza including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Israel/West Bank/Gaza via 116 Russian military 1:50,000 topographic maps

Full coverage of Israel/West Bank/Gaza via 30 Russian military 1:100,000 topographic maps

Full coverage of Israel/West Bank/Gaza via 12 Russian military 1:200,000 topographic maps

Full coverage of Israel/West Bank/Gaza via 8 US NGA 1:250,000 JOG topographic maps

33% coverage of Israel/West Bank/Gaza via 1 US NGA 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Beersheba – 1 Russian military 1:10,000 topographic City Plan map

Elat – 1 Russian military 1:10,000 topographic City Plan map

Haifa (Hefa) – 2 Russian military 1:10,000 topographic City Plan maps

Jerusalem – 2 Russian military 1:10,000 topographic City Plan maps

Natanya (Netanya) – 1 Russian military 1:10,000 topographic City Plan map

Tel Aviv, Jaffa (Yafo) – 6 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Israel/West Bank/Gaza–low-cost, rapid delivery:

Israel/West Bank/Gaza VMAP-0 – US NGA 1:1,000,000 vector mapping

Israel/West Bank/Gaza SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Israel/West Bank/Gaza SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Israel/West Bank/Gaza GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Israel/West Bank/Gaza GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Italy including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Italy via 992 Russian military 1:50,000 topographic maps
Full coverage of Italy via 278 National 1:100,000 topographic maps
Full coverage of Italy via 301 Russian military 1:100,000 topographic maps
Full coverage of Italy via 94 Russian military 1:200,000 topographic maps
25% coverage of Italy via 20 US NGA 1:250,000 topographic maps
Full coverage of Italy via 39 National 1:250,000 topographic maps
Near-full coverage of Italy via 6 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Italy via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ancona – 1 Russian military 1:10,000 topographic City Plan map
Augusta – 1 Russian military 1:10,000 topographic City Plan map
Bari – 1 Russian military 1:10,000 topographic City Plan map
Benevento – 1 Russian military 1:10,000 topographic City Plan map
Bologna – 2 Russian military 1:10,000 topographic City Plan maps
Bolzano – 1 Russian military 1:10,000 topographic City Plan map
Brescia – 1 Russian military 1:10,000 topographic City Plan map
Brindisi – 1 Russian military 1:10,000 topographic City Plan map
Cagliari – 1 Russian military 1:10,000 topographic City Plan map
Catania – 1 Russian military 1:10,000 topographic City Plan map
Catanzaro – 1 Russian military 1:10,000 topographic City Plan map
Como – 1 Russian military 1:10,000 topographic City Plan map
Cosenza – 1 Russian military 1:10,000 topographic City Plan map
Cremona – 1 Russian military 1:10,000 topographic City Plan map
Ferrara – 1 Russian military 1:10,000 topographic City Plan map
Florence (Firenze) – 2 Russian military 1:10,000 topographic City Plan maps
Genoa (Genova) – 2 Russian military 1:10,000 topographic City Plan maps
Gorizia – 1 Russian military 1:10,000 topographic City Plan map
La Spezia – 1 Russian military 1:10,000 topographic City Plan map
Lecce – 1 Russian military 1:10,000 topographic City Plan map
Leghorn (Livorno) – 1 Russian military 1:10,000 topographic City Plan map
Luca – 1 Russian military 1:10,000 topographic City Plan map
Mantua (Mantova) – 1 Russian military 1:10,000 topographic City Plan map
Messina – 1 Russian military 1:10,000 topographic City Plan map

Italy (continued)

Milan (Milano) – 4 Russian military 1:10,000 topographic City Plan maps
Modica – 1 Russian military 1:10,000 topographic City Plan map
Monza, Lissone – 1 Russian military 1:10,000 topographic City Plan map
Naples (Napoli), Portici – 4 Russian military 1:10,000 topographic City Plan maps
Novara – 1 Russian military 1:10,000 topographic City Plan map
Padua (Padova) – 1 Russian military 1:10,000 topographic City Plan map
Palermo – 2 Russian military 1:10,000 topographic City Plan maps
Parma – 1 Russian military 1:10,000 topographic City Plan map
Pavia – 1 Russian military 1:10,000 topographic City Plan map
Perugia – 1 Russian military 1:10,000 topographic City Plan map
Pesaro – 1 Russian military 1:10,000 topographic City Plan map
Pescara – 1 Russian military 1:10,000 topographic City Plan map
Piacenza – 1 Russian military 1:10,000 topographic City Plan map

Japan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Japan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs

(Digital Elevation Models: 20m - 90m resolution):

- Full coverage of Japan via 1,269 Russian military 1:50,000 topographic maps
- Full coverage of Japan via 455 Russian military 1:100,000 topographic maps
- Full coverage of Japan via 133 Russian military 1:200,000 topographic maps
- Full coverage of Japan via 62 US NGA 1:250,000 JOG topographic maps
- Full coverage of Japan via 4,430 national 1:25,000 topographic maps
- Full coverage of Japan via 1,249 national 1:50,000 topographic maps
- Near-full coverage of Japan via 6 US 1:500,000 TPC aeronautical topographic maps
- Full coverage of Japan via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs

(Digital Elevation Models: 5m - 10m resolution):

- Akashi – 1 Russian military 1:10,000 topographic City Plan map
- Aomori – 1 Russian military 1:10,000 topographic City Plan map
- Asahikawa – 2 Russian military 1:10,000 topographic City Plan maps
- Ashikaga – 1 Russian military 1:10,000 topographic City Plan map
- Chiba – 2 Russian military 1:10,000 topographic City Plan maps
- Fujisawa – 1 Russian military 1:10,000 topographic City Plan map
- Fukui – 1 Russian military 1:10,000 topographic City Plan map
- Fukuoka – 6 Russian military 1:10,000 topographic City Plan maps
- Funabashi – 2 Russian military 1:10,000 topographic City Plan maps
- Gifu – 2 Russian military 1:10,000 topographic City Plan maps
- Hachioji – 1 Russian military 1:10,000 topographic City Plan map
- Hakodate – 1 Russian military 1:10,000 topographic City Plan map
- Himeji, Tatsuno – 1 Russian military 1:25,000 topographic City Plan map
- Hirosaki – 1 Russian military 1:10,000 topographic City Plan map
- Hiroshima – 2 Russian military 1:10,000 topographic City Plan maps
- Hitachi – 1 Russian military 1:10,000 topographic City Plan map
- Ichinomiya – 1 Russian military 1:10,000 topographic City Plan map
- Ise – 1 Russian military 1:10,000 topographic City Plan map
- Ishinomaki – 1 Russian military 1:10,000 topographic City Plan map
- Iwakuni – 2 Russian military 1:10,000 topographic City Plan maps
- Kagoshima – 1 Russian military 1:10,000 topographic City Plan map
- Kakogawa, Takasago – 2 Russian military 1:10,000 topographic City Plan maps
- Kanazawa – 1 Russian military 1:10,000 topographic City Plan map
- Kawagoe – 1 Russian military 1:10,000 topographic City Plan map

Japan (continued)

Kawasaki – 1 Russian military 1:15,000 topographic City Plan map
Kishiwada – 1 Russian military 1:10,000 topographic City Plan map
Kitakyushu, Shimonoseki – 4 Russian military 1:10,000 topographic City Plan maps
Kobe – 2 Russian military 1:25,000 topographic City Plan maps
Kochi – 1 Russian military 1:10,000 topographic City Plan map
Kofu – 1 Russian military 1:10,000 topographic City Plan map

Japan (continued)

Takamatsu – 1 Russian military 1:10,000 topographic City Plan map
Takaoka – 1 Russian military 1:10,000 topographic City Plan map
Takasaki – 1 Russian military 1:10,000 topographic City Plan map
Tokushima – 1 Russian military 1:10,000 topographic City Plan map
Tokyo – 4 Russian military 1:20,000 topographic City Plan maps
Tottori – 1 Russian military 1:10,000 topographic City Plan map
Toyama – 1 Russian military 1:15,000 topographic City Plan map
Toyohashi – 2 Russian military 1:10,000 topographic City Plan maps
Tsu, Hashikita – 1 Russian military 1:10,000 topographic City Plan map
Tsurusaki, Sakanoichi – 2 Russian military 1:10,000 topographic City Plan maps
Urawa – 1 Russian military 1:25,000 topographic City Plan map
Utsunomiya – 2 Russian military 1:10,000 topographic City Plan maps
Wakayama – 1 Russian military 1:10,000 topographic City Plan map
Yamagata – 1 Russian military 1:10,000 topographic City Plan map
Yamaguchi – 1 Russian military 1:10,000 topographic City Plan map
Yatsushiro – 1 Russian military 1:10,000 topographic City Plan map
Yawata – 1 Russian military 1:15,000 topographic City Plan map
Yokkaichi – 2 Russian military 1:10,000 topographic City Plan maps
Yokohama – 1 Russian military 1:25,000 topographic City Plan map
Yokosuka – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Japan–low-cost, rapid delivery:

Japan VMAP-0 – US NGA 1:1,000,000 vector mapping
Japan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Japan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Japan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Japan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Japan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Japan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Japan (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Jordan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Jordan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Jordan via 86 Russian military 1:50,000 topographic maps
Full coverage of Jordan via 171 National 1:50,000 topographic maps
Full coverage of Jordan via 76 Russian military 1:100,000 topographic maps
Full coverage of Jordan via 27 Russian military 1:200,000 topographic maps
Full coverage of Jordan via 14 US NGA 1:250,000 JOG topographic maps
20% coverage of Jordan via 1 US NGA 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Amman – 2 Russian military 1:10,000 topographic City Plan maps
Irbid – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Jordan—low-cost, rapid delivery:

Jordan VMAP-0 – US NGA 1:1,000,000 vector mapping
Jordan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Jordan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Jordan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Jordan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Jordan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Jordan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Jordan (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Juan del Nova Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Juan del Nova Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Juan del Nova Island via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Juan del Nova Island via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Juan del Nova Island—low-cost, rapid delivery:

Juan del Nova Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Juan del Nova Island SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Juan del Nova Island SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Juan del Nova Island GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Juan del Nova Island GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Juan del Nova Island

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Juan del Nova Island

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Kazakhstan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Kazakhstan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Kazakhstan via 8,300 Russian military 1:50,000 topographic maps
Full coverage of Kazakhstan via 2,148 Russian military 1:100,000 topographic maps
Full coverage of Kazakhstan via 601 Russian military 1:200,000 topographic maps
55% coverage of Kazakhstan via 122 US NGA 1:250,000 JOG topographic maps
Full coverage of Kazakhstan via 20 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Kazakhstan via 7 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Aktyubinsk – 1 Russian military 1:25,000 topographic City Plan map
Aktyubinsk – 6 Russian military 1:10,000 topographic City Plan maps
Alma-Ata (Almaty) – 1 Russian military 1:25,000 topographic City Plan map
Alma-Ata (Almaty) – 9 Russian military 1:10,000 topographic City Plan maps
Arkalyk – 1 Russian military 1:10,000 topographic City Plan map
Arys – 1 Russian military 1:10,000 topographic City Plan map
Ayaguz – 1 Russian military 1:10,000 topographic City Plan map
Balkhash – 2 Russian military 1:10,000 topographic City Plan maps
Chimkent – 2 Russian military 1:10,000 topographic City Plan maps
Dzhambul – 6 Russian military 1:10,000 topographic City Plan maps
Dzhezkazgan – 4 Russian military 1:10,000 topographic City Plan maps
Ekibastuz – 4 Russian military 1:10,000 topographic City Plan maps
Guryev (Atyrau) – 1 Russian military 1:10,000 topographic City Plan map
Guryev (Atyrau) – 1 Russian military 1:25,000 topographic City Plan map
Guryev (Atyrau) – 2 Russian military 1:10,000 topographic City Plan maps
Kachar – 1 Russian military 1:10,000 topographic City Plan map
Kapchagay – 2 Russian military 1:10,000 topographic City Plan maps
Karaganda – 2 Russian military 1:25,000 topographic City Plan maps
Kantau – 2 Russian military 1:10,000 topographic City Plan maps
Kokchetav – 2 Russian military 1:10,000 topographic City Plan maps
Kustanay – 6 Russian military 1:10,000 topographic City Plan maps
Kzyl-Orda – 2 Russian military 1:10,000 topographic City Plan maps
Leninogorsk – 2 Russian military 1:10,000 topographic City Plan maps
Panfilov (Zharkent) – 1 Russian military 1:10,000 topographic City Plan map
Pavlodar – 4 Russian military 1:10,000 topographic City Plan maps
Petropavlosk – 4 Russian military 1:10,000 topographic City Plan maps

Kazakhstan (continued)

Rudnyi – 1 Russian military 1:10,000 topographic City Plan map
Rudnyi – 2 Russian military 1:25,000 topographic City Plan maps
Sary-Ozek – 1 Russian military 1:10,000 topographic City Plan map
Semipalatinsk – 1 Russian military 1:25,000 topographic City Plan map
Serebryansk – 1 Russian military 1:10,000 topographic City Plan map
Shevchenko (Aktau) – 2 Russian military 1:10,000 topographic City Plan maps
Stepnogorsk – 1 Russian military 1:25,000 topographic City Plan map
Taldy-Kurgan – 1 Russian military 1:10,000 topographic City Plan map
Temirtau – 1 Russian military 1:25,000 topographic City Plan map
Topar – 1 Russian military 1:10,000 topographic City Plan map
Tselinograd (Akmola) – 1 Russian military 1:25,000 topographic City Plan map
Turkestan – 2 Russian military 1:10,000 topographic City Plan maps
Uralsk – 4 Russian military 1:10,000 topographic City Plan maps
Ushtobe – 1 Russian military 1:10,000 topographic City Plan map
Ust-Kamenogorsk – 6 Russian military 1:10,000 topographic City Plan maps
Zaysan – 1 Russian military 1:10,000 topographic City Plan map
Zyryanovsk – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Kazakhstan–low-cost, rapid delivery:

Kazakhstan VMAP-0 – US NGA 1:1,000,000 vector mapping
Kazakhstan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Kenya

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Kenya including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

- Near-full coverage of Kenya via 640 national 1:50,000 topographic maps
- Near-full coverage of Kenya via 133 national 1:100,000 topographic maps
- Full coverage of Kenya via 63 national 1:250,000 topographic maps
- Partial coverage of Kenya via 57 Russian military 1:100,000 topographic maps
- Partial coverage of Kenya via 23 Russian military 1:200,000 topographic maps
- 82% coverage of Kenya via 40 national 1:250,000 topographic maps
- 92% coverage of Kenya via 46 US NGA 1:250,000 JOG topographic maps
- Partial coverage of Kenya via 4 US 1:500,000 TPC aeronautical topographic maps
- Full coverage of Kenya via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

- Nairobi – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Kenya—low-cost, rapid delivery:

- Kenya VMAP-0 – US NGA 1:1,000,000 vector mapping
- Kenya SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
- Kenya SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
- Kenya GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
- Kenya GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

- High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Kenya
- Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Kenya

Image processing, vector feature extraction, classification and terrain modeling:

- Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

- Classification services including land-use, land-cover, vegetation and impervious surface mapping

Kenya (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Kiribati

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Kiribati including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Kiribati via 1 US 1:250,000 JOG topographic map

Partial coverage of Kiribati via 1 US 1:500,000 TPC aeronautical topographic map

Off-shelf global data of Kiribati—low-cost, rapid delivery:

Kiribati VMAP-0 – US NGA 1:1,000,000 vector mapping

Kiribati SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Kiribati SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Kiribati GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Kiribati GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, Digital-Globe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Kiribati

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Kiribati

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Land Info offers a variety of digital topographic map data and satellite imagery products of Kosovo including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Kosovo via 109 national 1:25,000 topographic maps
Full coverage of Kosovo via 48 Russian military 1:50,000 topographic maps
Full coverage of Kosovo via 28 US NGA 1:50,000 TLM topographic maps
Full coverage of Kosovo via 16 Russian military 1:100,000 topographic maps
Full coverage of Kosovo via 6 Russian military 1:200,000 topographic maps
Full coverage of Kosovo via 4 US NGA 1:250,000 JOG topographic maps
Full coverage of Kosovo via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Pristina – 1 US military 1:20,000 topographic City Graphic map

Off-shelf global data of Kiribati–low-cost, rapid delivery:

Kosovo VMAP-0 – US NGA 1:1,000,000 vector mapping
Kosovo SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Kosovo SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Kosovo GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Kosovo GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Kosovo
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Kosovo

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

KOSOVO (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Kuwait including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Kuwait via 23 Russian military 1:100,000 topographic maps
Full coverage of Kuwait via 10 Russian military 1:200,000 topographic maps
Full coverage of Kuwait via 6 US NGA 1:250,000 JOG topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kuwait (Al Kuwayt) – 6 Russian military 1:10,000 topographic City Plan maps
Mina al-Ahmadi – 3 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Kuwait—low-cost, rapid delivery:

Kuwait VMAP-0 – US NGA 1:1,000,000 vector mapping
Kuwait SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Kuwait SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Kuwait GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Kuwait GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Kuwait
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Kuwait

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Kuwait (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Kyrgyzstan

Land Info offers a variety of digital topographic map data and satellite imagery products of Kyrgyzstan including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Kyrgyzstan via 600 Russian military 1:50,000 topographic maps
Full coverage of Kyrgyzstan via 171 Russian military 1:100,000 topographic maps
Full coverage of Kyrgyzstan via 54 Russian military 1:200,000 topographic maps
86% coverage of Kyrgyzstan via 18 US NGA 1:250,000 JOG topographic maps
Full coverage of Kyrgyzstan via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Kyrgyzstan via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Frunze (Bishkek) – 6 Russian military 1:10,000 topographic City Plan maps
Osh – 2 Russian military 1:10,000 topographic City Plan maps
Przhevalsk – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Kyrgyzstan—low-cost, rapid delivery:

Kyrgyzstan VMAP-0 – US NGA 1:1,000,000 vector mapping
Kyrgyzstan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Kyrgyzstan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Kyrgyzstan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Kyrgyzstan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Kyrgyzstan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Kyrgyzstan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Kyrgyzstan (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Laos

Land Info offers a variety of digital topographic map data and satellite imagery products of Laos including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Laos via 388 national/US NGA 1:50,000 TLM topographic maps

Full coverage of Laos via 584 Russian military 1:50,000 topographic maps

Full coverage of Laos via 173 Russian military 1:100,000 topographic maps

Full coverage of Laos via 55 Russian military 1:200,000 topographic maps

Partial coverage of Laos via 7 US NGA 1:250,000 JOG topographic maps

Full coverage of Laos via 5 US 1:500,000 TPC aeronautical topographic maps

90% coverage of Laos via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Vientiane, Laos – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Laos—low-cost, rapid delivery:

Laos VMAP-0 – US NGA 1:1,000,000 vector mapping

Laos SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Laos SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Laos GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Laos GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Laos

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Laos

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Laos (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Latvia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Latvia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Latvia via 284 Russian military 1:50,000 topographic maps

Full coverage of Latvia via 28 Russian military 1:200,000 topographic maps

Full coverage of Latvia via 12 US NGA 1:250,000 JOG topographic maps

Full coverage of Latvia via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Daugavpils – 4 Russian military 1:10,000 topographic City Plan maps

Liepaja – 2 Russian military 1:10,000 topographic City Plan maps

Petrodvorets – 1 Russian military 1:10,000 topographic City Plan map

Rezenke – 1 Russian military 1:10,000 topographic City Plan map

Riga – 6 Russian military 1:10,000 topographic City Plan maps

Valmijera – 1 Russian military 1:10,000 topographic City Plan map

Ventspils – 2 Russian military 1:10,000 topographic City Plan maps

Vileyka – 1 Russian military 1:10,000 topographic City Plan map

Yekabpils – 1 Russian military 1:10,000 topographic City Plan map

Yelgava (Jelgava) – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Latvia—low-cost, rapid delivery:

Latvia VMAP-0 – US NGA 1:1,000,000 vector mapping

Latvia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Latvia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Latvia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Latvia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Latvia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Latvia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation,

Latvia (continued)

natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Lebanon

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Lebanon including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Lebanon via 43 Russian military 1:50,000 topographic maps

Full coverage of Lebanon via 14 Russian military 1:100,000 topographic maps

Full coverage of Lebanon via 5 Russian military 1:200,000 topographic maps

Full coverage of Lebanon via 4 US NGA 1:250,000 JOG topographic maps

Full coverage of Lebanon via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Beirut (Bayrut) – 2 Russian military 1:10,000 topographic City Plan maps

Sidon (Sayda) – 1 Russian military 1:10,000 topographic City Plan map

Tripoli (Tarabulus) – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Lebanon—low-cost, rapid delivery:

Lebanon VMAP-0 – US NGA 1:1,000,000 vector mapping

Lebanon SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Lebanon SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Lebanon GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Lebanon GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Lebanon

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Lebanon

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Lebanon (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Liberia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Liberia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

Partial coverage of Liberia via 76 national 1:50,000 topographic maps
Full coverage of Liberia via 24 Russian military 1:200,000 topographic maps
Full coverage of Liberia via 12 US NGA 1:250,000 JOG topographic maps
Full coverage of Liberia via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Liberia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Liberia—low-cost, rapid delivery:

Liberia VMAP-0 – US NGA 1:1,000,000 vector mapping
Liberia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Liberia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Liberia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Liberia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Liberia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Liberia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Liberia (continued)

Libya

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Libya including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Libya via 412 Russian military 1:100,000 topographic maps
Full coverage of Libya via 272 Russian military 1:200,000 topographic maps
Partial coverage of Libya via 59 US NGA 1:250,000 JOG topographic maps
Full coverage of Libya via 17 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Libya via 7 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bengasi (Banghasi) – 1 Russian military 1:10,000 topographic City Plan map
Tripoli (Tarabulus) – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Libya—low-cost, rapid delivery:

Libya VMAP-0 – US NGA 1:1,000,000 vector mapping
Libya SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Libya SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Libya GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Libya GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Libya
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Libya

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Libya (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Liechtenstein

Land Info offers a variety of digital topographic map data and satellite imagery products of Liechtenstein including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

- Full coverage of Liechtenstein via 4 Swiss national 1:50,000 topographic maps
- Full coverage of Liechtenstein via 4 Russian military 1:50,000 topographic maps
- Full coverage of Liechtenstein via 1 Russian military 1:200,000 topographic map
- Full coverage of Liechtenstein via 1 US 1:500,000 TPC aeronautical topographic map
- Full coverage of Liechtenstein via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Liechtenstein—low-cost, rapid delivery:

- Liechtenstein VMAP-0 – US NGA 1:1,000,000 vector mapping
- Liechtenstein SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
- Liechtenstein SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
- Liechtenstein GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
- Liechtenstein GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

- High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Liechtenstein
- Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Liechtenstein

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Liechtenstein (continued)

Lithuania

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Lithuania including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Lithuania via 270 Russian military 1:50,000 topographic maps
Full coverage of Lithuania via 25 Russian military 1:200,000 topographic maps
Full coverage of Lithuania via 12 US NGA 1:250,000 JOG topographic maps
Full coverage of Lithuania via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kaunas – 4 Russian military 1:10,000 topographic City Plan maps
Klaipeda– 2 Russian military 1:10,000 topographic City Plan maps
Shaulyai (Siauliai) – 4 Russian military 1:10,000 topographic City Plan maps
Vilnius (Vilnius) – 6 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Lithuania—low-cost, rapid delivery:

Lithuania VMAP-0 – US NGA 1:1,000,000 vector mapping
Lithuania SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Lithuania SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Lithuania GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Lithuania GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Lithuania
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Lithuania

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Lithuania (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Luxembourg

Land Info offers a variety of digital topographic map data and satellite imagery products of Luxembourg including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Luxembourg via 1 national 1:5,000 topographic map

Full coverage of Luxembourg via 1 US 1:500,000 TPC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Luxembourg – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Luxembourg—low-cost, rapid delivery:

Luxembourg VMAP-0 – US NGA 1:1,000,000 vector mapping

Luxembourg SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Luxembourg SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Luxembourg GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Luxembourg GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Luxembourg

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Luxembourg

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Luxembourg (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Macedonia

Land Info offers a variety of digital topographic map data and satellite imagery products of Macedonia including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Macedonia via 51 US NGA 1:50,000 TLM topographic maps
Full coverage of Macedonia via 87 Russian military 1:50,000 topographic maps
Full coverage of Macedonia via 28 Russian military 1:100,000 topographic maps
Full coverage of Macedonia via 10 Russian military 1:200,000 topographic maps
Full coverage of Macedonia via 5 US NGA 1:250,000 JOG topographic maps
Full coverage of Macedonia via 1 US 1:1,000,000 ONC topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Skopje – 2 Russian military 1:10,000 topographic City Plan maps
Skopje – 1 US NGA 1: 20,000 topographic City Graphic map

Off-shelf global data of Macedonia—low-cost, rapid delivery:

Macedonia VMAP-0 – US NGA 1:1,000,000 vector mapping
Macedonia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Macedonia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Macedonia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Macedonia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Macedonia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Macedonia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Macedonia (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Madagascar

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Madagascar including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Madagascar via 107 Russian military 1:200,000 topographic maps
Partial coverage of Madagascar via 9 US NGA 1:250,000 JOG topographic maps
Full coverage of Madagascar via 8 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Madagascar via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Antananarivo – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Madagascar–low-cost, rapid delivery:

Madagascar VMAP-0 – US NGA 1:1,000,000 vector mapping
Madagascar SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Madagascar SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Madagascar GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Madagascar GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Madagascar
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Madagascar

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Madagascar (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Malawi

Land Info offers a variety of digital topographic map data and satellite imagery products of Malawi including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Malawi via 29 Russian military 1:200,000 topographic maps

50% coverage of Malawi via 12 US NGA 1:250,000 JOG topographic maps

Full coverage of Malawi via 2 US 1:1,000,000 ONC topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Blantyre - 1:25,000 scale national topographic City Plan map

Off-shelf global data of Malawi—low-cost, rapid delivery:

Malawi VMAP-0 – US NGA 1:1,000,000 vector mapping

Malawi SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Malawi SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Malawi GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Malawi GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Malawi

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Malawi

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Malawi (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Malaysia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Malaysia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Malaysia via 135 Russian military 1:50,000 topographic maps

Partial coverage of Malaysia via 37 Russian military 1:200,000 topographic maps

Partial coverage of Malaysia via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of peninsular Malaysia via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

George Town (Pinang), Butterworth – 1 Russian military 1:25,000 topographic City Plan map

Ipoh – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Malaysia—low-cost, rapid delivery:

Malaysia VMAP-0 – US NGA 1:1,000,000 vector mapping

Malaysia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Malaysia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Malaysia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Malaysia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Malaysia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Malaysia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Malaysia (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map data and satellite imagery products of Mali including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Mali via 204 Russian military 1:200,000 topographic maps
45% coverage of Mali via 38 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Mali via 10 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Mali via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bamako – 2 Russian military 1:10,000 topographic City Plan map
Bamako Feuille Nord-Est - 1:20,000 scale national topographic City Plan map
Bamako Feuille Sud-Est - 1:20,000 scale national topographic City Plan map

Off-shelf global data of Mali—low-cost, rapid delivery:

Mali VMAP-0 – US NGA 1:1,000,000 vector mapping
Mali SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Mali SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Mali GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Mali GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Mali
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Mali

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Mali (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Maldives

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Maldives including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Maldives via 8 US 1:250,000 JOG topographic maps

Near-full coverage of Maldives via 2 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Maldives via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Maldives—low-cost, rapid delivery:

Maldives VMAP-0 – US NGA 1:1,000,000 vector mapping

Maldives SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Maldives SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Maldives GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Maldives GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Maldives

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Maldives

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Malta

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Malta including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Malta via 3 national 1:25,000 topographic maps
Full coverage of Malta via 2 Russian military 1:100,000 topographic maps
Full coverage of Malta via 1 Russian military 1:200,000 topographic map
Full coverage of Malta via 1 US 1:500,000 TPC aeronautical topographic map

Off-shelf global data of Malta—low-cost, rapid delivery:

Malta VMAP-0 – US NGA 1:1,000,000 vector mapping
Malta SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Malta SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Malta GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Malta GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Malta
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Malta

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Marshall Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Marshall Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Marshall Island via 3 US 1:500,000 TPC aeronautical topographic maps

Off-shelf global data of Marshall Island—low-cost, rapid delivery:

Marshall Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Marshall Island SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Marshall Island SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Marshall Island GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Marshall Island GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Marshall Island

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Marshall Island

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Martinique

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Martinique including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

- Full coverage of Martinique via 3 national 1:25,000 topographic maps
- Full coverage of Martinique via 1 US NGA 1:250,000 JOG topographic map
- Full coverage of Martinique via 1 US 1:500,000 TPC aeronautical topographic map
- Full coverage of Martinique via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Martinique—low-cost, rapid delivery:

- Martinique VMAP-0 – US NGA 1:1,000,000 vector mapping
- Martinique SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
- Martinique SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
- Martinique GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
- Martinique GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

- High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Martinique
- Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Martinique

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Mauritania

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Mauritania including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Mauritania via 137 Russian military 1:100,000 topographic maps

Full coverage of Mauritania via 174 Russian military 1:200,000 topographic maps

45% coverage of Mauritania via 36 US NGA 1:250,000 JOG topographic maps

Near-full coverage of Mauritania via 7 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Mauritania via 5 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Mauritania—low-cost, rapid delivery:

Mauritania VMAP-0 – US NGA 1:1,000,000 vector mapping

Mauritania SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Mauritania SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Mauritania GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Mauritania GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Mauritania

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Mauritania

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Mexico

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Mexico including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Mexico via 2,295 national 1:50,000 topographic maps

Full coverage of Mexico via 122 national 1:250,000 topographic maps

65% coverage of Mexico via 88 US NGA 1:250,000 JOG topographic maps

Near-full coverage of Mexico via 16 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Mexico via 8 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Chihuahua – 1 Russian military 1:25,000 topographic City Plan map

Durango – 1 Russian military 1:25,000 topographic City Plan map

Guadalajara – 1 Russian military 1:25,000 topographic City Plan map

Hermosillo – 1 Russian military 1:10,000 topographic City Plan map

Leon – 1 Russian military 1:10,000 topographic City Plan map

Mexicali, Calexico (USA) – 1 Russian military 1:25,000 topographic City Plan map

Mexico City – 2 Russian military 1:25,000 topographic City Plan maps

Monterrey – 1 Russian military 1:25,000 topographic City Plan map

Puebla – 1 Russian military 1:25,000 topographic City Plan map

San Luis Potosi – 1 Russian military 1:25,000 topographic City Plan map

Tampico – 1 Russian military 1:25,000 topographic City Plan map

Torreon, Gomez Palacio – 1 Russian military 1:25,000 topographic City Plan map

Veracruz – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Mexico—low-cost, rapid delivery:

Mexico VMAP-0 – US NGA 1:1,000,000 vector mapping

Mexico SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Mexico SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Mexico GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Mexico GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Mexico

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Mexico

Mexico (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Micronesia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Micronesia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of the Truk Islands (also known as Chuk, Chuuk, Ruk, Hogolu or Hogoley Islands), via 9 USGS 1:10,000 topographic maps

Full coverage of the Truk Islands (also known as Chuk, Chuuk, Ruk, Hogolu or Hogoley Islands), via 6 USGS 1:25,000 topographic maps

Full coverage of the Yap Islands via 4 USGS 1:10,000 topographic maps

Full coverage of the Yap Islands via 1 USGS 1:25,000 topographic map

70% coverage of Micronesia via 4 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Micronesia via 5 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Micronesia—low-cost, rapid delivery:

Micronesia VMAP-0 – US NGA 1:1,000,000 vector mapping

Micronesia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Micronesia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Micronesia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Micronesia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Micronesia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Micronesia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Micronesia (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Midway Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Midway Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Midway Island via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Midway Island—low-cost, rapid delivery:

Midway Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Midway Island SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Midway Island SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Midway Island GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Midway Island GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Midway Island

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Midway Island

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Moldova

Land Info offers a variety of digital topographic map data and satellite imagery products of Moldova including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Moldova via 131 Russian military 1:50,000 topographic maps
Full coverage of Moldova via 40 Russian military 1:100,000 topographic maps
Full coverage of Moldova via 13 Russian military 1:200,000 topographic maps
Full coverage of Moldova via 7 US NGA 1:250,000 JOG topographic maps
Full coverage of Moldova via 2 US 1:1,000,000 ONC topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Beltsi (Balti) – 1 Russian military 1:10,000 topographic City Plan map
Bendery (Tighina) – 2 Russian military 1:10,000 topographic City Plan maps
Kishinev – 4 Russian military 1:10,000 topographic City Plan maps
Tiraspol – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Moldova—low-cost, rapid delivery:

Moldova VMAP-0 – US NGA 1:1,000,000 vector mapping
Moldova SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Moldova SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Moldova GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Moldova GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Moldova
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Moldova

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Moldova (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Monaco

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Monaco including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Monaco via 1 French national 1:25,000 topographic map

Full coverage of Monaco via 1 Russian military 1:200,000 topographic map

Full coverage of Monaco via 1 US 1:1,000,000 ONC topographic map

Off-shelf global data of Monaco—low-cost, rapid delivery:

Monaco VMAP-0 – US NGA 1:1,000,000 vector mapping

Monaco SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Monaco SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Monaco GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Monaco GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Monaco

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Monaco

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Mongolia

Land Info offers a variety of digital topographic map data and satellite imagery products of Mongolia including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Mongolia via 2,140 Russian military 1:50,000 topographic maps
Full coverage of Mongolia via 1,221 Russian military 1:100,000 topographic maps
Full coverage of Mongolia via 338 Russian military 1:200,000 topographic maps
Partial coverage of Mongolia via 3 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Mongolia via 13 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Mongolia via 6 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Choybalsan – 1 Russian military 1:10,000 topographic City Plan map
Ulaanbaatar – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Mongolia—low-cost, rapid delivery:

Mongolia VMAP-0 – US NGA 1:1,000,000 vector mapping
Mongolia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Mongolia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Mongolia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Mongolia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Mongolia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Mongolia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Mongolia (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Montenegro

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Montenegro including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Montenegro via 34 US NGA 1:50,000 TLM topographic maps
Full coverage of Montenegro via 59 Russian military 1:50,000 topographic maps
Full coverage of Montenegro via 19 Russian military 1:100,000 topographic maps
Full coverage of Montenegro via 9 Russian military 1:200,000 topographic maps
Full coverage of Montenegro via 5 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Montenegro via 2 US 1:500,000 TPC aeronautical topographic map
Full coverage of Montenegro via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Podgorica (formerly Titograd) – 1 US military 1:20,000 topographic City Graphic map
Tivat – 1 US military 1:25,000 topographic City Graphic map

Off-shelf global data of Montenegro –low-cost, rapid delivery:

Montenegro VMAP-0 – US NGA 1:1,000,000 vector mapping
Montenegro SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Montenegro SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Montenegro GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Montenegro GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Montenegro
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Montenegro

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Montenegro (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Montserrat

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Montserrat including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

Full coverage of Montserrat via 1 national 1:25,000 topographic map

Full coverage of Montserrat via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Montserrat via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Montserrat—low-cost, rapid delivery:

Montserrat VMAP-0 – US NGA 1:1,000,000 vector mapping

Montserrat SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Montserrat SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Montserrat GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Montserrat GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Montserrat

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Montserrat

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Morocco including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Morocco via 189 Russian military 1:100,000 topographic maps

Full coverage of Morocco via 86 Russian military 1:200,000 topographic maps

Partial coverage of Morocco via 13 US NGA 1:250,000 JOG topographic maps

70% coverage of Morocco via 34 national 1:250,000 topographic maps

Full coverage of Morocco via 6 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Morocco via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Agadir - Aéroport Al Massira. 1:10,000 scale national topographic city plan map, publ. 2005

Agadir – Tikiouine – 1:10,000 scale national topographic city plan map, publ. 2005

Aït Melloul – 1:10,000 scale national topographic city plan map, publ. 2005

Arfoud – 1:5,000 scale national topographic city plan map, publ. 2007

Assilah – 1:10,000 scale national topographic city plan map, publ. 2006

Berkane – 1:10,000 scale national topographic city plan map, publ. 2005

Biougra – 1:7,500 scale national topographic city plan map, publ. 2004

Bouznika – 1:10,000 scale national topographic city plan map, publ. 2002

Casablanca (Dar-el-Beida) – 2 Russian military 1:10,000 topographic City Plan maps

Chefchaouen – 1:5,000 scale national topographic city plan map, publ. 2006

El Hoceima – 1:10,000 scale national topographic city plan map, publ. 2003

El Kalaa des Sraghna – 1:10,000 scale national topographic city plan map, publ. 2006

Er-Rich – 1:5,000 scale national topographic city plan map, publ. 2002

Essaouira – 1:10,000 scale national topographic city plan map, publ. 2002

Fes (Fez) – 1 Russian military 1:10,000 topographic City Plan map

Ifrane – 1:7,500 scale national topographic city plan map, publ. 2004

Inezgane – 1:10,000 scale national topographic city plan map, publ. 2005

Kenitra – 2 Russian military 1:10,000 topographic City Plan maps

Ksar-El Kebir. 1:10,000 scale national topographic city plan map, publ. 2005

Larache – 1:10,000 scale national topographic city plan map, publ. 2002

Marrakech – 1:10,000 scale national topographic city plan map, publ. 2002. 4 maps

Marrakech (Marrakesh) – 1 Russian military 1:10,000 topographic City Plan map

Meknes – 1:10,000 scale national topographic city plan map, publ. 2002

Meknes – 1 Russian military 1:10,000 topographic City Plan map

Midelt – 1:7,500 scale national topographic city plan map, publ. 2006

Morocco (continued)

Ouarzazate – 1:10,000 scale national topographic city plan map, publ. 2006
Ouezzane – 1:5,000 scale national topographic city plan map, publ. 2006
Oujda – 1:7,500. 2002 scale national topographic city plan map, publ. 4 maps
Oujda – 1 Russian military 1:10,000 topographic City Plan map
Rabat, Sale – 2 Russian military 1:10,000 topographic City Plan maps
Safi – 1 Russian military 1:10,000 topographic City Plan map
Sefrou – 1:7,500 scale national topographic city plan map, publ. 2004
Settat – 1:10,000 scale national topographic city plan map, publ. 2005
Tanger (Tangier, Tangiers) – 1:10,000 scale national topographic city plan map, publ. 2005. 3 maps
Tangiers – 1 Russian military 1:10,000 topographic City Plan map
Taza – 1:10,000 scale national topographic city plan map, publ. 2005
Temara – 1:10,000 scale national topographic city plan map, publ. 2002. 2 maps
Tiflet – 1:10,000 scale national topographic city plan map, publ. 2006
Zagora – 1:10,000 scale national topographic city plan map, publ. 2007

Off-shelf global data of Morocco–low-cost, rapid delivery:

Morocco VMAP-0 – US NGA 1:1,000,000 vector mapping
Morocco SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Morocco SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Morocco GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Morocco GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Morocco
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Morocco

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Mozambique

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Mozambique including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Mozambique via 146 Russian military 1:200,000 topographic maps
86% coverage of Mozambique via 60 US NGA 1:250,000 JOG topographic maps
Partial coverage of Mozambique via 1 US 1:500,000 TPC aeronautical topographic map
Partial coverage of Mozambique via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Maputo – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Mozambique—low-cost, rapid delivery:

Mozambique VMAP-0 – US NGA 1:1,000,000 vector mapping
Mozambique SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Mozambique SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Mozambique GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Mozambique GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Mozambique
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Mozambique

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Mozambique (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.
in archive or has to be custom-acquired.

Namibia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Namibia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Namibia via 1,417 national 1:50,000 topographic maps
Full coverage of Namibia via 140 Russian military 1:200,000 topographic maps
Partial coverage of Namibia via 22 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Namibia via 5 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Namibia via 4 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Namibia—low-cost, rapid delivery:

Namibia VMAP-0 – US NGA 1:1,000,000 vector mapping
Namibia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Namibia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Namibia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Namibia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Namibia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Namibia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Nepal

Land Info offers a variety of digital topographic map data and satellite imagery products of Nepal including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Nepal via 115 national 1:25,000 topographic maps
Partial coverage of Nepal via 588 national 1:50,000 topographic maps
(The combination of the above two scales comprises complete country coverage)
Partial coverage of Nepal via 11 Russian military 1:100,000 topographic maps
Full coverage of Nepal via 47 Russian military 1:200,000 topographic maps
Near-full coverage of Nepal via 14 US NGA 1:250,000 JOG topographic maps
Full coverage of Nepal via 4 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Nepal via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kathmandu, Patan, Bhaktapur – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Nepal—low-cost, rapid delivery:

Nepal VMAP-0 – US NGA 1:1,000,000 vector mapping
Nepal SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Nepal SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Nepal GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Nepal GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Nepal
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Nepal

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Nepal (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

The Netherlands (Holland)

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of The Netherlands (Holland) including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of The Netherlands (Holland) via 101 national 1:50,000 topographic maps

Full coverage of The Netherlands (Holland) via 162 Russian military 1:50,000 topographic maps

Full coverage of The Netherlands (Holland) via 52 Russian military 1:100,000 topographic maps

Full coverage of The Netherlands (Holland) via 18 Russian military 1:200,000 topographic maps

Full coverage of The Netherlands (Holland) via 1 US 1:500,000 TPC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Amersfoort – 1 Russian military 1:10,000 topographic City Plan map

Amsterdam – 4 Russian military 1:10,000 topographic City Plan maps

Apeldoorn – 2 Russian military 1:10,000 topographic City Plan maps

Arnhem – 2 Russian military 1:10,000 topographic City Plan maps

Breda – 1 Russian military 1:10,000 topographic City Plan map

Den Helder – 1 Russian military 1:10,000 topographic City Plan map

Dordrecht – 1 Russian military 1:10,000 topographic City Plan map

Eindhoven – 2 Russian military 1:10,000 topographic City Plan maps

Enschede – 1 Russian military 1:10,000 topographic City Plan map

Groningen – 1 Russian military 1:10,000 topographic City Plan map

Haarlem, Velsen, Beverwijk, Heemstede, IJmuiden – 3 Russian military 1:10,000 topographic City Plan maps

Hengelo, Borne, Oldenzaal – 2 Russian military 1:10,000 topographic City Plan maps

Hilversum – 1 Russian military 1:10,000 topographic City Plan map

Leeuwarden – 1 Russian military 1:10,000 topographic City Plan map

Leiden – 2 Russian military 1:10,000 topographic City Plan maps

Maastricht – 1 Russian military 1:10,000 topographic City Plan map

Nijmegen – 2 Russian military 1:10,000 topographic City Plan maps

Rotterdam – 2 Russian military 1:10,000 topographic City Plan maps

The Hague ('s-Gravenhage) – 2 Russian military 1:10,000 topographic City Plan maps

Tilburg – 1 Russian military 1:10,000 topographic City Plan map

Utrecht – 2 Russian military 1:10,000 topographic City Plan maps

Zaanstad, Wormerveer, Krommenie – 2 Russian military 1:10,000 topographic City Plan maps

Zwolle – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of The Netherlands (Holland)–low-cost, rapid delivery:

The Netherlands (Holland) VMAP-0 – US NGA 1:1,000,000 vector mapping

The Netherlands (Holland) SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

The Netherlands (Holland) (continued)

The Netherlands (Holland) SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

The Netherlands (Holland) GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

The Netherlands (Holland) GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of The Netherlands (Holland)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of The Netherlands (Holland)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

The Netherlands Antilles

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of The Netherlands Antilles including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of The Netherlands Antilles via 2 US NGA 1:250,000 JOG topographic maps

Full coverage of The Netherlands Antilles via 3 US 1:500,000 TPC aeronautical topographic maps

Full coverage of The Netherlands Antilles via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of The Netherlands Antilles—low-cost, rapid delivery:

The Netherlands Antilles VMAP-0 – US NGA 1:1,000,000 vector mapping

The Netherlands Antilles SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

The Netherlands Antilles SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

The Netherlands Antilles GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

The Netherlands Antilles GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of The Netherlands Antilles

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of The Netherlands Antilles

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

New Caledonia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of New Caledonia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of New Caledonia via 41 national 1:50,000 topographic maps

Full coverage of New Caledonia via 7 national 1:200,000 topographic maps

Full coverage of New Caledonia via 2 US 1:500,000 TPC aeronautical topographic maps

Off-shelf global data of New Caledonia—low-cost, rapid delivery:

New Caledonia VMAP-0 – US NGA 1:1,000,000 vector mapping

New Caledonia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

New Caledonia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

New Caledonia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

New Caledonia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of New Caledonia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of New Caledonia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

New Zealand

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of New Zealand including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of New Zealand via 324 national 1:50,000 topographic maps

Full coverage of New Zealand via 18 national 1:250,000 topographic maps

Partial coverage of New Zealand via 6 US 1:500,000 TPC aeronautical topographic maps

Full coverage of New Zealand via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Christchurch – 2 Russian military 1:10,000 topographic City Plan maps

Wellington – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of New Zealand—low-cost, rapid delivery:

New Zealand VMAP-0 – US NGA 1:1,000,000 vector mapping

New Zealand SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

New Zealand SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

New Zealand GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

New Zealand GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of New Zealand

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of New Zealand

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

New Zealand (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Nicaragua

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Nicaragua including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Nicaragua via 301 national 1:50,000 topographic maps
Full coverage of Nicaragua via 27 Russian military 1:200,000 topographic maps
Full coverage of Nicaragua via 15 US NGA 1:250,000 JOG topographic maps
Full coverage of Nicaragua via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Nicaragua via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bluefields – 1 US NGA 1:12,500 topographic City Graphic map
Chinandega – 1 US NGA 1: 10,000 topographic City Graphic map
Corinto – 1 US NGA 1: 10,000 topographic City Graphic map
Leon – 1 US NGA 1: 10,000 topographic City Graphic map
Managua – 1 US NGA 1: 15,000 topographic City Graphic map
Puerto Cabezas – 1 US NGA 1: 10,000 topographic City Graphic map

Off-shelf global data of Nicaragua—low-cost, rapid delivery:

Nicaragua VMAP-0 – US NGA 1:1,000,000 vector mapping
Nicaragua SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Nicaragua SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Nicaragua GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Nicaragua GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Nicaragua
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Nicaragua

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Nicaragua (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Niger

Land Info offers a variety of digital topographic map data and satellite imagery products of Niger including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Niger via 372 Russian military 1:200,000 topographic maps
10% coverage of Niger via 23 US NGA 1:250,000 JOG topographic maps
Full coverage of Niger via 17 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Niger via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Niamey – 1 Russian military 1:10,000 topographic City Plan map
Niamey - 1:10,000 scale national topographic City Plan map

Off-shelf global data of Niger—low-cost, rapid delivery:

Niger VMAP-0 – US NGA 1:1,000,000 vector mapping
Niger SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Niger SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Niger GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Niger GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Niger
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Niger

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Niger (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Nigeria

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Nigeria including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Nigeria via 1,124 national 1:50,000 topographic maps
Near-full coverage of Nigeria via 309 national 1:100,000 topographic maps
Full coverage of Nigeria via 144 Russian military 1:200,000 topographic maps
87% coverage of Nigeria via 60 US NGA 1:250,000 JOG topographic maps
Full coverage of Nigeria via 9 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Nigeri via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kaduna – 3 Russian military 1:10,000 topographic City Plan maps
Kano – 1 Russian military 1:10,000 topographic City Plan maps
Maiduguri – 1 Russian military 1:10,000 topographic City Plan map
Oshogbo – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Nigeria—low-cost, rapid delivery:

Nigeria VMAP-0 – US NGA 1:1,000,000 vector mapping
Nigeria SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Nigeria SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Nigeria GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Nigeria GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Nigeria
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Nigeria

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Nigeria (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Norfolk Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Norfolk I. including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, ESRI .shp, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Norfolk I. via 1 national 1:25,000 topographic map

Off-shelf global data of San Marino—low-cost, rapid delivery:

Norfolk I. VMAP-0 – US NGA 1:1,000,000 vector mapping

Norfolk I. SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Norfolk I. SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Norfolk I. GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Norfolk I. GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Norfolk I.

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Norfolk I.

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

North Korea

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of North Korea including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

- Full coverage of North Korea via 390 Russian military 1:50,000 topographic maps
- Full coverage of North Korea via 115 Russian military 1:100,000 topographic maps
- Full coverage of North Korea via 37 Russian military 1:200,000 topographic maps
- Full coverage of North Korea via 13 US 1:250,000 JOG topographic maps
- Partial coverage of North Korea via 1 US 1:500,000 TPC aeronautical topographic map
- Full coverage of North Korea via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

- Ch'ongjin – 2 Russian military 1:10,000 topographic City Plan maps
- Hamhung, Hungnam – 1 Russian military 1:25,000 topographic City Plan maps
- Kaesong – 1 Russian military 1:10,000 topographic City Plan map
- P'yongyang (Pyongyang) – 4 Russian military 1:10,000 topographic City Plan maps
- Wonsan – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of North Korea—low-cost, rapid delivery:

- North Korea VMAP-0 – US NGA 1:1,000,000 vector mapping
- North Korea SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
- North Korea SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
- North Korea GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
- North Korea GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

- High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of North Korea
- Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of North Korea

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

North Korea (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Northern Mariana Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Northern Mariana Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Rota Island via 3 USGS 1:10,000 topographic maps
Full coverage of Rota Island via 1 USGS 1:25,000 topographic map
Full coverage of Saipan Island via 6 USGS 1:10,000 topographic maps
Full coverage of Saipan Island via 1 USGS 1:25,000 topographic map
Full coverage of Tinian Island via 5 USGS 1:10,000 topographic maps
Full coverage of Tinian Island via 1 USGS 1:25,000 topographic map
70% coverage of Northern Mariana Islands via 2 US 1:250,000 JOG topographic maps
Full coverage of Northern Mariana Islands via 17 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Northern Mariana Islands via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Northern Mariana Islands—low-cost, rapid delivery:

Northern Mariana Islands VMAP-0 – US NGA 1:1,000,000 vector mapping
Northern Mariana Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Northern Mariana Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Northern Mariana Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Northern Mariana Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Northern Mariana Islands
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Northern Mariana Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Northern Mariana Islands (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Norway

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Norway including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Norway via 370 Russian military 1:50,000 topographic maps
Full coverage of Norway via 525 Russian military 1:100,000 topographic maps
Full coverage of Norway via 163 Russian military 1:200,000 topographic maps
Partial coverage of Norway via 1 US NGA 1:250,000 JOG topographic map
Full coverage of Norway via 17 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Norway via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Drammen – 1 Russian military 1:10,000 topographic City Plan map
Kirkenes – 1 Russian military 1:10,000 topographic City Plan map
Kristiansand – 1 Russian military 1:10,000 topographic City Plan map
Narvik – 4 Russian military 1:10,000 topographic City Plan maps
Oslo – 4 Russian military 1:10,000 topographic City Plan maps
Stavanger – 1 Russian military 1:10,000 topographic City Plan map
Tromsø – 1 Russian military 1:10,000 topographic City Plan map
Trondheim – 2 Russian military 1:10,000 topographic City Plan maps
Vadso – 1 Russian military 1:10,000 topographic City Plan map
Vardo – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Norway—low-cost, rapid delivery:

Norway VMAP-0 – US NGA 1:1,000,000 vector mapping
Norway SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Norway SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Norway GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Norway GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Norway
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Norway

Norway (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Oman including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

75% coverage of Oman via 121 national 1:100,000 topographic maps
50% coverage of Oman via 118 Russian military 1:100,000 topographic maps
Full coverage of Oman via 23 national 1:200,000 topographic maps
Full coverage of Oman via 63 Russian military 1:200,000 topographic maps
85% coverage of Oman via 25 US NGA 1:250,000 JOG topographic maps
Partial coverage of Oman via 1 US NGA 1:1,000,000 ONC topographic maps

Off-shelf global data of Oman—low-cost, rapid delivery:

Oman VMAP-0 – US NGA 1:1,000,000 vector mapping
Oman SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Oman SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Oman GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Oman GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Oman
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Oman

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Pakistan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Pakistan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Pakistan via 560 national 1:50,000 topographic maps
Partial coverage of Pakistan via 350 national 1:63,360 topographic maps
Partial coverage of Pakistan via 127 Russian military 1:50,000 topographic maps
Full coverage of Pakistan via 592 Russian military 1:100,000 topographic maps
Full coverage of Pakistan via 173 Russian military 1:200,000 topographic maps
95% coverage of Pakistan via 77 US NGA 1:250,000 JOG topographic maps
Full coverage of Pakistan via 11 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Pakistan via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bahawalpur – 1 Russian military 1:10,000 topographic City Plan map
Bahawalpur Guide Map
Chakwal Guide Map
Dera Ghazi Khan Guide Map
Dera Ismail Khan Guide Map
Faisalabad Guide Map
Gujranwala Guide Map
Gujranwala – 1 Russian military 1:10,000 topographic City Plan map

Panama

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Panama including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Panama via 160 national 1:50,000 topographic maps
Full coverage of Panama via 13 US NGA 1:250,000 JOG topographic maps
Full coverage of Panama via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Panama via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Panama City – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Panama—low-cost, rapid delivery:

Panama VMAP-0 – US NGA 1:1,000,000 vector mapping
Panama SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Panama SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Panama GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Panama GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Panama
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Panama

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Panama (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Papua New Guinea

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Papua New Guinea including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Papua New Guinea via 750 national 1:50,000 topographic maps

Full coverage of Papua New Guinea via 280 national 1:100,000 topographic maps

10% coverage of Papua New Guinea via 1 US 1:1,000,000 ONC aeronautical topographic map

35% coverage of Papua New Guinea via 3 Indonesian 1:1,000,000 topographic maps

Off-shelf global data of Papua New Guinea—low-cost, rapid delivery:

Papua New Guinea VMAP-0 – US NGA 1:1,000,000 vector mapping

Papua New Guinea SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Papua New Guinea SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Papua New Guinea GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Papua New Guinea GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Papua New Guinea

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Papua New Guinea

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Paraguay

Land Info offers a variety of digital topographic map data and satellite imagery products of Paraguay including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Paraguay via 600 national 1:50,000 topographic maps
64% coverage of Paraguay via 91 US NGA 1:100,000 TLMs topographic maps
Partial coverage of Paraguay via 12 US NGA 1:250,000 JOG topographic maps
Full coverage of Paraguay via 6 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Paraguay via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Asuncion – 1 US NGA 1:25,000 topographic City Graphic map
Concepcion – 1 US NGA 1:20,000 topographic City Graphic map
Encarnacio – 1 US NGA 1:20,000 topographic City Graphic map

Off-shelf global data of Paraguay—low-cost, rapid delivery:

Paraguay VMAP-0 – US NGA 1:1,000,000 vector mapping
Paraguay SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Paraguay SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Paraguay GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Paraguay GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Paraguay
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Paraguay

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Paraguay (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Peru

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Peru including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Peru via 471 national 1:100,000 topographic maps
Near-full coverage of Peru via 82 US NGA 1:250,000 JOG topographic maps
Full coverage of Peru via 11 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Peru via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Lima, Callao – 1 Russian military 1:25,000 topographic City Plan map
Lima & surrounds: 6 national 1:25,000 scale maps
Lima & surrounds: 50 national 1:10,000 scale maps

Off-shelf global data of Peru—low-cost, rapid delivery:

Peru VMAP-0 – US NGA 1:1,000,000 vector mapping
Peru SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Peru SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Peru GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Peru GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Peru
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Peru

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Peru (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Philippines

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Philippines including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Philippines via 1,040 national 1:50,000 topographic maps
Full coverage of Philippines via 112 Russian military 1:200,000 topographic maps
Full coverage of Philippines via 55 US 1:250,000 JOG topographic maps
Full coverage of Philippines via 6 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Philippines via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Cebu – 2 Russian military 1:10,000 topographic City Plan maps
Manila, Quezon City, Pasig – 4 Russian military 1:10,000 topographic City Plan maps
Zamboanga – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Philippines—low-cost, rapid delivery:

Philippines VMAP-0 – US NGA 1:1,000,000 vector mapping
Philippines SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Philippines SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Philippines GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Philippines GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Philippines
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Philippines

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Philippines (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Poland

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Poland including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Poland via 1,079 Russian military 1:50,000 topographic maps

Full coverage of Poland via 295 Russian military 1:100,000 topographic maps

Full coverage of Poland via 84 Russian military 1:200,000 topographic maps

Full coverage of Poland via 30 US NGA 1:250,000 JOG topographic maps

90% coverage of Poland via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Biala Polderska – 1 Russian military 1:10,000 topographic City Plan map

Bialogard – 1 Russian military 1:10,000 topographic City Plan map

Bialystok – 2 Russian military 1:10,000 topographic City Plan maps

Bielsko-Biala – 1 Russian military 1:10,000 topographic City Plan map

Boleslawiec – 1 Russian military 1:10,000 topographic City Plan map

Brzeg – 1 Russian military 1:10,000 topographic City Plan map

Bydgoszcz – 1 Russian military 1:10,000 topographic City Plan map

Bytom – 1 Russian military 1:10,000 topographic City Plan map

Chelm – 1 Russian military 1:10,000 topographic City Plan map

Chorzow, Ruda Slaska – 2 Russian military 1:10,000 topographic City Plan maps

Ciechanow – 1 Russian military 1:10,000 topographic City Plan map

Czestochowa – 2 Russian military 1:10,000 topographic City Plan maps

Darlowo – 1 Russian military 1:10,000 topographic City Plan map

Deblin (Demblin) – 1 Russian military 1:10,000 topographic City Plan map

Dembitsa – 1 Russian military 1:10,000 topographic City Plan map

Dzierzoniow – 1 Russian military 1:10,000 topographic City Plan map

Elblag – 1 Russian military 1:10,000 topographic City Plan map

Gdansk – 4 Russian military 1:10,000 topographic City Plan maps

Gdynia – 2 Russian military 1:10,000 topographic City Plan maps

Gliwice – 1 Russian military 1:10,000 topographic City Plan map

Gniezno – 1 Russian military 1:10,000 topographic City Plan map

Gorzow Wielkopolski – 1 Russian military 1:10,000 topographic City Plan map

Grudziadz – 1 Russian military 1:10,000 topographic City Plan map

Gryfice – 1 Russian military 1:10,000 topographic City Plan map

Inowroclaw – 1 Russian military 1:10,000 topographic City Plan map

Jaroslaw – 1 Russian military 1:10,000 topographic City Plan map

Jelenia Gora – 2 Russian military 1:10,000 topographic City Plan maps

Poland (continued)

Kalisz – 1 Russian military 1:10,000 topographic City Plan map
Katowice – 1 Russian military 1:10,000 topographic City Plan map
Kielce – 1 Russian military 1:10,000 topographic City Plan map
Klodzko – 1 Russian military 1:10,000 topographic City Plan map
Kolobrzeg – 1 Russian military 1:10,000 topographic City Plan map
Konin – 1 Russian military 1:10,000 topographic City Plan map
Kostrzyn – 1 Russian military 1:10,000 topographic City Plan map
Koszalin – 1 Russian military 1:10,000 topographic City Plan map
Krakow (Cracow) – 2 Russian military 1:10,000 topographic City Plan maps
Krosno – 1 Russian military 1:10,000 topographic City Plan map
Kutno – 1 Russian military 1:10,000 topographic City Plan map
Leba – 1 Russian military 1:10,000 topographic City Plan map
Lebork – 1 Russian military 1:10,000 topographic City Plan map
Legnica – 1 Russian military 1:10,000 topographic City Plan map
Leszno – 1 Russian military 1:10,000 topographic City Plan map
Lodz – 1 Russian military 1:25,000 topographic City Plan map
Lodz – 4 Russian military 1:10,000 topographic City Plan maps
Lomza – 1 Russian military 1:10,000 topographic City Plan map
Lubin – 1 Russian military 1:25,000 topographic City Plan map
Lublin – 1 Russian military 1:10,000 topographic City Plan map
Modlin – 1 Russian military 1:10,000 topographic City Plan map
Nowa Sol – 1 Russian military 1:10,000 topographic City Plan map
Nowy Sacz – 1 Russian military 1:10,000 topographic City Plan map
Nysa – 1 Russian military 1:10,000 topographic City Plan map
Olsztyn – 1 Russian military 1:10,000 topographic City Plan map
Opole – 1 Russian military 1:10,000 topographic City Plan map
Ostroleka – 1 Russian military 1:10,000 topographic City Plan map
Ostrow Wielkopolski – 1 Russian military 1:10,000 topographic City Plan map
Ostrowiec-Swietokrzyski – 1 Russian military 1:10,000 topographic City Plan map
Otwock – 1 Russian military 1:10,000 topographic City Plan map
Pila – 1 Russian military 1:10,000 topographic City Plan map
Piotrkow Trybunalski – 1 Russian military 1:10,000 topographic City Plan map
Plock – 1 Russian military 1:10,000 topographic City Plan map
Poznan – 4 Russian military 1:10,000 topographic City Plan maps
Przemysl – 1 Russian military 1:10,000 topographic City Plan map
Pulawy – 1 Russian military 1:10,000 topographic City Plan map
Radom – 1 Russian military 1:10,000 topographic City Plan map
Rzeszow – 1 Russian military 1:10,000 topographic City Plan map
Sandomierz – 1 Russian military 1:10,000 topographic City Plan map
Siedlce – 1 Russian military 1:10,000 topographic City Plan map
Sieradz – 1 Russian military 1:10,000 topographic City Plan map
Skarzysko Kamienna – 1 Russian military 1:10,000 topographic City Plan map
Skierniewice – 1 Russian military 1:10,000 topographic City Plan map
Slawno – 1 Russian military 1:10,000 topographic City Plan map
Slupsk – 1 Russian military 1:10,000 topographic City Plan map
Sopot – 1 Russian military 1:15,000 topographic City Plan map

Poland (continued)

Sosnowiec, Myslowice – 2 Russian military 1:10,000 topographic City Plan maps
Stalowa Wola – 1 Russian military 1:10,000 topographic City Plan map
Stargrad Szczecinski – 1 Russian military 1:10,000 topographic City Plan map
Suwalki – 1 Russian military 1:10,000 topographic City Plan map
Swidnica – 1 Russian military 1:10,000 topographic City Plan map
Swidwin – 1 Russian military 1:10,000 topographic City Plan map
Swinoujscie – 1 Russian military 1:10,000 topographic City Plan map
Szczecin – 1 Russian military 1:10,000 topographic City Plan map
Szczecinek – 1 Russian military 1:10,000 topographic City Plan map
Tarnobrzeg – 1 Russian military 1:10,000 topographic City Plan map
Tarnow – 1 Russian military 1:10,000 topographic City Plan map
Tomaszow Mazowiecki – 1 Russian military 1:10,000 topographic City Plan map
Torun – 2 Russian military 1:10,000 topographic City Plan map
Ustka – 1 Russian military 1:10,000 topographic City Plan map
Walbrzych – 2 Russian military 1:10,000 topographic City Plan map
Warszawa (Warsaw) – 1 Russian military 1:25,000 topographic City Plan map
Wloclawek – 1 Russian military 1:10,000 topographic City Plan map
Wlodawa – 1 Russian military 1:10,000 topographic City Plan map
Wroclaw (Breslau) – 2 Russian military 1:10,000 topographic City Plan maps
Zamosc – 1 Russian military 1:10,000 topographic City Plan map
Zary, Zagan – 3 Russian military 1:10,000 topographic City Plan maps
Zawiercie – 1 Russian military 1:10,000 topographic City Plan map
Zielona Gora – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Poland—low-cost, rapid delivery:

Poland VMAP-0 – US NGA 1:1,000,000 vector mapping
Poland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Poland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Poland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Poland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Poland
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Poland

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Poland (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

Partial coverage of Qatar via 4 national 1:100,000 topographic maps
Full coverage of Qatar via 18 Russian military 1:100,000 topographic maps
Full coverage of Qatar via 9 Russian military 1:200,000 topographic maps
Full coverage of Qatar via 5 US NGA 1:250,000 JOG topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 5m - 10m resolution):

Doha (Ad-Dawah) – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Qatar–low-cost, rapid delivery:

Qatar VMAP-0 – US NGA 1:1,000,000 vector mapping
Qatar SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Qatar SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Qatar GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Qatar GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Qatar
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Qatar

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Qatar (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Reunion

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Reunion including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Reunion via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Reunion via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Reunion—low-cost, rapid delivery:

Reunion VMAP-0 – US NGA 1:1,000,000 vector mapping

Reunion SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Reunion SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Reunion GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Reunion GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Reunion

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Reunion

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Romania

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Romania including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Romania via 203 Russian military 1:100,000 topographic maps

Full coverage of Romania via 63 Russian military 1:200,000 topographic maps

Full coverage of Romania via 26 US NGA 1:250,000 JOG topographic maps

Full coverage of Romania via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Alba Iulia – 1 Russian military 1:10,000 topographic City Plan map

Arad – 2 Russian military 1:10,000 topographic City Plan maps

Bacau – 2 Russian military 1:10,000 topographic City Plan maps

Birlad – 1 Russian military 1:10,000 topographic City Plan map

Botosani (Botoshani) – 1 Russian military 1:10,000 topographic City Plan map

Braila – 1 Russian military 1:10,000 topographic City Plan map

Brasov (Brashov) – 1 Russian military 1:10,000 topographic City Plan map

Bucharest (Bucuresti) – 2 Russian military 1:25,000 topographic City Plan maps

Buzau – 1 Russian military 1:10,000 topographic City Plan map

Cluj-Napoca – 2 Russian military 1:10,000 topographic City Plan maps

Constanta (Constantza) – 2 Russian military 1:10,000 topographic City Plan maps

Craiova – 1 Russian military 1:10,000 topographic City Plan map

Drobeta-Turnu-Severin – 1 Russian military 1:10,000 topographic City Plan map

Focsani – 1 Russian military 1:10,000 topographic City Plan map

Galati (Galatz) – 2 Russian military 1:10,000 topographic City Plan maps

Giurgiu – 1 Russian military 1:15,000 topographic City Plan map

Iasi – 1 Russian military 1:10,000 topographic City Plan map

Medgidia – 1 Russian military 1:10,000 topographic City Plan map

Oradea – 1 Russian military 1:10,000 topographic City Plan map

Piatra Neamt – 1 Russian military 1:10,000 topographic City Plan map

Pitesti – 1 Russian military 1:10,000 topographic City Plan map

Ploiesti – 2 Russian military 1:10,000 topographic City Plan maps

Rimnicu-Sarat – 1 Russian military 1:10,000 topographic City Plan map

Roman – 1 Russian military 1:10,000 topographic City Plan map

Satu-Mare – 1 Russian military 1:10,000 topographic City Plan map

Sibiu – 1 Russian military 1:10,000 topographic City Plan map

Siret – 1 Russian military 1:10,000 topographic City Plan map

Sulina – 1 Russian military 1:10,000 topographic City Plan map

Romania (continued)

Tecuci – 1 Russian military 1:10,000 topographic City Plan map
Timisoara – 2 Russian military 1:10,000 topographic City Plan map
Tirgoviste – 1 Russian military 1:10,000 topographic City Plan map
Tirgu Mures – 1 Russian military 1:10,000 topographic City Plan map
Tulcea – 1 Russian military 1:10,000 topographic City Plan map
Turnu Magurele – 1 Russian military 1:10,000 topographic City Plan map
Zimnicea – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Romania–low-cost, rapid delivery:

Romania VMAP-0 – US NGA 1:1,000,000 vector mapping
Romania SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Romania SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Romania GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Romania GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Romania
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Romania

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Russia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Russia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Russia via 42,873 Russian military 1:50,000 topographic maps

Near-full coverage of Russia via 21,973 Russian military 1:100,000 topographic maps

Full coverage of Russia via 3,555 Russian military 1:200,000 topographic maps

50% coverage of Russia via 885 US 1:250,000 JOG topographic maps

Near-full coverage of Russia via 92 US 1:500,000 TPC aeronautical topographic maps

99% coverage of Russia via 32 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Belovo – 2 Russian military 1:25,000 topographic City Plan maps

Off-shelf global data of Russia—low-cost, rapid delivery:

Russia VMAP-0 – US NGA 1:1,000,000 vector mapping

Russia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Russia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Russia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Russia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Russia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Russia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Rwanda

Land Info offers a variety of digital topographic map data and satellite imagery products of Rwanda including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Rwanda via 43 national 1:50,000 topographic maps

Full coverage of Rwanda via 4 US NGA 1:250,000 JOG topographic maps

Full coverage of Rwanda via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Kigali, Rwanda – 1 US military 1:10,000 topographic City Graphic map

Off-shelf global data of Rwanda—low-cost, rapid delivery:

Rwanda VMAP-0 – US NGA 1:1,000,000 vector mapping

Rwanda SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Rwanda SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Rwanda GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Rwanda GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Rwanda

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Rwanda

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Samoa via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Samoa—low-cost, rapid delivery:

Samoa VMAP-0 – US NGA 1:1,000,000 vector mapping

Samoa SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Samoa SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Samoa GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Samoa GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Samoa

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Samoa

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

San Marino

Land Info offers a variety of digital topographic map data and satellite imagery products of San Marino including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of San Marino via 2 Russian military 1:50,000 topographic maps
Full coverage of San Marino via 1 Russian military 1:100,000 topographic map
Full coverage of San Marino via 1 Russian military 1:200,000 topographic map
Full coverage of San Marino via 1 US 1:500,000 TPC aeronautical topographic maps
Full coverage of San Marino via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of San Marino—low-cost, rapid delivery:

San Marino VMAP-0 – US NGA 1:1,000,000 vector mapping
San Marino SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
San Marino SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
San Marino GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
San Marino GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of San Marino
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of San Marino

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

San Marino (continued)

Sao Tome & Principe

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Sao Tome & Principe including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Sao Tome via 1 national 1:75,000 topographic map

Full coverage of Sao Tome & Principe via 7 national 1:75,000 topographic maps

Full coverage of Sao Tome & Principe via 1 US 1:500,000 TPC & 1 1,000,000 ONC aeronautical topographic map

Off-shelf global data of Sao Tome & Principe—low-cost, rapid delivery:

Sao Tome & Principe VMAP-0 – US NGA 1:1,000,000 vector mapping

Sao Tome & Principe SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Sao Tome & Principe SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Sao Tome & Principe GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Sao Tome & Principe GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Sao Tome & Principe

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Sao Tome & Principe

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Saudi Arabia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Saudi Arabia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Saudi Arabia via 199 national 1:50,000 topographic maps
Partial coverage of Saudi Arabia via 478 Russian military 1:100,000 topographic maps
Full coverage of Saudi Arabia via 336 Russian military 1:200,000 topographic maps
Partial coverage of Saudi Arabia via 94 US NGA 1:250,000 JOG topographic maps
Full coverage of Saudi Arabia via 17 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Saudi Arabia via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Al Hufuf – 2 Russian military 1:10,000 topographic City Plan maps
Jeddah (Jiddah) – 1 Russian military 1:25,000 topographic City Plan map
Mecca (Makkah) – 2 Russian military 1:10,000 topographic City Plan maps
Medina (Al-Madinah) – 1 Russian military 1:10,000 topographic City Plan map
Riyadh – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Saudi Arabia—low-cost, rapid delivery:

Saudi Arabia VMAP-0 – US NGA 1:1,000,000 vector mapping
Saudi Arabia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Saudi Arabia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Saudi Arabia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Saudi Arabia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Saudi Arabia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Saudi Arabia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Saudia Arabia (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Senegal

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Senegal including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Senegal via 41 Russian military 1:200,000 topographic maps
Full coverage of Senegal via 22 US 1:250,000 JOG aeronautical topographic maps
Full coverage of Senegal via 4 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Senegal via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Dakar – 4 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Senegal—low-cost, rapid delivery:

Senegal VMAP-0 – US NGA 1:1,000,000 vector mapping
Senegal SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Senegal SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Senegal GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Senegal GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Senegal
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Senegal

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Senegal (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Serbia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Serbia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Serbia via 154 US NGA 1:50,000 TLM topographic maps
Full coverage of Serbia via 271 Russian military 1:50,000 topographic maps
Full coverage of Serbia via 77 Russian military 1:100,000 topographic maps
Full coverage of Serbia via 23 Russian military 1:200,000 topographic maps
Full coverage of Serbia via 12 US NGA 1:250,000 JOG topographic maps
Partial coverage of Serbia via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of Serbia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Belgrade – 4 Russian military 1:10,000 topographic City Plan maps
Nish – 1 Russian military 1:10,000 topographic City Plan map
Novi Sad – 1 Russian military 1:10,000 topographic City Plan map
Sarajevo – 1 Russian military 1:10,000 topographic City Plan map
Beograd (Belgrade) 2 US military 1:15,000 topographic City Graphic map
Kragujevac – 1 US military 1:15,000 topographic City Graphic map
Nis – 1 US military 1:15,000 topographic City Graphic map
Novi Sad – 1 US military 1:20,000 topographic City Graphic map
Subotica– 1 US military 1:15,000 topographic City Graphic map

Off-shelf global data of Serbia –low-cost, rapid delivery:

Serbia VMAP-0 – US NGA 1:1,000,000 vector mapping
Serbia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Serbia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Serbia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Serbia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Serbia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Serbia

Serbia (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Seychelles

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Seychelles including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jpn2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Mahe I. via 11 national 1:10,000 topographic map

Full coverage of Mahe I. via 1 national 1:50,000 topographic map

Full coverage of Seychelles via 2 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Seychelles via 4 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Seychelles—low-cost, rapid delivery:

Seychelles VMAP-0 – US NGA 1:1,000,000 vector mapping

Seychelles SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Seychelles SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Seychelles GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Seychelles GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Seychelles

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Seychelles

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Sierra Leone

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Sierra Leone including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Sierra Leone via 111 national 1:50,000 topographic maps
Full coverage of Sierra Leone via 17 Russian military 1:200,000 topographic maps
Full coverage of Sierra Leone via 8 US NGA 1:250,000 JOG topographic maps
Full coverage of Sierra Leone via 4 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Sierra Leone via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Freetown – 1 Russian military 1:10,000 topographic City Plan map
Freetown - 1:10,000 scale national topographic City Plan map

Off-shelf global data of Sierra Leone—low-cost, rapid delivery:

Sierra Leone VMAP-0 – US NGA 1:1,000,000 vector mapping
Sierra Leone SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Sierra Leone SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Sierra Leone GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Sierra Leone GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Sierra Leone
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Sierra Leone

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Sierra Leone (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Singapore

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Singapore including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Singapore via 4 national 1:25,000 topographic maps

Full coverage of Singapore via 1 national 1:50,000 topographic map

Full coverage of Singapore via 4 Russian military 1:200,000 topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Singapore – 2 Russian military 1:25,000 topographic City Plan maps

Off-shelf global data of Singapore–low-cost, rapid delivery:

Singapore VMAP-0 – US NGA 1:1,000,000 vector mapping

Singapore SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Singapore SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Singapore GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Singapore GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Singapore

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Singapore

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Singapore (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Slovakia

Land Info offers a variety of digital topographic map data and satellite imagery products of Slovakia including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Slovakia via 185 Russian military 1:50,000 topographic maps
Full coverage of Slovakia via 56 Russian military 1:100,000 topographic maps
Full coverage of Slovakia via 20 Russian military 1:200,000 topographic maps
Full coverage of Slovakia via 10 US NGA 1:250,000 JOG topographic maps
Full coverage of Slovakia via 1 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Slovakia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Banska Bystrica – 1 Russian military 1:10,000 topographic City Plan map
Bratislava – 2 Russian military 1:10,000 topographic City Plan maps
Kosice – 2 Russian military 1:10,000 topographic City Plan maps
Martin – 1 Russian military 1:10,000 topographic City Plan map
Nitra – 1 Russian military 1:10,000 topographic City Plan map
Nove Zamky – 1 Russian military 1:10,000 topographic City Plan map
Presov – 1 Russian military 1:10,000 topographic City Plan map
Trencin – 1 Russian military 1:10,000 topographic City Plan map
Trnava – 1 Russian military 1:10,000 topographic City Plan map
Zilina – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Slovakia—low-cost, rapid delivery:

Slovakia VMAP-0 – US NGA 1:1,000,000 vector mapping
Slovakia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Slovakia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Slovakia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Slovakia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Slovakia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Slovakia

Slovakia (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Slovenia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Slovenia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Slovenia via 89 Russian military 1:50,000 topographic maps
Full coverage of Slovenia via 27 Russian military 1:100,000 topographic maps
Full coverage of Slovenia via 9 Russian military 1:200,000 topographic maps
Full coverage of Slovenia via 5 US 1:250,000 JOG topographic maps
Full coverage of Slovenia via 1 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Slovenia via 1 US 1:1,000,000 ONC aeronautical topographic map
Full coverage of Slovenia via 2 US 1:2,000,000 JNC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ljubljana – 1 Russian military 1:10,000 topographic City Plan map
Maribor – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Slovenia—low-cost, rapid delivery:

Slovenia VMAP-0 – US NGA 1:1,000,000 vector mapping
Slovenia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Slovenia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Slovenia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Slovenia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Slovenia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Slovenia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Slovenia (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Solomon Islands

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Solomon Islands including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Solomon Islands via 16 national 1:150,000 topographic maps

Off-shelf global data of Solomon Islands—low-cost, rapid delivery:

Solomon Islands VMAP-0 – US NGA 1:1,000,000 vector mapping

Solomon Islands SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Solomon Islands SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Solomon Islands GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Solomon Islands GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Solomon Islands

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Solomon Islands

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Somalia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Somalia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Somalia via 391 Russian military 1:100,000 topographic maps

Near-full coverage of Somalia via 176 US NGA 1:100,000 TLM topographic maps

Full coverage of Somalia via 118 Russian military 1:200,000 topographic maps

65% coverage of Somalia via 39 US 1:250,000 JOG topographic maps

Near-full coverage of Somalia via 5 US 1:500,000 TPC aeronautical topographic maps

65% coverage of Somalia via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Berbera – 1 Russian military 1:10,000 topographic City Plan map

Hargeysa – 1 Russian military 1:10,000 topographic City Plan map

Mogadishu – 2 Russian military 1:10,000 topographic City Plan maps

Baardheere – 1 US military 1:15,000 topographic City Graphic map

Baydhabo (Baidoa) – 1 US military 1:15,000 topographic City Graphic map

Beledweyn – 1 US military 1:15,000 topographic City Graphic map

Berbera – 1 US military 1:5,000 topographic City Graphic map

Boosaaso – 1 US military 1:15,000 topographic City Graphic map

Caluula (Alula) – 1 US military 1:12,500 topographic City Graphic map

Dhuusamarreeb (Dusa Marreb) – 1 US military 1:15,000 topographic City Graphic map

Gaalkacyo – 1 US military 1:15,000 topographic City Graphic map

Hargeisa – 1 US military 1:5,000 topographic City Graphic map

Jalalaqsi – 1 US military 1:15,000 topographic City Graphic map

Kismaayo – 1 US military 1:15,000 topographic City Graphic map

Luuq – 1 US military 1:15,000 topographic City Graphic map

Marka (Merka) – 1 US military 1:15,000 topographic City Graphic map

Muqdisho (Mogadishu) – 2 US military 1:12,500 topographic City Graphic maps

Waajug – 1 US military 1:15,000 topographic City Graphic map

Xuddur (Oddur) – 1 US military 1:15,000 topographic City Graphic map

Off-shelf global data of Somalia—low-cost, rapid delivery:

Somalia VMAP-0 – US NGA 1:1,000,000 vector mapping

Somalia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Somalia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Somalia (continued)

Somalia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Somalia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Somalia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Somalia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

South Africa

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of South Africa including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of South Africa via 1,950 national 1:50,000 topographic maps
Full coverage of South Africa via 237 Russian military 1:200,000 topographic maps
Full coverage of South Africa via 70 national 1:250,000 topographic maps
95% coverage of South Africa via 10 US 1:500,000 TPC aeronautical topographic maps
Full coverage of South Africa via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Cape Town (Capetown) – 2 Russian military 1:10,000 topographic City Plan maps
Durban – 1 Russian military 1:25,000 topographic City Plan map
Johannesburg – 2 Russian military 1:25,000 topographic City Plan maps
Port Elizabeth – 1 Russian military 1:25,000 topographic City Plan map
Pretoria – 6 Russian military 1:10,000 topographic City Plan maps
Springs – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of South Africa—low-cost, rapid delivery:

South Africa VMAP-0 – US NGA 1:1,000,000 vector mapping
South Africa SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
South Africa SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
South Africa GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
South Africa GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of South Africa
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of South Africa

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

South Africa (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

South Georgia & S. Sandwhich I

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of South Georgia & S. Sandwhich I including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Off-shelf global data of South Georgia & S. Sandwhich I—low-cost, rapid delivery:

South Georgia & S. Sandwhich I VMAP-0 – US NGA 1:1,000,000 vector mapping

South Georgia & S. Sandwhich I SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

South Georgia & S. Sandwhich I SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

South Georgia & S. Sandwhich I GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

South Georgia & S. Sandwhich I GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm,

DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of South Georgia & S. Sandwhich I

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of South Georgia & S. Sandwhich I

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

South Korea

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of South Korea including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of South Korea via 294 Russian military 1:50,000 topographic maps
Full coverage of South Korea via 86 Russian military 1:100,000 topographic maps
Full coverage of South Korea via 31 Russian military 1:200,000 topographic maps
92% coverage of South Korea via 11 US 1:250,000 JOG aeronautical topographic maps
Full coverage of South Korea via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of South Korea via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Chinju – 1 Russian military 1:10,000 topographic City Plan map
Chonju – 1 Russian military 1:10,000 topographic City Plan map
Ch'unch'on – 1 Russian military 1:10,000 topographic City Plan map
Ch'ungju – 1 Russian military 1:10,000 topographic City Plan map
Inch'on – 1 Russian military 1:10,000 topographic City Plan map
Kunsan – 1 Russian military 1:10,000 topographic City Plan map
Kwangju – 1 Russian military 1:10,000 topographic City Plan map
Masan – 1 Russian military 1:10,000 topographic City Plan map
Mokp'o – 1 Russian military 1:10,000 topographic City Plan map
Pusan – 1 Russian military 1:25,000 topographic City Plan map
Seoul (Soul) – 1 Russian military 1:10,000 topographic City Plan map
Suwon – 1 Russian military 1:10,000 topographic City Plan map
Taegu – 2 Russian military 1:10,000 topographic City Plan maps
Ulsan – 1 Russian military 1:10,000 topographic City Plan map
Wonju – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of South Korea—low-cost, rapid delivery:

South Korea VMAP-0 – US NGA 1:1,000,000 vector mapping
South Korea SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
South Korea SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
South Korea GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
South Korea GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of South Korea

South Korea (continued)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of South Korea

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

South Sudan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of South Sudan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, ESRI .shp, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of South Sudan via 109 Russian military 1:200,000 topographic maps

Partial coverage of South Sudan via 9 US NGA 1:250,000 JOG topographic maps

Near-full coverage of South Sudan via 6 US 1:500,000 TPC aeronautical topographic maps (adding three 1:250,000 scale JOGs completes the country)

Full coverage of South Sudan via 4 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of South Sudan—low-cost, rapid delivery:

South Sudan VMAP-0 – US NGA 1:1,000,000 vector mapping

South Sudan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

South Sudan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

South Sudan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

South Sudan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of South Sudan

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of South Sudan

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Spain

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Spain including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Spain via 4,170 national 1:25,000 topographic maps
Full coverage of Spain via 1,130 national 1:50,000 topographic maps
Full coverage of Spain via 307 national 1:100,000 topographic maps
Full coverage of Spain via 43 national 1:250,000 topographic maps
Full coverage of Spain via 417 Russian military 1:100,000 topographic maps
Full coverage of Spain via 135 Russian military 1:200,000 topographic maps
Partial coverage of Spain via 21 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Spain via 8 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Spain via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Algeciras – 1 Russian military 1:10,000 topographic City Plan map
Alicante (Alacant) – 1 Russian military 1:10,000 topographic City Plan map
Badajoz – 1 Russian military 1:10,000 topographic City Plan map
Barcelona – 1 Russian military 1:25,000 topographic City Plan map
Barcelona, Badalona, Hospitalet – 6 Russian military 1:10,000 topographic City Plan maps
Bilbao – 1 Russian military 1:10,000 topographic City Plan map
Burgos – 1 Russian military 1:10,000 topographic City Plan map
Cadiz – 1 Russian military 1:10,000 topographic City Plan map
Cartagena – 1 Russian military 1:10,000 topographic City Plan map
Cordoba – 1 Russian military 1:10,000 topographic City Plan map
Granada – 1 Russian military 1:10,000 topographic City Plan map
Jerez de la Frontera – 1 Russian military 1:10,000 topographic City Plan map
La Coruna – 1 Russian military 1:10,000 topographic City Plan map
Leon – 1 Russian military 1:10,000 topographic City Plan map
Lerida (Lleida) – 1 Russian military 1:10,000 topographic City Plan map
Lugo – 1 Russian military 1:10,000 topographic City Plan map
Madrid – 4 Russian military 1:10,000 topographic City Plan maps
Malaga – 1 Russian military 1:10,000 topographic City Plan map
Mao – 1 Russian military 1:10,000 topographic City Plan map
Murcia – 1 Russian military 1:10,000 topographic City Plan map
Oviedo – 1 Russian military 1:10,000 topographic City Plan map
Palma (de Mallorca) – 2 Russian military 1:10,000 topographic City Plan maps
Pamplona – 1 Russian military 1:10,000 topographic City Plan map

Spain (continued)

Pontevedra – 1 Russian military 1:10,000 topographic City Plan map
Sabadell – 1 Russian military 1:10,000 topographic City Plan map
Salamanca – 1 Russian military 1:10,000 topographic City Plan map
San Fernando – 1 Russian military 1:10,000 topographic City Plan map
San Sebastian – 1 Russian military 1:10,000 topographic City Plan map
Santa Cruz de Tenerife – 1 Russian military 1:10,000 topographic City Plan map
Santander – 1 Russian military 1:10,000 topographic City Plan map
Santiago (de Compostela) – 1 Russian military 1:10,000 topographic City Plan map
Saragossa (Zaragoza) – 1 Russian military 1:10,000 topographic City Plan map
Seville (Sevilla) – 2 Russian military 1:10,000 topographic City Plan maps
Valencia – 1 Russian military 1:10,000 topographic City Plan map
Valladolid – 2 Russian military 1:10,000 topographic City Plan map
Vigo – 1 Russian military 1:10,000 topographic City Plan map
Vitoria – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Spain–low-cost, rapid delivery:

Spain VMAP-0 – US NGA 1:1,000,000 vector mapping
Spain SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Spain SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Spain GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Spain GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Spain
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Spain

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Sri Lanka

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Sri Lanka including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Sri Lanka via 89 national 1:50,000 topographic maps
Full coverage of Sri Lanka via 18 Russian military 1:200,000 topographic maps
Full coverage of Sri Lanka via 7 US NGA 1:250,000 JOG topographic maps
Full coverage of Sri Lanka via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Sri Lanka via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Colombo – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Sri Lanka—low-cost, rapid delivery:

Sri Lanka VMAP-0 – US NGA 1:1,000,000 vector mapping
Sri Lanka SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Sri Lanka SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Sri Lanka GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Sri Lanka GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Sri Lanka
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Sri Lanka

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Sri Lanka (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

St. Barthelemy

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of St. Barthelemy including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of St. Barthelemy via 2 national 1:25,000 topographic maps
Full coverage of St. Barthelemy via 1 US NGA 1:250,000 JOG topographic map
Full coverage of St. Barthelemy via 1 US 1:500,000 TPC aeronautical topographic map
Full coverage of St. Barthelemy via 1 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Guadeloupe—low-cost, rapid delivery:

St. Barthelemy VMAP-0 – US NGA 1:1,000,000 vector mapping
St. Barthelemy SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
St. Barthelemy SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
St. Barthelemy GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
St. Barthelemy GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of St. Barthelemy
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of St. Barthelemy

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

St. Helena

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of St. Helena including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution:

Full coverage of St. Helena via 17 US 1:500,000 TPC aeronautical topographic maps

Off-shelf global data of St. Helena—low-cost, rapid delivery:

St. Helena VMAP-0 – US NGA 1:1,000,000 vector mapping

St. Helena SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

St. Helena SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

St. Helena GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

St. Helena GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of St. Helena

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of St. Helena

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

St. Kitts & Nevis

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of St. Kitts & Nevis including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of St. Kitts & Nevis via 2 national 1:25,000 topographic maps

Full coverage of St. Kitts & Nevis via 1 US 1:250,000 topographic map

Full coverage of St. Kitts & Nevis via 1 US 1:500,000 TPC aeronautical topographic maps

Full coverage of St. Kitts & Nevis via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of St. Kitts & Nevis—low-cost, rapid delivery:

St. Kitts & Nevis VMAP-0 – US NGA 1:1,000,000 vector mapping

St. Kitts & Nevis SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

St. Kitts & Nevis SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

St. Kitts & Nevis GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

St. Kitts & Nevis GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of St. Kitts & Nevis

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of St. Kitts & Nevis

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

St. Lucia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of St. Lucia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of St. Lucia via 3 national 1:25,000 topographic maps

Full coverage of St. Lucia via 1 US 1:500,000 TPC aeronautical topographic maps

Full coverage of St. Lucia via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of St. Lucia—low-cost, rapid delivery:

St. Lucia VMAP-0 – US NGA 1:1,000,000 vector mapping

St. Lucia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

St. Lucia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

St. Lucia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

St. Lucia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of St. Lucia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of St. Lucia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

St. Pierre & Miquelon

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of St. Pierre & Miquelon including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models): 20m - 90m resolution):

Full coverage of St. Pierre & Miquelon via 2 Canadian 1:250,000 aeronautical topographic map

Full coverage of St. Pierre & Miquelon via 2 Canadian 1:500,000 aeronautical topographic map

Full coverage of St. Pierre & Miquelon via 1 Canadian 1:1,000,000 aeronautical topographic map

Off-shelf global data of St. Pierre & Miquelon—low-cost, rapid delivery:

St. Pierre & Miquelon VMAP-0 – US NGA 1:1,000,000 vector mapping

St. Pierre & Miquelon SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

St. Pierre & Miquelon SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

St. Pierre & Miquelon GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

St. Pierre & Miquelon GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of St. Pierre & Miquelon

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of St. Pierre & Miquelon

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

St. Vincent and the Grenadines

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of St. Vincent and the Grenadines including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of St. Vincent and the Grenadines via 2 national 1:25,000 topographic maps and 5 national 1:10,000 scale maps

Full coverage of St. Vincent and the Grenadines via 1 US 1:500,000 TPC aeronautical topographic maps

Full coverage of St. Vincent and the Grenadines via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of St. Vincent and the Grenadines—low-cost, rapid delivery:

St. Vincent and the Grenadines VMAP-0 – US NGA 1:1,000,000 vector mapping

St. Vincent and the Grenadines SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

St. Vincent and the Grenadines SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

St. Vincent and the Grenadines GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

St. Vincent and the Grenadines GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of St. Vincent and the Grenadines

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of St. Vincent and the Grenadines

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Sudan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Sudan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, ESRI .shp, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Sudan via 270 Russian military 1:200,000 topographic maps

25% coverage of Sudan via 41 US NGA 1:250,000 JOG topographic maps

Near-full coverage of Sudan via 10 US 1:500,000 TPC aeronautical topographic maps

Near-full coverage of Sudan via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Khartoum – 4 Russian military 1:10,000 topographic City Plan maps

Port Sudan – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Sudan—low-cost, rapid delivery:

Sudan VMAP-0 – US NGA 1:1,000,000 vector mapping

Sudan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Sudan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Sudan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Sudan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Sudan

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Sudan

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Suriname

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Suriname including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Suriname via 3 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Suriname via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Suriname—low-cost, rapid delivery:

Suriname VMAP-0 – US NGA 1:1,000,000 vector mapping

Suriname SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Suriname SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Suriname GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Suriname GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Suriname

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Suriname

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Svalbard

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Svalbard including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Svalbard via 2 US 1:250,000 JOG aeronautical topographic maps

Near-full coverage of Svalbard via 2 US 1:500,000 TPC aeronautical topographic maps

90% coverage of Svalbard via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Svalbard—low-cost, rapid delivery:

Svalbard VMAP-0 – US NGA 1:1,000,000 vector mapping

Svalbard SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Svalbard SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Svalbard GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Svalbard GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Svalbard

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Svalbard

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Swaziland

Land Info offers a variety of digital topographic map data and satellite imagery products of Swaziland including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Swaziland via 8 Russian military 1:200,000 topographic maps

45% coverage of Swaziland via 2 US NGA 1:250,000 JOG topographic maps

Full coverage of Swaziland via 2 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Swaziland via 1 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Swaziland—low-cost, rapid delivery:

Swaziland VMAP-0 – US NGA 1:1,000,000 vector mapping

Swaziland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Swaziland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Swaziland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Swaziland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Swaziland

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Swaziland

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Sweden

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Sweden including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Sweden via 554 Russian military 1:100,000 topographic maps

Full coverage of Sweden via 157 Russian military 1:200,000 topographic maps

98% coverage of Sweden via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Boras – 2 Russian military 1:10,000 topographic City Plan maps

Eskilstuna – 1 Russian military 1:10,000 topographic City Plan map

Gavle – 1 Russian military 1:10,000 topographic City Plan map

Goteborg – 2 Russian military 1:10,000 topographic City Plan maps

Halsingborg (Helsingborg) – 1 Russian military 1:10,000 topographic City Plan map

Jonkoping – 1 Russian military 1:10,000 topographic City Plan map

Kalmar – 1 Russian military 1:10,000 topographic City Plan map

Karlskrona – 1 Russian military 1:10,000 topographic City Plan map

Karlstad – 1 Russian military 1:10,000 topographic City Plan map

Linkoping – 1 Russian military 1:10,000 topographic City Plan map

Lulea – 2 Russian military 1:10,000 topographic City Plan maps

Malmo – 2 Russian military 1:10,000 topographic City Plan maps

Norrkoping – 1 Russian military 1:10,000 topographic City Plan map

Orebro – 1 Russian military 1:10,000 topographic City Plan map

Stockholm – 6 Russian military 1:10,000 topographic City Plan map

Sundsvall – 1 Russian military 1:10,000 topographic City Plan map

Uppsala – 1 Russian military 1:10,000 topographic City Plan map

Vasteras – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Sweden—low-cost, rapid delivery:

Sweden VMAP-0 – US NGA 1:1,000,000 vector mapping

Sweden SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Sweden SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Sweden GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Sweden GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Sweden

Sweden (continued)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Sweden

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Switzerland

Land Info offers a variety of digital topographic map data and satellite imagery products of Switzerland including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Switzerland via 78 national 1:50,000 topographic maps
Full coverage of Switzerland via 160 Russian military 1:50,000 topographic maps
Full coverage of Switzerland via 50 Russian military 1:100,000 topographic maps
Full coverage of Switzerland via 19 Russian military 1:200,000 topographic maps
Full coverage of Switzerland via 23 national 1:100,000 topographic maps
Full coverage of Switzerland via 4 national 1:200,000 topographic maps
30% coverage of Switzerland via 3 US 1:250,000 JOG topographic maps
Full coverage of Switzerland via 1 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Switzerland via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Basel, Muttentz, Weil am Rhein (Germany), Saint-Louis (France) – 2 Russian military 1:10,000 topographic City Plan maps
Bern – 2 Russian military 1:10,000 topographic City Plan maps
Geneva (Geneve) – 1 Russian military 1:10,000 topographic City Plan map
Lausanne – 1 Russian military 1:10,000 topographic City Plan map
Lucerne (Luzern) – 1 Russian military 1:10,000 topographic City Plan map
Neuchatel – 1 Russian military 1:10,000 topographic City Plan map
Sankt Gallen – 1 Russian military 1:10,000 topographic City Plan map
Winterthur – 1 Russian military 1:10,000 topographic City Plan map
Zurich – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Switzerland–low-cost, rapid delivery:

Switzerland VMAP-0 – US NGA 1:1,000,000 vector mapping
Switzerland SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Switzerland SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Switzerland GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Switzerland GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Switzerland
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Switzerland

Switzerland (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Syria

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Syria including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Syria via 142 Russian military 1:50,000 topographic maps
Full coverage of Syria via 145 Russian military 1:100,000 topographic maps
Full coverage of Syria via 47 Russian military 1:200,000 topographic maps
Full coverage of Syria via 25 US NGA 1:250,000 JOG topographic maps
Partial coverage of Syria via 2 US 1:500,000 TPC aeronautical topographic maps
Partial coverage of Syria via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Damascus – 2 Russian military 1:10,000 topographic City Plan maps
Haleb – 2 Russian military 1:10,000 topographic City Plan maps
Hama – 1 Russian military 1:10,000 topographic City Plan map
Homs – 1 Russian military 1:10,000 topographic City Plan map
Latakia – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Syria—low-cost, rapid delivery:

Syria VMAP-0 – US NGA 1:1,000,000 vector mapping
Syria SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Syria SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Syria GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Syria GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Syria
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Syria

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Syria (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Taiwan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Taiwan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Taiwan via 79 national 1:50,000 topographic maps
Full coverage of Taiwan via 33 Russian military 1:100,000 topographic maps
Full coverage of Taiwan via 11 Russian military 1:200,000 topographic maps
50% coverage of Taiwan via 3 US 1:250,000 JOG topographic maps
Full coverage of Taiwan via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Taiwan via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Chiai – 1 Russian military 1:10,000 topographic City Plan map
Chilung (Chi-lung) – 1 Russian military 1:10,000 topographic City Plan map
Hsinchu – 1 Russian military 1:10,000 topographic City Plan map
Kaohsiung (Gaoxiung) – 1 Russian military 1:10,000 topographic City Plan map
P'ingtung – 1 Russian military 1:10,000 topographic City Plan map
T'aichung – 1 Russian military 1:10,000 topographic City Plan map
T'ainan – 1 Russian military 1:10,000 topographic City Plan map
T'aipei (Taipeh, Taipei) – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Taiwan—low-cost, rapid delivery:

Taiwan VMAP-0 – US NGA 1:1,000,000 vector mapping
Taiwan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Taiwan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Taiwan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Taiwan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Taiwan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Taiwan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation,

Taiwan (continued)

natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Tajikistan

Land Info offers a variety of digital topographic map data and satellite imagery products of Tajikistan including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Tajikistan via 453 Russian military 1:50,000 topographic maps
Full coverage of Tajikistan via 138 Russian military 1:100,000 topographic maps
Full coverage of Tajikistan via 44 Russian military 1:200,000 topographic maps
91% coverage of Tajikistan via 21 US NGA 1:250,000 JOG topographic maps
Full coverage of Tajikistan via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Tajikistan via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Chkalovsk – 1 Russian military 1:25,000 topographic City Plan map
Dushanbe – 1 Russian military 1:25,000 topographic City Plan map
Kayrakkum – 1 Russian military 1:25,000 topographic City Plan map
Kulyab – 1 Russian military 1:10,000 topographic City Plan map
Kurgan-Tyube – 1 Russian military 1:10,000 topographic City Plan map
Leninabad, Kairakkum, Sovetabad, Chkalovsk – 1 Russian military 1:25,000 topographic City Plan map
Sovetabad – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Tajikistan—low-cost, rapid delivery:

Tajikistan VMAP-0 – US NGA 1:1,000,000 vector mapping
Tajikistan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Tajikistan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Tajikistan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Tajikistan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tajikistan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tajikistan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Tajikistan (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Tanzania

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Tanzania including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Tanzania via 1,259 national 1:50,000 topographic maps
Full coverage of Tanzania via 63 national 1:250,000 topographic maps
20% coverage of Tanzania via 27 US NGA 1:250,000 topographic maps
Partial coverage of Tanzania via 1 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Tanzania via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Dar es Salaam – 4 Russian military 1:10,000 topographic City Plan maps
Dar Es Salaam City Centre side 1 - 1:20,000 scale national topographic City Plan map, publ. 1995
Dar Es Salaam City Centre side 2 - 1:20,000 scale national topographic City Plan map, publ. 1995
Dar Es Salaam - 1:2,500 scale national topographic City Plan, publ. 1959-72, 3 maps
Dar Es Salaam - 1:5,000 scale national topographic City Plan map, publ. 1959-72, 3 maps

Off-shelf global data of Tanzania—low-cost, rapid delivery:

Tanzania VMAP-0 – US NGA 1:1,000,000 vector mapping
Tanzania SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Tanzania SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Tanzania GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Tanzania GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tanzania
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tanzania

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Tanzania (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Thailand

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Thailand including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Thailand via 615 national 1:50,000 topographic maps
Full coverage of Thailand via 338 Russian military 1:100,000 topographic maps
Full coverage of Thailand via 105 Russian military 1:200,000 topographic maps
Full coverage of Thailand via 48 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Thailand via 7 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Thailand via 5 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bangkok (Krung Thep) – 2 Russian military 1:25,000 topographic City Plan maps

Off-shelf global data of Thailand—low-cost, rapid delivery:

Thailand VMAP-0 – US NGA 1:1,000,000 vector mapping
Thailand SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Thailand SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Thailand GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Thailand GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Thailand
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Thailand

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including

Thailand (continued)

high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Tibet

Land Info offers a variety of digital topographic map data and satellite imagery products of Tibet including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Tibet via 10 Chinese military 1:25,000 topographic maps (over Mt. Everest/Chomolungma)
Partial coverage of Tibet via 50 Chinese military 1:50,000 topographic maps
Partial coverage of Tibet via 143 Chinese military 1:100,000 topographic maps
Partial coverage of Tibet via 460 Russian military 1:100,000 topographic maps
Full coverage of Tibet via 196 Russian military 1:200,000 topographic maps
40% coverage of Tibet via 68 US NGA 1:250,000 JOG topographic maps
Full coverage of Tibet via 16 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Tibet via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Lhasa (Tibet), China – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Tibet—low-cost, rapid delivery:

Tibet VMAP-0 – US NGA 1:1,000,000 vector mapping
Tibet SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Tibet SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Tibet GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Tibet GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tibet
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tibet

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Tibet (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Togo

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Togo including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Togo via 18 Russian military 1:200,000 topographic maps

Full coverage of Togo via 12 US NGA1:250,000 JOG topographic maps

Full coverage of Togo via 3 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Togo via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Lome – 1 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Togo—low-cost, rapid delivery:

Togo VMAP-0 – US NGA 1:1,000,000 vector mapping

Togo SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Togo SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Togo GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Togo GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Togo

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Togo

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Togo (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Tokelau

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Tokelau including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Tokelau via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Tokelau—low-cost, rapid delivery:

Tokelau VMAP-0 – US NGA 1:1,000,000 vector mapping

Tokelau SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Tokelau SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Tokelau GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Tokelau GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tokelau

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tokelau

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Tonga

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Tonga including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Tonga via 23 national 1:25,000 topographic maps

Full coverage of Tonga via 2 US 1:1,000,000 ONC aeronautical topographic maps

Off-shelf global data of Tonga—low-cost, rapid delivery:

Tonga VMAP-0 – US NGA 1:1,000,000 vector mapping

Tonga SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Tonga SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Tonga GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Tonga GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tonga

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tonga

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Trinidad & Tobago

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Trinidad & Tobago including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Trinidad & Tobago via 41 national 1:25,000 topographic maps

Partial coverage of Trinidad & Tobago via 1 US NGA 1:250,000 JOG topographic map

Full coverage of Trinidad & Tobago via 1 US 1:500,000 TPC aeronautical topographic map

Full coverage of Trinidad & Tobago via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Trinidad & Tobago—low-cost, rapid delivery:

Trinidad & Tobago VMAP-0 – US NGA 1:1,000,000 vector mapping

Trinidad & Tobago SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Trinidad & Tobago SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Trinidad & Tobago GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Trinidad & Tobago GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Trinidad & Tobago

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Trinidad & Tobago

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Tunisia

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Tunisia including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Tunisia via 114 Russian military 1:100,000 topographic maps
Full coverage of Tunisia via 40 Russian military 1:200,000 topographic maps
99% coverage of Tunisia via 21 US NGA 1:250,000 JOG topographic maps
Full coverage of Tunisia via 5 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Tunisia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Tunis, Ariana, Merhin-Koto – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Tunisia—low-cost, rapid delivery:

Tunisia VMAP-0 – US NGA 1:1,000,000 vector mapping
Tunisia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Tunisia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Tunisia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Tunisia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tunisia
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tunisia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing),

Tunisia (continued)

SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Turkey

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Turkey including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of Turkey via 2,162 Russian military 1:50,000 topographic maps
Full coverage of Turkey via 580 Russian military 1:100,000 topographic maps
Full coverage of Turkey via 162 Russian military 1:200,000 topographic maps
Full coverage of Turkey via 73 national 1:250,000 topographic maps
Partial coverage of Turkey via 9 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Turkey via 5 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Turkey via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ankara – 4 Russian military 1:10,000 topographic City Plan maps
Antalya – 1 Russian military 1:10,000 topographic City Plan map
Balikesir – 1 Russian military 1:10,000 topographic City Plan map
Bursa – 2 Russian military 1:10,000 topographic City Plan map
Denizli – 1 Russian military 1:10,000 topographic City Plan map
Diyarbakir – 1 Russian military 1:10,000 topographic City Plan map
Edirne – 1 Russian military 1:10,000 topographic City Plan map
Elazig – 1 Russian military 1:10,000 topographic City Plan map
Erzurum – 1 Russian military 1:10,000 topographic City Plan map
Icel (Mersin) – 2 Russian military 1:10,000 topographic City Plan map
Iskenderun – 1 Russian military 1:10,000 topographic City Plan map
Istanbul (Stambul) – 4 Russian military 1:10,000 topographic City Plan map
Izmir – 2 Russian military 1:10,000 topographic City Plan map
Kahramanmaras (Marash) – 1 Russian military 1:10,000 topographic City Plan map
Kars – 1 Russian military 1:10,000 topographic City Plan map
Kayseri – 2 Russian military 1:10,000 topographic City Plan maps
Kirikkale – 1 Russian military 1:10,000 topographic City Plan map
Kocaeli (Izmit) – 1 Russian military 1:10,000 topographic City Plan map
Konya – 1 Russian military 1:10,000 topographic City Plan map
Malatya – 1 Russian military 1:10,000 topographic City Plan map
Manisa – 1 Russian military 1:10,000 topographic City Plan map
Sakarya (Adapazari) – 1 Russian military 1:10,000 topographic City Plan map
Samsun – 1 Russian military 1:10,000 topographic City Plan map
Sivas – 1 Russian military 1:10,000 topographic City Plan map
Trabzon – 1 Russian military 1:10,000 topographic City Plan map

Turkey (continued)

Urfa – 1 Russian military 1:10,000 topographic City Plan map
Zonguldak – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Turkey–low-cost, rapid delivery:

Turkey VMAP-0 – US NGA 1:1,000,000 vector mapping
Turkey SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Turkey SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Turkey GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Turkey GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Turkey
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Turkey

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Turkmenistan

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Turkmenistan including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Turkmenistan via 1,300 Russian military 1:50,000 topographic maps
Full coverage of Turkmenistan via 368 Russian military 1:100,000 topographic maps
Full coverage of Turkmenistan via 109 Russian military 1:200,000 topographic maps
Full coverage of Turkmenistan via 49 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Turkmenistan via 6 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Turkmenistan via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ashkhabad – 1 Russian military 1:25,000 topographic City Plan map
Bairam-Ali – 1 Russian military 1:10,000 topographic City Plan map
Chardzhou – 1 Russian military 1:10,000 topographic City Plan map
Kerki – 1 Russian military 1:10,000 topographic City Plan map
Kisyl-Arvat – 1 Russian military 1:10,000 topographic City Plan map
Krasnovodsk – 1 Russian military 1:10,000 topographic City Plan map
Kushka – 1 Russian military 1:10,000 topographic City Plan map
Mary – 1 Russian military 1:10,000 topographic City Plan map
Nebit Dag – 1 Russian military 1:10,000 topographic City Plan map
Tashauz – 1 Russian military 1:10,000 topographic City Plan map
Tedzhen – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Turkmenistan—low-cost, rapid delivery:

Turkmenistan VMAP-0 – US NGA 1:1,000,000 vector mapping
Turkmenistan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Turkmenistan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Turkmenistan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Turkmenistan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Turkmenistan
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Turkmenistan

Turkmenistan (continued)

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Turks & Caicos

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Turks & Caicos including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Turks & Caicos via 15 national 1:25,000 topographic maps

Full coverage of Turks & Caicos via 1 US NGA 1:250,000 JOG topographic map

Full coverage of Turks & Caicos via 1 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Turks & Caicos via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Turks & Caicos—low-cost, rapid delivery:

Turks & Caicos VMAP-0 – US NGA 1:1,000,000 vector mapping

Turks & Caicos SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Turks & Caicos SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Turks & Caicos GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Turks & Caicos GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Turks & Caicos

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Turks & Caicos

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Tuvalu including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Tuvalu via 2 US 1:500,000 TPC aeronautical topographic maps

Off-shelf global data of Tuvalu—low-cost, rapid delivery:

Tuvalu VMAP-0 – US NGA 1:1,000,000 vector mapping

Tuvalu SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Tuvalu SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Tuvalu GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Tuvalu GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Tuvalu

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Tuvalu

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Uganda

Land Info offers a variety of digital topographic map data and satellite imagery products of Uganda including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Uganda via 313 national 1:50,000 topographic maps
Partial coverage of Uganda via 7 Russian military 1:200,000 topographic maps
Full coverage of Uganda via 23 national 1:250,000 topographic maps
Full coverage of Uganda via 22 US NGA 1:250,000 JOG topographic maps
Full coverage of Uganda via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Uganda via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Entebbe – 1 US military 1:12,500 topographic City Graphic map
Jinja – 1 US military 1:12,500 topographic City Graphic map
Kampala – 1 US military 1:12,500 topographic City Graphic map
Kampala – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Uganda—low-cost, rapid delivery:

Uganda VMAP-0 – US NGA 1:1,000,000 vector mapping
Uganda SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Uganda SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Uganda GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Uganda GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Uganda
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Uganda

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

Uganda (continued)

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Ukraine

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Ukraine including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Ukraine via 1,962 Russian military 1:50,000 topographic maps
Full coverage of Ukraine via 537 Russian military 1:100,000 topographic maps
Full coverage of Ukraine via 155 Russian military 1:200,000 topographic maps
Full coverage of Ukraine via 59 US NGA 1:250,000 JOG topographic maps
Partial coverage of Ukraine via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Ukraine via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Artemovsk – 2 Russian military 1:10,000 topographic City Plan maps
Bakhmach – 1 Russian military 1:10,000 topographic City Plan map
Balakleya – 2 Russian military 1:10,000 topographic City Plan maps
Belaya Tserkov – 2 Russian military 1:10,000 topographic City Plan maps
Belgorod-Dnestrovski – 2 Russian military 1:10,000 topographic City Plan maps
Belopolye – 4 Russian military 1:10,000 topographic City Plan maps
Berdichev – 2 Russian military 1:10,000 topographic City Plan maps
Berdiansk – 1 Russian military 1:10,000 topographic City Plan map
Bryanka – 1 Russian military 1:10,000 topographic City Plan map
Cherkassy – 4 Russian military 1:10,000 topographic City Plan maps
Chernigov – 2 Russian military 1:10,000 topographic City Plan maps
Chernovtsi – 4 Russian military 1:10,000 topographic City Plan maps
Chuguyev – 1 Russian military 1:10,000 topographic City Plan map
Dneprodzerzhinsk – 2 Russian military 1:25,000 topographic City Plan maps
Dnepropetrovsk – 2 Russian military 1:25,000 topographic City Plan maps
Donetsk – 4 Russian military 1:10,000 topographic City Plan maps
Drogobych – 2 Russian military 1:10,000 topographic City Plan maps
Enakiyevo – 2 Russian military 1:10,000 topographic City Plan maps
Evpatoriya – 1 Russian military 1:10,000 topographic City Plan map
Fastov – 2 Russian military 1:10,000 topographic City Plan maps
Feodosiya – 1 Russian military 1:10,000 topographic City Plan map
Gorlovka – 2 Russian military 1:25,000 topographic City Plan maps
Ivano-Frankovsk – 2 Russian military 1:10,000 topographic City Plan maps
Izmail – 2 Russian military 1:10,000 topographic City Plan maps
Kalach-na-Donu – 1 Russian military 1:10,000 topographic City Plan map
Kamenets-Podolski – 2 Russian military 1:10,000 topographic City Plan maps

Ukraine (continued)

Kamenka-Bugskaya – 1 Russian military 1:10,000 topographic City Plan map
Kerch – 4 Russian military 1:10,000 topographic City Plan maps
Kharkov – 2 Russian military 1:25,000 topographic City Plan maps
Kherson – 4 Russian military 1:10,000 topographic City Plan maps
Khmelnitski – 2 Russian military 1:10,000 topographic City Plan maps
Khust – 1 Russian military 1:10,000 topographic City Plan map
Kiev – 4 Russian military 1:15,000 topographic City Plan maps
Kirovograd – 4 Russian military 1:10,000 topographic City Plan maps
Kolomiya – 2 Russian military 1:10,000 topographic City Plan maps
Kommunarsk – 2 Russian military 1:10,000 topographic City Plan maps
Konotop – 2 Russian military 1:10,000 topographic City Plan maps
Konstantinovka – 4 Russian military 1:10,000 topographic City Plan maps
Korosten – 2 Russian military 1:10,000 topographic City Plan maps
Kovel – 2 Russian military 1:10,000 topographic City Plan maps

Zolotonosha – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Ukraine–low-cost, rapid delivery:

Ukraine VMAP-0 – US NGA 1:1,000,000 vector mapping
Ukraine SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Ukraine SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Ukraine GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Ukraine GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Ukraine
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Ukraine

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Ukraine (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

United Arab Emirates

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of UAE including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Partial coverage of UAE via 20 Russian military 1:50,000 topographic maps
Full coverage of UAE via 49 Russian military 1:100,000 topographic maps
Full coverage of UAE via 23 Russian military 1:200,000 topographic maps
Full coverage of UAE via 12 US NGA 1:250,000 JOG topographic maps
Partial coverage of UAE via 1 US 1:500,000 TPC aeronautical topographic maps
30% coverage of UAE via 1 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Abu Dhabi – 4 Russian military 1:10,000 topographic City Plan maps
Dubai – 2 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of UAE—low-cost, rapid delivery:

UAE VMAP-0 – US NGA 1:1,000,000 vector mapping
UAE SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
UAE SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
UAE GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
UAE GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of UAE
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of UAE

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

United Kingdom

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of United Kingdom including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of United Kingdom via 260 Russian military 1:50,000 topographic maps
Full coverage of United Kingdom via 311 Russian military 1:100,000 topographic maps
Full coverage of United Kingdom via 95 Russian military 1:200,000 topographic maps
Full coverage of United Kingdom via 1 US 1:500,000 TPC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Aberdeen – 2 Russian military 1:10,000 topographic City Plan maps
Ashton-in-Makerfield – 2 Russian military 1:10,000 topographic City Plan maps
Barrow-in-Furness – 1 Russian military 1:10,000 topographic City Plan map
Bath – 1 Russian military 1:10,000 topographic City Plan map
Batley – 2 Russian military 1:10,000 topographic City Plan maps
Bedford – 1 Russian military 1:10,000 topographic City Plan map
Belfast – 1 Russian military 1:10,000 topographic City Plan map
Birmingham – 1 Russian military 1:10,000 topographic City Plan map
Blackburn – 1 Russian military 1:10,000 topographic City Plan map
Blackpool, Cleveleys, Thornton, Poulton-le-Fylde – 2 Russian military 1:10,000 topographic City Plan maps
Blyth – 1 Russian military 1:10,000 topographic City Plan map
Bolton – 2 Russian military 1:10,000 topographic City Plan maps
Bournemouth, Poole – 1 Russian military 1:25,000 topographic City Plan map
Bournemouth, Poole – 4 Russian military 1:10,000 topographic City Plan maps
Bradford – 2 Russian military 1:10,000 topographic City Plan maps
Brighton, Hove – 2 Russian military 1:10,000 topographic City Plan maps
Brighton, Hove, Portslade-by-Sea, Sauthwick, Shoreham-by-Sea – 1 Russian military 1:10,000 topographic City Plan map
Bristol – 4 Russian military 1:10,000 topographic City Plan maps
Burnley, Padingham – 1 Russian military 1:10,000 topographic City Plan map
Cambridge – 2 Russian military 1:10,000 topographic City Plan maps
Cardiff – 1 Russian military 1:10,000 topographic City Plan map
Chatham, Gillingham, Rochester – 2 Russian military 1:10,000 topographic City Plan maps
Chester – 1 Russian military 1:10,000 topographic City Plan map
Colchester – 2 Russian military 1:10,000 topographic City Plan maps
Coventry – 2 Russian military 1:10,000 topographic City Plan maps
Crewe – 1 Russian military 1:10,000 topographic City Plan map
Darlington – 1 Russian military 1:10,000 topographic City Plan map
Derby – 1 Russian military 1:10,000 topographic City Plan map

United Kingdom (continued)

Dewsbury, Mirfield – 1 Russian military 1:10,000 topographic City Plan map
Doncaster – 2 Russian military 1:10,000 topographic City Plan maps
Doncaster, Bentley – 1 Russian military 1:10,000 topographic City Plan map

United States of America

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of USA including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of USA via 53,737 USGS 1:24,000 topographic maps

Full coverage of USA via 2,790 USGS 1:50,000 topographic maps

Full coverage of USA via 1,808 USGS 1:100,000 topographic maps

Partial coverage of USA via 632 USGS 1:250,000 topographic maps

Full coverage of USA via 50 1:500,000 TPC aeronautical topographic maps

Partial coverage of USA via 12 NGA 1:1,000,000 ONC aeronautical topographic maps

Territories

Full coverage of American Samoa via 2 USGS 1:24,000 topographic maps

Full coverage of Guam via 9 USGS 1:24,000 topographic maps

Full coverage of Kosrae Island via 1 USGS 1:25,000 topographic map

Full coverage of Kosrae Island via 4 USGS 1:10,000 topographic maps

Full coverage of Pohnpei (Ponape) Islands via 11 USGS 1:10,000 topographic maps

Full coverage of Pohnpei (Ponape) Islands via 2 USGS 1:25,000 topographic maps

Full coverage of Puerto Rico via 65 1:20,000 & 2 1:30,000 USGS topographic maps

Off-shelf global data of USA—low-cost, rapid delivery:

USA VMAP-0 – US NGA 1:1,000,000 vector mapping

USA SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

USA SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

USA GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Uruguay

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Uruguay

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Uruguay (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Uzbekistan

Land Info offers a variety of digital topographic map data and satellite imagery products of Uzbekistan including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Uzbekistan via 1,337 Russian military 1:50,000 topographic maps

Full coverage of Uzbekistan via 383 Russian military 1:100,000 topographic maps

Full coverage of Uzbekistan via 114 Russian military 1:200,000 topographic maps

95% coverage of Uzbekistan via 41 US NGA 1:250,000 JOG topographic maps

Full coverage of Uzbekistan via 7 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Uzbekistan via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Andizhan – 1 Russian military 1:25,000 topographic City Plan map

Bukhara – 2 Russian military 1:10,000 topographic City Plan maps

Chirchik – 2 Russian military 1:10,000 topographic City Plan maps

Dzhizak – 1 Russian military 1:10,000 topographic City Plan map

Fergana – 1 Russian military 1:10,000 topographic City Plan map

Gulistan – 2 Russian military 1:10,000 topographic City Plan maps

Kagan – 1 Russian military 1:10,000 topographic City Plan map

Karshi – 1 Russian military 1:10,000 topographic City Plan map

Margilan – 1 Russian military 1:10,000 topographic City Plan map

Namangan – 2 Russian military 1:10,000 topographic City Plan maps

Nukus – 1 Russian military 1:10,000 topographic City Plan map

Samarkand – 4 Russian military 1:10,000 topographic City Plan maps

Tashkent – 2 Russian military 1:25,000 topographic City Plan maps

Termez – 1 Russian military 1:25,000 topographic City Plan map

Khavast and Zafarobod – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Uzbekistan—low-cost, rapid delivery:

Uzbekistan VMAP-0 – US NGA 1:1,000,000 vector mapping

Uzbekistan SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Uzbekistan SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Uzbekistan GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Uzbekistan GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Uzbekistan

Uzbekistan (continued)

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Uzbekistan

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Vanuatu

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Vanuatu including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Vanuatu via 15 national 1:100,000 topographic maps

Full coverage of Vanuatu via 2 US 1:500,000 TPC aeronautical topographic maps

Off-shelf global data of Vanuatu—low-cost, rapid delivery:

Vanuatu VMAP-0 – US NGA 1:1,000,000 vector mapping

Vanuatu SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Vanuatu SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Vanuatu GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Vanuatu GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Vanuatu

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Vanuatu

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Venezuela

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Venezuela including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Venezuela via 5,018 nat'l 1:25,000 & 1:50,000 topographic maps
Near-full coverage of Venezuela via 337 national 1:100,000 topographic maps
Near-full coverage of Venezuela via 47 national 1:250,000 JOG topographic maps
Near-full coverage of Venezuela via 53 US NGA 1:250,000 JOG topographic maps
Full coverage of Venezuela via 11 US 1:500,000 TPC aeronautical topographic maps
95% coverage of Venezuela via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Caracas, Maiquetia – 2 Russian military 1:25,000 topographic City Plan maps
Maracaibo – 1 Russian military 1:25,000 topographic City Plan map

Off-shelf global data of Venezuela—low-cost, rapid delivery:

Venezuela VMAP-0 – US NGA 1:1,000,000 vector mapping
Venezuela SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Venezuela SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Venezuela GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Venezuela GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Venezuela
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Venezuela

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Venezuela (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Vietnam

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Vietnam including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

96% coverage of Vietnam via 564 US NGA 1:50,000 TLM topographic maps
Full coverage of Vietnam via 253 Russian military 1:100,000 topographic maps
Full coverage of Vietnam via 83 Russian military 1:200,000 topographic maps
Full coverage of Vietnam via 41 US NGA 1:250,000 JOG topographic maps
Near-full coverage of Vietnam via 7 US 1:500,000 TPC aeronautical topographic maps
50% coverage of Vietnam via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Da Nang – 1 Russian military 1:10,000 topographic City Plan map
Haiphong (Hai Phong) – 1 Russian military 1:10,000 topographic City Plan map
Hanoi (Ha Noi) – 2 Russian military 1:10,000 topographic City Plan maps
Ho Chi Minh (Saigon), (Than Pho Ho Chi Min) – 4 Russian military 1:10,000 topographic City Plan maps
Hue – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Vietnam—low-cost, rapid delivery:

Vietnam VMAP-0 – US NGA 1:1,000,000 vector mapping
Vietnam SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Vietnam SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Vietnam GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Vietnam GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Vietnam
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Vietnam

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Vietnam (continued)

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Wake Island

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Wake Island including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Wake Island via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Wake Island—low-cost, rapid delivery:

Wake Island VMAP-0 – US NGA 1:1,000,000 vector mapping

Wake Island SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Wake Island SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Wake Island GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Wake Island GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Wake Island

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Wake Island

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Wallis & Futuna

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Wallis & Futuna including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

50% coverage of Wallis & Futuna via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of Wallis & Futuna—low-cost, rapid delivery:

Wallis & Futuna VMAP-0 – US NGA 1:1,000,000 vector mapping

Wallis & Futuna SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Wallis & Futuna SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Wallis & Futuna GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Wallis & Futuna GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Wallis & Futuna

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Wallis & Futuna

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

West Bank

Land Info offers a variety of digital topographic map data and satellite imagery products of West Bank including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of West Bank via 28 Russian military 1:50,000 topographic maps
Full coverage of West Bank via 11 Russian military 1:100,000 topographic maps
Full coverage of West Bank via 5 Russian military 1:200,000 topographic maps
Full coverage of West Bank via 2 US NGA 1:250,000 JOG topographic maps
30% coverage of West Bank via 1 US 1:1,000,000 ONC aeronautical topographic map

Off-shelf global data of West Bank—low-cost, rapid delivery:

West Bank VMAP-0 – US NGA 1:1,000,000 vector mapping
West Bank SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
West Bank SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
West Bank GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
West Bank GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of West Bank
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of West Bank

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

West Bank (continued)

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Western Sahara

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Western Sahara including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Western Sahara via 178 Russian military 1:100,000 topographic maps
Full coverage of Western Sahara via 56 Russian military 1:200,000 topographic maps
98% coverage of Western Sahara via 25 US NGA 1:250,000 JOG topographic maps
Full coverage of Western Sahara via 3 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Western Sahara via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Ad-Dakhla. 1:10,000 scale national topographic city plan map, publ. 2002, 1 map
Laayoune (El-Aaiún). 1:7,500 scale national topographic city plan map, publ. 2001, 1 map
Smara (Semara). 1:7,500 scale national topographic city plan map, publ. 2002, 1 map

Off-shelf global data of Western Sahara—low-cost, rapid delivery:

Western Sahara VMAP-0 – US NGA 1:1,000,000 vector mapping
Western Sahara SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Western Sahara SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Western Sahara GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Western Sahara GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Western Sahara
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Western Sahara

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Western Sahara (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Yemen

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Yemen including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Yemen via 170 national 1:50,000 topographic maps
Near-full coverage of Yemen via 229 national 1:100,000 topographic maps
Near-full coverage of Yemen via 250 Russian military 1:100,000 topographic maps
Full coverage of Yemen via 87 Russian military 1:200,000 topographic maps
90% coverage of Yemen via 34 US NGA 1:250,000 JOG topographic maps
Partial coverage of Yemen via 1 US 1:500,000 TPC aeronautical topographic map
Partial coverage of Yemen via 1 US 1:1,000,000 ONC aeronautical topographic map

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Aden – 1 Russian military 1:25,000 topographic City Plan map
Sanaa – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Yemen—low-cost, rapid delivery:

Yemen VMAP-0 – US NGA 1:1,000,000 vector mapping
Yemen SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Yemen SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Yemen GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Yemen GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Yemen
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Yemen

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Yemen (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Yugoslavia, former

Land Info offers a variety of digital topographic map & nautical chart data and satellite imagery products of Yugoslavia, former including DEMs (Digital Elevation Models), bathymetry and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Near-full coverage of Yugoslavia via 419 US NGA 1:50,000 TLM topographic maps
Full coverage of Yugoslavia via 829 Russian military 1:50,000 topographic maps
Full coverage of Yugoslavia via 70 Russian military 1:200,000 topographic maps
95% coverage of Yugoslavia via 29 US NGA 1:250,000 JOG topographic maps
Partial coverage of Yugoslavia via 2 US 1:500,000 TPC aeronautical topographic maps
Full coverage of Yugoslavia via 2 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Please see city listings separately under the individual countries of Bosnia & Herzegovina, Croatia, Kosovo, Macedonia, Montenegro, Serbia, Slovenia

Off-shelf global data of Yugoslavia, former—low-cost, rapid delivery:

Yugoslavia, former VMAP-0 – US NGA 1:1,000,000 vector mapping
Yugoslavia, former SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs
Yugoslavia, former SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available
Yugoslavia, former GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery
Yugoslavia, former GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Yugoslavia, former
Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Yugoslavia, former

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Yugoslavia, former (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Zambia

Land Info offers a variety of digital topographic map data and satellite imagery products of Zambia including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Zambia via 137 Russian military 1:200,000 topographic maps

15% coverage of Zambia via 45 US NGA 1:250,000 JOG topographic maps

Partial coverage of Zambia via 2 US 1:500,000 TPC aeronautical topographic maps

Full coverage of Zambia via 3 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Lusaka – 4 Russian military 1:10,000 topographic City Plan maps

Ndola – 1 Russian military 1:10,000 topographic City Plan map

Off-shelf global data of Zambia—low-cost, rapid delivery:

Zambia VMAP-0 – US NGA 1:1,000,000 vector mapping

Zambia SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Zambia SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Zambia GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Zambia GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Zambia

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Zambia

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs

Zambia (continued)

(5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery

Contact us with your AOI (Area of Interest) for a scene search to determine if the imagery you need is already in archive or has to be custom-acquired.

Zimbabwe

Land Info offers a variety of digital topographic map data and satellite imagery products of Zimbabwe including DEMs (Digital Elevation Models) and vector layers such as contours, hydrology & transportation/roads. All data is delivered in industry standard file formats such as GeoTiff, NITF, ER Mapper .ecw, LizardTech MrSID .sid, JPG2000 .jp2, Idrisi .rst, ERDAS .img, ESRI .shp shapefile or .mdb GeoDatabase, AutoCAD .dxf or .dwg, MicroStation .dgn, MapInfo MIF/MID/TAB, USGS ASCII .dem, ARC ASCII GRID, DTED and .bil (other formats available upon request). All data includes customer choice of projection. Contact us for educational and volume purchase discounts. Please note that due to copyright restrictions some map products are only available in their original printed format.

Digital topographic maps available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 20m - 90m resolution):

Full coverage of Zimbabwe via 72 Russian military 1:200,000 topographic maps

10% coverage of Zimbabwe via 8 US NGA 1:250,000 JOG topographic maps

Full coverage of Zimbabwe via 4 US 1:1,000,000 ONC aeronautical topographic maps

Large-scale (detailed) city mapping available as DRGs (Digital Raster Graphics), vector layers and/or DEMs (Digital Elevation Models: 5m - 10m resolution):

Bulawayo – 1 Russian military 1:25,000 topographic City Plan maps

Chitungwiza - 1:15,000 scale national topographic City Plan map, publ. 1995

Greater Bulawayo - 1:33,333 scale national topographic City Plan map, publ. 1991

Gweru 1:7,500 scale national topographic City Plan map, publ. 2001

Harare - 1:30,000 scale national topographic City Plan map, publ. 2001

Harare – 6 Russian military 1:10,000 topographic City Plan maps

Off-shelf global data of Zimbabwe—low-cost, rapid delivery:

Zimbabwe VMAP-0 – US NGA 1:1,000,000 vector mapping

Zimbabwe SRTM3 – Shuttle Radar Topography Mission 3 arc second (ca. 90m) resolution DEMs

Zimbabwe SRTM30 – the earlier GTOPO30 30 arc second (ca. 1km) resolution worldwide DEM dataset enhanced with reduced resolution SRTM where available

Zimbabwe GeoCover 1990 30m resolution 7-4-2 Landsat 5 ortho imagery

Zimbabwe GeoCover 2000 15m resolution 7-4-2 Landsat 7 ortho imagery

Satellite imagery:

High-resolution satellite imagery including GeoEye Ikonos 1m & GeoEye-1 50cm, Astrium Pléiades 50cm, DigitalGlobe QuickBird 60cm, WorldView-1 50cm & WorldView-2 50cm of Zimbabwe

Medium-resolution satellite imagery for cost-effective large-area coverage including Astrium GEO-Information Services SPOT Image 1.5m - 20m & SPOTMaps, ALOS 2.5m - 10m, RapidEye 5m, ASTER 15m, DEIMOS 22m and Landsat 15m - 30m of Zimbabwe

Image processing, vector feature extraction, classification and terrain modeling:

Image processing services including orthorectification, tonal balancing, mosaic output, pan-sharpening, band manipulation, natural color simulation, 16- to 8-bit scaling/DRA (Dynamic Range Adjustment), cloud-patching, atmospheric correction, wavelet compression, GPS GCP (Ground Control Point) target location and accuracy assessment

Classification services including land-use, land-cover, vegetation and impervious surface mapping

2d vector feature extraction including roads/transportation, hydrology and building footprints

Zimbabwe (continued)

3d terrain modeling via auto-correlation and photogrammetric methods using stereo satellite imagery including high-res (Ikonos, GeoEye-1, WorldView-1 & WorldView-2--up to 1m post spacing), ALOS (10m post spacing), SPOT Image (20m post spacing), ASTER (30m post spacing) or radar (10m post spacing); Intermap DEMs (5m post spacing) from airborne radar are also offered of select locations. 3d building models with customer choice of LOD (Level of Detail) are extracted from stereo or off-nadir imagery
